In April 2015, the nation watched as Baltimore was enveloped in civil and racial unrest following the death of Freddie Gray, who sustained fatal injuries while in police custody. In many of the City’s communities, the summer of 2015 was marked with a homicide and violent crime, the severity of which hadn’t been experienced in years. While crime rates soared, adult and juvenile arrests declined.

During this time period, the Baltimore Police Department (BPD) underwent a change in leadership, with Kevin Davis replacing Anthony Batts who had overseen the department since 2012. In August 2016, a U.S. Department of Justice investigation concluded that the city had violated federal anti-discrimination laws as well as the First, Fourth, and Fourteenth Amendments of the Constitution with unlawful searches, arrests, unreasonable force, and racial targeting.¹ In response, Attorney General Loretta Lynch issued a consent decree for Baltimore City, laying out reforms for the department, ending “zero tolerance” policing strategies in favor of a more community-oriented strategy with greater accountability and oversight.²

Now more than ever, having access to reliable, consistent data is crucial for accountability and measuring progress towards a city that is safe and just. The indicators presented in *Vital Signs 15* are a glimpse at the overall safety trends within the city across its communities. It is important to recognize the context for many of the statistics presented in this chapter; the individual narratives of Baltimore’s communities vary and each area faces its own unique challenges or successes.

Data

The 2015 incident crime data for *Vital Signs* are provided by the Baltimore City Police Department (BCPD) with as part of the national Uniform Crime Report (UCR) cooperative statistical reporting. Additional indicators derived from the BCPD are adult arrests, which comprises of individuals

processed through the Central Booking facility, and juvenile arrests of youth under the age of 18.

For *Vital Signs 15* several indicators are used to track general crime and safety in Baltimore City for 2015. These indicators are derived from the Part I Victim- Based Offenses, 911 Calls for Service, and Arrests datasets published online by the BCPD on the Open Baltimore data portal. Indicators are created by normalizing this data by population to establish crime rates. Normalizing data allows for the rates to reflect the concentration of the crime relative to the residential population, and allows for comparison across neighborhoods and over time. Incident and arrest rates are high in areas such as the Downtown/ Seton Hill CSA where there are high daytime populations but low rates of residence.

General Crime & Safety

Four indicators are tracked in *Vital Signs 15* reflecting general crime and safety measures: *Part I crime rate*; *violent crime rate*; *gun-related homicides*; and *property crime rate*. Incidents of crime reported in Part I of the UCR are considered the more serious criminal offenses. These offenses are categorized as either violent crimes (homicide, rape, aggravated assault, and robbery) or property crimes (burglary, larceny, and auto theft). The violent and property crime rates are derived from these two categories. The indicator for homicides that were committed with a firearm looks at one specific offense within the Part I dataset.

- From 2014 to 2015, the Part I crime rate in Baltimore City increased from 60.5 offenses per 1,000 residents in 2014 to 65.1 offenses per 1,000 residents. The subset of Part I crimes that makeup the violent crime rate increased as well, from 13.7 violent offenses per 1,000 residents in 2014 to 16.1 per 1,000 persons in 2015. The property crime rate citywide also saw an increase, from 45.9 to 48.2 incidents per 1,000.
- From 2014 to 2015, 45 of the 55 CSAs experienced an increase in the Part I crime rate and only ten communities experienced a decrease. The greatest increases occurred in Orangeville/East Highlandtown, Downtown/Seton Hill, and Upton/Druid Heights. These three communities had increases greater

than 20 points. The most notable decrease in the Part I crime rate was Inner Harbor/Federal Hill, with a 13.4 point decline.

