

Most indicators throughout *Vital Signs* are created by acquiring and analyzing data collected from governmental agencies for some public administration purpose, such as 311 calls or housing inspections. However, data from the United States Bureau of the Census remains the best source for demographic and socioeconomic indicators for neighborhoods. The Census Bureau collects a wide variety of information through administration of both the decennial Census and the annual American Community Survey (ACS). Prior to 2010, the Census administered both a long- and short-form decennial Census which was used to collect detailed information on residents of the United States. Starting with the 2010 Census, only a short-form Census was administered to all households and the long-form was replaced with the ACS. The ACS is an ongoing, continuous survey used to collect data once supplied by the Census long-form.

The main benefit of the ACS is access to small-area data for the City of Baltimore on an annual basis; however, community-level information is averaged over 5-years of data collection making interpretation of the data more challenging. In *Vital Signs 11*, population counts, race/ethnicity, age and sex indicators continue to use the 2010 Census<sup>1</sup> since these are based on the full enumeration. Indicators calculated using the 5-year average from the 2007-2011 ACS data will be noted. Even though ACS data is released annually, year-over-year comparisons cannot be directly made since four of the five years in each time period overlap and any changes during this time period may not reflect change that occurred in that one single year<sup>2</sup>.

Census data are frequently used throughout *Vital Signs* as denominators for normalizing many other indicators and rates. The socioeconomic and demographic indicators are grouped into the following categories: *population, race/ethnicity, age, households, and income and poverty.*

### Population

The Community Statistical Areas (CSA) that are used to report *Vital Signs* data are aggregations of census tracts that represent neighborhoods. Since the CSAs vary by population size, many indicators are normalized by population so that rates and percentages can be compared uniformly. The **largest** CSAs in terms of population size are Cedonia/Frankford (23,557), Greater Rosemont (19,259), and Southwest Baltimore (17,885). The **smallest** CSAs are Dickeyville/Franklinton (4,101), Poppleton/The Terraces/Hollins Market (5,086), and Mt. Washington/Coldspring (5,168). These also are the **highest** and **lowest** CSAs with respect to total male population.

<sup>2</sup> For more information on data interpretation of the American Community Survey visit [www.census.gov](http://www.census.gov).

Total female population is **highest** in Cedonia/Frankford, Greater Rosemont and Belair-Edison and **lowest** in Dickeyville/Franklintown, Poppleton/The Terraces/Hollins Market and Washington Village.

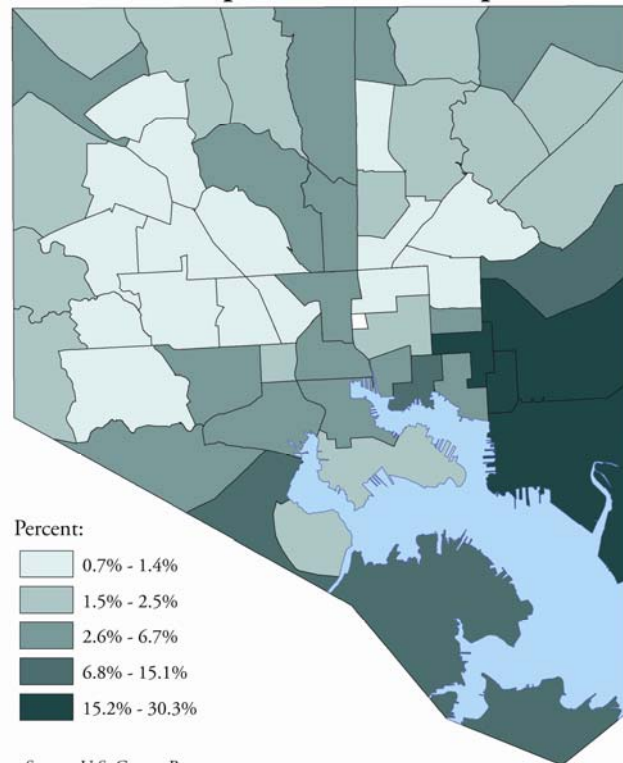

## Non-Hispanic Race

The Census asks two separate questions for respondents to identify race (white, black, Asian, 2 or more, or other) and ethnicity (Hispanic or Non-Hispanic). *Vital Signs 11* reports race for non-Hispanic persons only, to more clearly understand the impact of the growing Hispanic population by CSA (see below). In 2010, the City was 63.8% non-Hispanic black and 28.3% non-Hispanic white. The CSAs with the **highest percentage non-Hispanic black** were Edmondson Village (96.7%) and Clifton-Berea (96.3%). The CSAs with the **highest percentage non-Hispanic white** were South Baltimore (90.3%) and Canton (86.0%). The CSAs with the **highest percentage non-Hispanic Asian** were Downtown/Seton Hill (15.9%) and Greater Charles Village/Barclay (13.3%).