- In 2015, Downtown/Seton Hill (79.4 incidents per 1,000), Upton/Druid Heights (30.3), Oldtown/Middle East (29.9), and Washington Village/Pigtown (29.8) had the highest rates of violent crime. In previous years, the communities with the lowest rates of violent crime were concentrated in the northern and northwestern portions of the city. In 2015, areas around the water, such as Canton and South Baltimore, which includes the Locust Point neighborhood, were the safest.
- Baltimore City experienced 344 homicides in 2015, a significant increase from the 211 homicides in 2014. In 2015, nearly 88% of the deaths were a result of a shooting. Communities in West Baltimore experienced the highest rates of gun homicide: Poppleton/The Terraces/Hollins Market (2.2 incidents per 1,000 residents), Southwest Baltimore (1.3), Sandtown-Winchester/Harlem Park (1.2), and Pimlico/Arlington/Hilltop (1.2).
- In 2015 the property crime rate in Baltimore was 48.2 incidents per 1,000 residents. The CSAs with the highest rates of property crime were Downtown/Seton Hill (185.7 incidents per 1,000 residents), Harbor East/Little Italy (126.9), and Washington Village/Pigtown (120.1). Several CSAs experienced a notable increase in the rate of crimes being

committed, particularly in the southeastern portion of the city, in Patterson Park North & East, Orangeville/East Highlandtown, Southeastern, and Highlandtown.

Arrests

The relationship between incidents of crime and arrests in a neighborhood is often complicated—not all crime incidents lead to a direct and immediate arrest; one person may be arrested for more than one crime; and, not all arrests lead to charges being led by the State's Attorney. Furthermore, arrest data only reflects the locations of arrests, not necessarily the location of the crime.

Introduced last year in *Vital Signs 14*, the number of adults arrested per 1,000 adult residents aged 18 and above provides information of where police action is occurring. This data from the Baltimore City Police Department reflects all adults who were arrested and processed through the Central Booking and Intake facility.

The year 2015 saw marked decreases in arrest rates for most of the Community Statistical Areas in Baltimore. According to data published by the FBI through their Uniform Crime Reporting Statistics, the national adult arrest rate decreased by 3.0%³ from 2014 but the decrease in Baltimore was considerably lower. According to research by Stephen L. Morgan and

Joel Pally, considerable declines in the Baltimore City arrest rate occurred following the civil unrest in late spring through summer 2015 for both violent and property crime offenses as well as for offenses such as disorderly conduct.⁴

- The arrest rate for adults was dramatically lower in 2015 than in the previous year. The Baltimore City arrest rate was 30.9 arrests per 1,000 residents. The CSAs with the highest arrest rates were Downtown/Seton Hill (127.8 arrests per 1,000), Washington Village/Pigtown (107.0), and Southwest Baltimore (106.1). Comparatively, in 2014, the arrest rate for Baltimore City was 48.7 arrests of adults per 1,000 residents aged 18 and above. The communities with the highest rates of adult arrests were Downtown/Seton Hill (241.5 arrests per 1,000), Madison/East End (154.6), and Southwest Baltimore (147.3).
- Only five CSAs had a slight increase in their arrest rate from 2014 to 2015: Hamilton, Greater Roland Park/Poplar Hill, Chinquapin Park/Belvedere, North Baltimore/Guilford/Homeland, and Lauraville. The greatest increase in the arrest rate was in Hamilton, where the rate increased by 2.4 points.
- Conversely, fifty of the fifty-five CSAs had great decreases in their arrest rate from 2014 to 2015. The most significant decreases were seen downtown and in other CSAs typically associated with high rates of crime.
- The CSAs with the lowest arrest rates in 2015

HOMICIDES BY CAUSE OF DEATH, 2014-2015

SOURCE: Baltimore City Police Department

were Cross-Country/Cheswolde (0.4 arrests per 1,000 residents, Mount Washington/Coldspring (3.6), and Greater Roland Park/Poplar Hill (4.5).

Juvenile Arrests

The adult arrest rate in Baltimore City decreased citywide from 2014 to 2015 and in many CSAs this trend was carried through with arrest rates for juveniles as well. *Vital Signs 15* includes three indicators related to juvenile crime: juvenile arrest rate, juvenile arrest rate for violent offenses, and juvenile arrest rate for drug-related offenses. Each of these indicators is nor-

malized by the number of persons living in the community between the ages of 10 and 17.

Arrests are analyzed for the purposes of this report, rather than crimes committed, because not all juveniles arrested are charged with committing a crime; these indicators also exclude offenders who are later charged as adults. Furthermore, the indicators are calculated by the place of arrest, not by where the crime had been committed. As the rates show, many CSAs near the city center, such as Downtown/Seton Hill, Midtown, Inner Harbor/Federal Hill, and Fells Point have low residential juvenile populations, suggesting that rates may be skewed by youth arrests at various points of interest where juveniles may congregate, such as businesses, parks, transit hubs, and so on. Juvenile arrests for drugs are the exception; the highest rates for this indicator in 2015 are away from the city center.

Juvenile violent offenses include arrests for murder, rape, attempted rape, aggravated assault, and robbery. Drug-related offenses include arrests for possession, sale, manufacture, or abuse of illegal drugs. Alcohol is also included for this indicator since it is illegal for juveniles to possess or consume alcohol.

- In 2015, the overall juvenile arrest rate in Baltimore City was 32.7 arrests per 1,000 juveniles. The CSAs with the highest rates include Downtown/Seton Hill (450 arrests

⁴ Stephen L. Morgan, Joel Pally (2016), Ferguson, Gray, and Davis: An Analysis of Recorded Crime Incidents and Arrests in Baltimore City, March 2010 through December 2015". A Report Prepared for the 21st Century Cities Initiative at Johns Hopkins University. Accessed at <http://socweb.soc.jhu.edu/faculty/morgan/papers/MorganPally2016.pdf>.

per 1,000), Inner Harbor/Federal Hill (186.0), Midtown (117.5), and Highlandtown (91.7).

- In regards to arrests for violent offenses, the city rate was 8.5 arrests per 1,000 youth for Baltimore City. The CSAs with the highest arrest rates include Downtown/Seton Hill (122.2 arrests per 1,000 juveniles), Midtown (60.4), Fells Point (54.9), and Inner Harbor/Federal Hill (28.9). Three CSAs in 2015 did not have any juvenile arrests for violent offenses: Canton, Cross-Country/Cheswolde, and Dickeyville/Franklintown.
- For drug-related arrests, Baltimore City had an arrest rate of 4.7 per 1,000 youth. A total of thirteen CSAs did not have any juvenile arrest for drugs in 2015. The communities that did have the highest rates include Highlandtown (30.6 arrests per 1,000 juveniles), Southwest Baltimore (29.7), Washington Village/Pigtown (17.9), and Pimlico/Arlington/Hilltop (17.0). The latter three communities do show up as the CSAs with the highest rates of calls for service to 911 for narcotics in 2015.