## Ethnicity and Diversity

Although the City as a whole is only 4.2% ethnically Hispanic, some Baltimore neighborhoods have high percentages of Hispanic residents particularly in the southeast part of the City. The CSAs with the **highest percentage Hispanic** population are Orangeville/East Highlandtown (30.3%), Patterson Park North & East (21.1%), and Southeastern (19.9%). These CSAs also correspond to the areas with the **greatest racial diversity**, which is the chance of choosing two people at random in a neighborhood and each being a different race or ethnicity.

Percent of the Population that is Hispanic, 2010

## Age

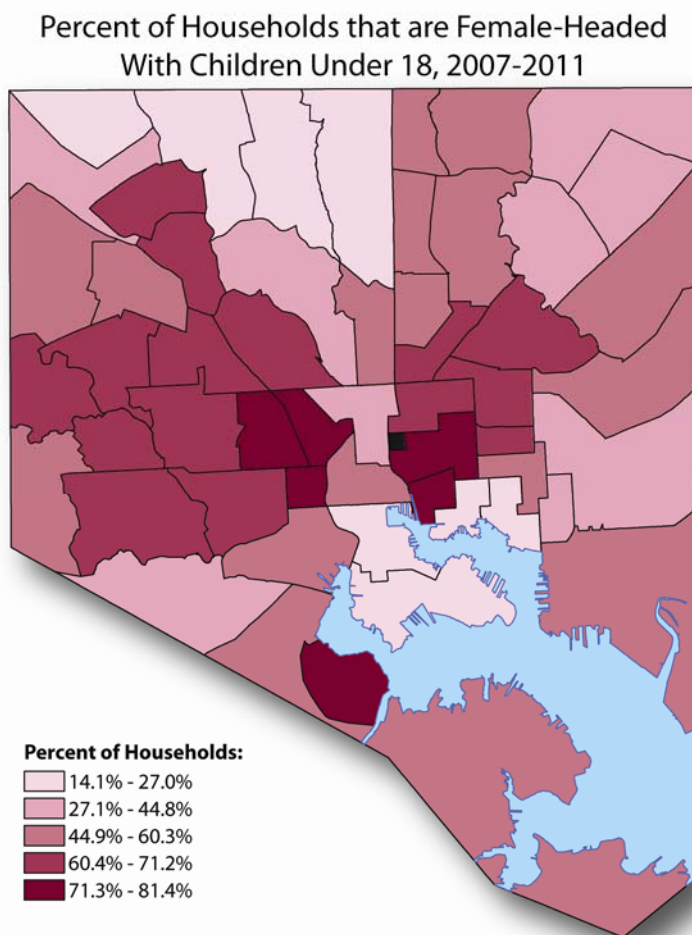

Population age groups reflect “life cycle” ranges from 0-5, school-age, college-age, working-age and seniors. The CSAs with the **highest percentage population 0 to 5 years** old were Cherry Hill (11.4%) and Madison/East End (10.4%). The CSAs with the **highest percentage population 6 to 18 years** old were also Cherry Hill (24.3%) and Madison/East End (22.3%). The CSAs with the **highest percentage population 19 to 24 years** old were Greater Charles Village/Barclay<sup>3</sup> (33.9%)

<sup>3</sup> This CSA includes the Johns Hopkins University Homewood Campus

and North Baltimore/Guilford/Homeland<sup>4</sup> (28.2%). The CSAs with the **highest percentage population 25 to 64 years old** were Canton (71.5%) and South Baltimore (70.9%). The CSAs with the **highest percentage population 65 years old or older** were Glen-Falstaff (17.9%) and Morrell Park/Violetville (17.8%).