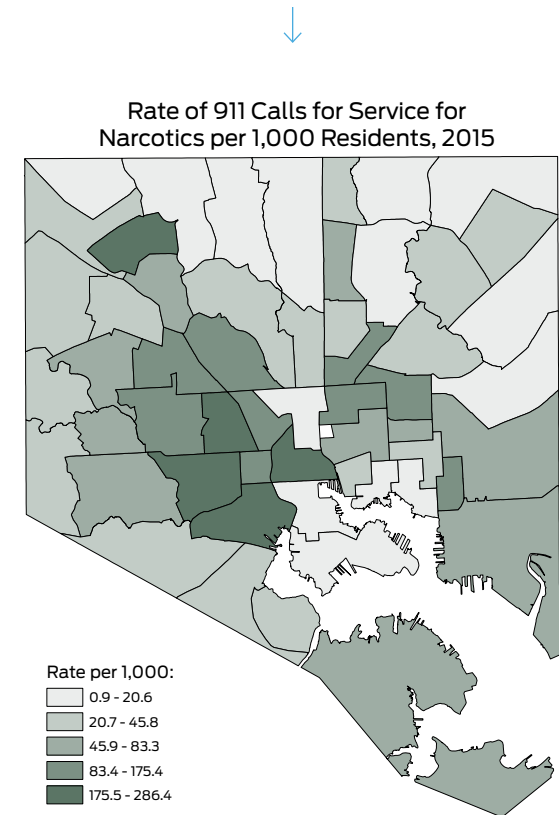

Specific Crime Incidents and Accidents

In order to address residents' concerns about safety and quality of life, *Vital Signs 15* includes four indicators developed using calls for service from the Baltimore City Police Department. Calls for service are both calls from persons using 911 and calls initiated by police officers who are on

duty. These indicators include reported shootings, common assaults, reports of narcotics, and automotive accidents. Each of these indicators is presented per 1,000 residents allowing for comparison across each of the CSAs.

The following indicators generated from the calls for service data for 2015 were calculated using a spatial methodology different than what was used in prior reporting years. Consequently, the 2015 data cannot be compared to data representative for 2011 or 2012. The data presented here can be used as a "snapshot" to illustrate variations across CSAs, rather than across time. For more information, please see the Changes and Explanations section of this report.

- In 2015, there were 2,110 calls for shootings in Baltimore City for a rate of 3.2 per 1,000 residents. The CSAs with the highest rates of shootings were Downtown/Seton Hill (12.7 per 1,000 residents), Sandtown-Winchester/Harlem Park (9.7), Southwest Baltimore (9.1), Oldtown/Middle East (9.0), and Poppleton/The Terraces/Hollins Market (9.0). Greater Roland Park/Poplar Hill was the only CSA without any calls to 911 for shootings.
- The Baltimore City rate of 911 calls for common assaults in 2015 was 71.9 per 1,000 residents. The Downtown/Seton Hill CSA had the highest rate of common assault calls for service at 404.1 per 1,000 residents. The CSAs with the lowest rates were concentrated in

Indicator Research and Development: Reports of Street Light Outages

For over three years, the Baltimore

Neighborhood Indicators Alliance-Jacob France Institute (BNIA-JFI) served as the data evaluation team for the Byrne Criminal Justice Innovation Grant (BCJI) in the McElderry Park neighborhood in East Baltimore. The BCJI grant focused on evidence-based crime reduction strategies to improve community safety and well-being.

Early on in the project, a literature review was conducted by the University of Baltimore to identify successful crime reduction strategies that could be implemented in McElderry Park. Research has shown that interventions resulting in better-lit areas have reduced both victimization and perceptions of risk. Areas with persistent street light outages may experience increased levels of crime incidents, as darkness can provide cover for a variety of both property and violent offenses.

BNIA-JFI obtained 2016 data for reported street light outages from the Open Baltimore data portal and performed a density analysis of their locations, as shown in the map “Density of 311 Calls for Service for Street Light Outages, 2016”. The most notable hotspots, at the city scale, appeared in the Patterson Park North & East, Southwest Baltimore, Washington Village/Pigtown, and Inner Harbor/Federal Hill CSAs.

Continued analysis of reported street light outages and detailed research on their relationship at with crime incidents can provide invaluable insight on a new actionable indicator that the community can use to improve safety.

the outer edges of the city, including Greater Roland Park/Poplar Hill, Cross-Country/Cheswolde, and Mt. Washington/Coldspring.

- In 2015, Baltimore City's rate of 911 calls for narcotics was 64.7 calls per 1,000 residents, or 42,650 total calls. The top five CSAs for narcotics calls all had rates three times higher than the city rate: Pimlico/Arlington/Hilltop (286.4 calls per 1,000 residents), Washington Village/Pigtown (249.5), Southwest Baltimore (237.1), Sandtown-Winchester/Harlem Park (220.8), and Downtown/Seton Hill (220.3).

When looking at the number of motor vehicle accident calls for service per 1,000 residents, not every accident is reported to the Police Department and therefore is not included in the calls for service data. Some communities that contain portions of high speed roads such as highways and interstates often have higher reported numbers of calls.

- In 2015, the rate of automobile accident calls for service was 75.9 per 1,000 residents in Baltimore City. The CSAs with the highest rates include Downtown/Seton Hill 475.5 per 1,000 residents), Washington Village (201.3), Orangeville/East Highlandtown (184.9), and Oldtown/Middle East (165.8). The lowest rates mostly occurred in CSAs that border the Baltimore City and Baltimore County line, with Cross-Country/Cheswolde reporting the lowest rate of automobile accidents: 12.0 per 1,000 residents.

Crime and Safety:
Indicator Definitions
and Rankings

For each indicator reported in *Vital Signs 15* we provide the data source, the years — for which it is reported, and the five CSAs with the highest and lowest values for the indicator; these may not correspond to positive or negative trends.

General Crime & Safety

Part 1 Crime Rate

Measures the overall rate of Part 1 crimes in an area.

Definition: The part 1 crime rate captures incidents of homicide, rape, aggravated assault, robbery, burglary, larceny, and auto theft that are reported to the Police Department. These incidents are per 1,000 residents in the neighborhood to allow for comparison across areas.

(SOURCE: BALTIMORE CITY POLICE DEPARTMENT, 2010, 2011, 2012, 2013, 2014, 2015; U.S. CENSUS, 2010)

Five Highest:

1. Downtown/Seton Hill
2. Harbor East/Little Italy
3. Washington Village/Pigtown
4. Orangeville/East Highlandtown
5. Greater Mondawmin

Five Lowest:

1. Cross-County/Cheswolde
2. Greater Roland Park/Poplar Hill
3. Dickeyville/Franklintown
4. Beechfield/Ten Hills/West Hills
5. North Baltimore/Guilford/Homeland

Violent Crime Rate

Measures the rate of violent crimes, a subset of all Part 1 crimes, in an area.

Definition: The violent crime rate measures the number of Part 1 crimes identified as being violent (homicide, rape, aggravated assault, and robbery) that are reported to the Police Department. These incidents are per 1,000 residents in the neighborhood to allow for comparison across areas.

(SOURCE: BALTIMORE CITY POLICE DEPARTMENT, 2010, 2011, 2012, 2013, 2014, 2015; U.S. CENSUS, 2010)

Five Highest:

1. Downtown/Seton Hill
2. Upton/Druid Heights
3. Oldtown/Middle East
4. Washington Village/Pigtown
5. Orangeville/East Highlandtown

Five Lowest:

1. Cross-Country/Cheswolde
2. South Baltimore
3. Greater Roland Park/Poplar Hill
4. North Baltimore/Guilford/Homeland
5. Canton

Property Crime Rate

Measures the rate of personal property crimes, a subset of all Part 1 crimes, in an area.

Definition: The property crime rate measures the number of Part 1 crimes identified as being property-based (burglary and auto theft) that are reported to the Police Department. These incidents are per 1,000 residents in the neighborhood to allow for comparison across areas.

(SOURCE: BALTIMORE CITY POLICE DEPARTMENT, 2011, 2012, 2013, 2014, 2015; U.S. CENSUS, 2010)

Five Highest:

1. Downtown/Seton Hill
2. Harbor East/Little Italy
3. Washington Village/Pigtown
4. Southeastern
5. Highlandtown

Five Lowest:

1. Cross-Country/Cheswolde
2. Greater Roland Park/Poplar Hill
3. Dickeyville/Franklintown
4. Beechfield/Ten Hills/West Hills
5. Loch Raven

Rate of Gun-Related Homicides

Measures the gun-related homicides in an area.

Definition: The number of homicides by firearm as reported in the Part 1 crime data per 1,000 residents in an area.