## Households

Similar to population size, the CSAs vary by **total number of households**, and some indicators are normalized by households so that rates and percentages can be compared uniformly. CSAs in terms of number of households are not the same as the ones for population size, since households can range from single-person to large families. The **largest** CSAs in terms of number of households are Cedonia/Frankford (9,348), Midtown (9,078) and Medfield/Hampden/Woodberry/Remington (8,289). The **smallest** CSAs are Dickeyville/Franklinton (1,877), Poppleton/The Terraces/Hollins Market (2,181) and Washington Village/Pigtown (2,273).

The City's **average household size** is 2.4 persons with CSAs ranging from a **high** of 3.3 persons per household in Madison/East End to a **low** of 1.6 in Downtown. These same CSAs correspond to the highest and lowest percent of **households with children under 18 years old**, 51.0% in Madison/East End and 8.6% in Downtown.

- Of the households with children under 18, 54.9% of Baltimore City's households were identified as being female-headed. The CSAs with the highest percentage of **female-headed households with children under 18** were with Oldtown/Middle East (81.4%) and Cherry Hill (80.7%).

<sup>4</sup> This CSA includes the campuses of Loyola University of Maryland and Notre Dame University

## Income and Poverty

Using the 2007-2011 American Community Survey, the **median household income** in Baltimore was \$40,100, with a wide range by CSA with the **greatest** median household income in Greater Roland Park/Poplar Hill (\$112,702) and the **lowest** in Oldtown/Middle East (\$13,766).

- Nearly 35% of the City's households **earn less than \$25,000** annually. The CSAs with the **greatest** percentage of households earning less than \$25,000 annually include Upton/Druid Heights (65.0%), Oldtown/Middle East (63.5%), and Poppleton/The Terraces/Hollins Market (60.8%).
- Slightly more than 23% of households **earn more than \$75,000** annually. The CSAs with the **greatest** percentage of households earning more than \$75,000 annually include Greater Roland Park/Poplar Hill (64.3%), North Baltimore/Guilford/Homeland (53.3%), Inner Harbor/Federal Hill (53.0%), and Canton (53.0%).

*Vital Signs 11* reports the percentage of households and the percentage of children that are living below the poverty line. The poverty line is determined by the United States Department of Health and Human Services and varies based upon the composition of the family (number of adults and number of children).

- For 2007-2011, 17.7% of the **households in Baltimore City were living below the poverty line**. The CSAs with the **greatest** percentage of households in poverty included Upton/Druid Heights (50.6%), Oldtown/Middle East (46.7%), and Cherry Hill (42.0%).
- For 2007-2011, 31.9% of **children in Baltimore City lived below the poverty line**. The CSAs with the **greatest** percentage of children living in poverty included Harbor East/Little Italy (67.5%), Oldtown/Middle East (64.1%), Upton/Druid Heights (57.0%), and Cherry Hill (55.6%).

## New Indicators in Vital Signs 11

*Vital Signs 11, Census Demographics* includes three new indicators: *percent of female-headed households, percent of households living below the poverty line, and percent of children living below the poverty line*. The data included in *Vital Signs 11* will serve as the baseline for future comparisons, and as such is not comparable to previous data.

### *Baseline rates in 2011 for Baltimore City: New Socioeconomic & Demographic Indicators*

Percent of Female-Headed Households with Children	56.3%
Percent of Households Living Below the Poverty Line	17.7%
Percent of Children Living Below the Poverty Line	31.9%

## Indicator Definitions & Rankings

For each indicator reported in *Vital Signs 11*, we provide the data source, the years for which it is reported, and the five CSAs with the highest and lowest values for the indicator; these may not correspond to positive or negative trends.

### Population

#### Total Population

*Measure of persons living in an area.*

**Definition:** The total number of persons of all ages that live within an area. This indicator is frequently used to normalize data to allow for comparison across areas.

**Source:** U.S. Census Bureau, 2010

#### Five Highest:

1. Cedonia/Frankford
2. Greater Rosemont
3. Southwest Baltimore
4. North Baltimore/Guilford/Homeland
5. Belair-Edison

#### Five Lowest:

1. Dickeyville/Franklinton
2. Poppleton/The Terraces/Hollins Market
3. Mt. Washington/Coldspring
4. Harbor East/Little Italy
5. Washington Village

#### Total Male Population

*Measure of males living in an area.*

**Definition:** The total number of men of all ages that live within an area.

**Source:** U.S. Census Bureau, 2010

#### Five Highest:

1. Cedonia/Frankford
2. Greater Rosemont
3. Southwest Baltimore