(SOURCE: BALTIMORE CITY POLICE DEPARTMENT, 2011, 2012, 2013, 2014, 2015; U.S. CENSUS, 2010)

Five Highest:

1. Poppleton/The Terraces/Hollins Market
2. Greenmount East
3. Southwest Baltimore
4. Sandtown-Winchester/Harlem Park
5. Pimlico/Arlington/Hilltop

Five Lowest:

Eleven CSAs reported no gun-related homicides.

Arrests

Rate of Adult Arrests

Measures the rate of arrests for adults in an area.

Definition: The number of arrests for adults aged 18+ per 1,000 adult residents in an area. This indicator is calculated by where an individual was arrested and not by where the crime was committed. This indicator includes arrests for all charges processed at Baltimore's Central Booking & Intake Facility.

(SOURCE: BALTIMORE CITY POLICE DEPARTMENT, 2014, 2015; U.S. CENSUS, 2010)

Five Highest:

1. Downtown/Seton Hill
2. Washington Village/Pigtown
3. Southwest Baltimore
4. Clifton-Berea
5. Sandtown-Winchester/Harlem Park

Five Lowest:

1. Cross-Country/Cheswolde
2. Mount Washington/Coldspring
3. Greater Roland Park/Poplar Hill
4. Canton
5. North Baltimore/Guilford/Homeland

Specific Crime Incidents Calls for Service

Rate of Domestic Violence Calls

Measure of domestic abuse in an area.

Definition: The number of calls to emergency 911 for domestic violence per 1,000 residents in an area. Calls for service are used rather than actual crime incidents since domestic violence can be classified as one of several types of criminal offenses. It is important to also note that not every case of domestic violence is reported and some claims of abuse may be unfounded.

(SOURCE: BALTIMORE CITY POLICE DEPARTMENT, 2010, 2011, 2012; U.S. CENSUS, 2010)

Five Highest:

1. Washington Village/Pigtown
2. Downtown/Seton Hill
3. Cherry Hill
4. Madison/East End
5. Greenmount East

Five Lowest:

1. Cross-Country/Cheswolde
2. Midtown
3. North Baltimore/Guilford/Homeland
4. Greater Roland Park/Poplar Hill
5. Medfield/Hampden/Woodberry/
Remington

Rate of Shootings Calls

Measure of non-fatal shootings in an area.

Definition: The number of 911 calls for shootings per 1,000 residents in an area. Since the data comes from 911 calls, it is possible that multiple calls could be made for a single incident.

(SOURCE: BALTIMORE CITY POLICE DEPARTMENT, 2011, 2012, 2015; U.S. CENSUS, 2010)

Five Highest:

1. Downtown/Seton Hill
2. Sandtown-Winchester/Harlem Park
3. Southwest Baltimore
4. Oldtown/Middle East
5. Poppleton/The Terraces/Hollins Market

Five Lowest:

1. Greater Roland Park/Poplar Hill
2. South Baltimore
3. North Baltimore/Guilford/Homeland
4. Medfield/Hampden/Woodberry/
Remington
5. Mt. Washington/Coldspring

Rate of Common Assault Calls

Measure of common assault calls for service in an area.

Definition: The number of calls for assaults that do not involve a weapon per 1,000 residents in an area. Since the data comes from 911 calls, it is possible that multiple calls could be made for a single incident.

(SOURCE: BALTIMORE CITY POLICE DEPARTMENT, 2011, 2012, 2015; U.S. CENSUS, 2010)

Five Highest:

1. Downtown/Seton Hill
2. Washington Village/Pigtown
3. Oldtown/Middle East
4. Southwest Baltimore
5. Brooklyn/Curtis Bay/Hawkins Point

Five Lowest:

1. Greater Roland Park/Poplar Hill
2. Cross-Country/Cheswolde
3. Mt. Washington/Coldspring
4. North Baltimore/Guilford/Homeland
5. South Baltimore

Rate of Narcotics-Related Calls

Measures drug-related activity in an area.

Definition: The number of calls for narcotics per 1,000 residents in an area. Since the data comes from 911 calls, it is possible that multiple calls could be made for a single incident.

(SOURCE: BALTIMORE CITY POLICE DEPARTMENT, 2011, 2012, 2015; U.S. CENSUS, 2010)

Five Highest:

1. Pimlico/Arlington/Hilltop
2. Washington Village/Pigtown
3. Southwest Baltimore
4. Sandtown-Winchester/Harlem Park
5. Downtown/Seton Hill

Five Lowest:

1. Cross-Country/Cheswolde
2. Greater Roland Park/Poplar Hill
3. Canton
4. Mt. Washington/Coldspring
5. Inner Harbor/Federal Hill

Rate of Motor Vehicle Accident Calls

Measure of auto-accidents in an area.

Definition: The number of calls for accidents involving motor vehicles per 1,000 residents in an area. Since the data comes from 911 calls, it is possible that multiple calls could be made for a single incident. Additionally, not every accident involving a motor vehicle is reported to the Police Department.

(SOURCE: BALTIMORE CITY POLICE DEPARTMENT, 2011, 2012, 2015; U.S. CENSUS, 2010)

Five Highest:

1. Downtown/Seton Hill
2. Washington Village/Pigtown
3. Orangeville/East Highlandtown
4. Oldtown/Middle East
5. Southeastern

Five Lowest:

1. Cross-Country/Cheswolde
2. Harford/Echodale
3. North Baltimore/Guilford/Homeland
4. Cherry Hill
5. Edmondson Village

Juvenile Crime

Juvenile Arrest Rate

Measures the rate of arrests for juveniles in an area.

Definition: The number of persons aged 10 to 17 arrested per 1,000 juveniles that live in an area. This indicator is calculated by where the arrested juvenile was arrested and not by where the crime is committed. Arrests are used instead of crimes committed since not all juveniles that are arrested are charged with committing a crime.

(SOURCE: BALTIMORE CITY POLICE DEPARTMENT, 2010, 2011, 2012, 2013, 2014, 2015; U.S. CENSUS, 2010)

Five Highest:

1. Downtown/Seton Hill
2. Inner Harbor/Federal Hill
3. Midtown
4. Highlandtown
5. Greater Charles Village/Barclay

Five Lowest:

1. Cross-Country/Cheswolde
2. Dickeyville/Franklintown
3. Beechfield/Ten Hills/West Hills
4. Forest Park/Walbrook
5. Edmondson Village

Juvenile Arrest Rate for Drug-Related Offenses

Measures the juvenile arrest rates for drug-related offences in an area.

Definition: The number of persons aged 10 to 17 for drug-related offenses per 1,000 juveniles that live in an area. Drug-related offenses include arrests for possession, sale, manufacture, or abuse of illegal drugs, including alcohol. This indicator is calculated by where the arrested juvenile was arrested and not by where the crime is committed. Arrests are used instead of crimes committed since not all juveniles that are arrested are charged with committing a crime.

(SOURCE: BALTIMORE CITY POLICE DEPARTMENT, 2010, 2011, 2012, 2013, 2014, 2015; U.S. CENSUS, 2010)

Five Highest:

1. Highlandtown
2. Southwest Baltimore
3. Washington Village/Pigtown
4. Pimlico/Arlington/Hilltop
5. Downtown/Seton Hill

Five Lowest:

Thirteen CSAs did not have any juvenile arrests for drug-related offenses.

Juvenile Arrest Rate for Violent Offenses

Measure of juveniles arrests for violent offences in an area.

Definition: The number of persons aged 10 to 17 arrested for violent offenses per 1,000 juveniles that live in an area. Violent offenses may include homicide, rape, assault (with or without a weapon), and robbery. This indicator is calculated by where the arrested juvenile was arrested and not by where the crime is committed. Arrests are used instead of crimes committed since not all juveniles that are arrested are charged with committing a crime.

(SOURCE: BALTIMORE CITY POLICE DEPARTMENT, 2010, 2011, 2012, 2013, 2014, 2015; U.S. CENSUS, 2010)
