# Introduction

## About the Baltimore Neighborhood Indicators Alliance

In 1998, the Annie E. Casey Foundation approached the Association of Baltimore Area Grantmakers (ABAG) to explore the interest in Baltimore for developing a neighborhood indicators initiative. The two-year long planning process that followed brought together several citywide nonprofit organizations, city government, neighborhoods, and foundations, and led to the creation of the Baltimore Neighborhood Indicators Alliance (BNIA)—which would be dedicated to developing and maintaining a community-based data system open and accessible to all neighborhoods. In 2000, BNIA became an early partner in the Urban Institute’s National Neighborhood Indicators Partnership<sup>1</sup> (NNIP), which today is a network of organizations with similar missions in more than 36 cities across the United States. In 2006, BNIA moved to the University of Baltimore’s Jacob France Institute in an effort to expand on the capabilities of BNIA and was renamed the Baltimore Neighborhood Indicators Alliance – Jacob France Institute (BNIA-JFI).

Since 2002, BNIA-JFI has been producing the Vital Signs report annually to provide outcome indicators that “take the pulse” of Baltimore neighborhoods progress towards a better quality of life in every neighborhood. The goal of this effort is for neighborhood residents, organizations, and other stakeholders to use data and the Vital Signs report to strategically and effectively foster new ways of thinking about improving our City, neighborhoods, and government over time. In 2012, Baltimore City Council passed a resolution that endorsed the use of Vital Signs in local policy-making to “reflect the diverse conditions of neighborhoods and provide the basis for a system of tracking progress toward a shared vision” for Baltimore.<sup>2</sup> Over the years, the Vital Signs report and the resulting knowledge that is mutually gained by analyzing community-based data have served to support Baltimore City and neighborhoods.<sup>3</sup>

## The Purpose of Vital Signs

Neighborhoods, as a growing body of research shows,<sup>4</sup> have extremely durable properties based on the social, cultural, and physical realities that define places. Although

people and individuals help shape neighborhoods, their actions occur within the structural construct of history, planning, and geography. To better understand the context in which programs and actions take place, tracking the “ecometrics” of neighborhoods is necessary to assess the situation in which interventions and solutions are trying to take hold. This is precisely the purpose of tracking key quality of life measures for neighborhoods that has been the mission of BNIA-JFI for more than a decade. The community-based indicators available in Vital Signs are bits of information that generate a picture of a place and provide insight for all stakeholders, both inside and outside a neighborhood, about the overall direction of the community.

## Consequences of Neighborhood Inequality

Income inequality between the wealthiest and poorest households in the United States has been growing since the 1970’s. Public outcry over the destabilizing consequences of income disparities grew after the great recession that began in 2007, with movements such as Occupy Wall Street<sup>5</sup> that demonstrated against wealth and power

4. See, for example, Robert Sampson (2012) *Great American City* and Patrick Sharkey (2013) *Stuck in Place*.

5. New York Times (2011). “Who is Occupy Wall Street?” <https://www.nytimes.com/2011/11/13/opinion/sunday/who-is-occupy-wall-street.html>

accumulating in the hands of the top 1%. What is perhaps lesser known is that household “sorting” by income has actually contributed to an even faster-paced growth in neighborhood inequality<sup>6</sup> in almost all metropolitan areas of the country. The Baltimore metropolitan region is unfortunately no exception; between 1970 and 2008-2012, while household inequality grew by 13%, neighborhood inequality grew by 24.8%.

The causes of neighborhood inequality are varied but primarily include the rapid depopulation from Baltimore City to the surrounding counties, the coupling of educational spending on local jurisdictional revenues, and the construction and spatial distribution of housing. A 2015 study by Harvard economists<sup>7</sup> also found that long commuting times to work within neighborhoods contributed to neighborhood inequality, and in fact, was the single strongest factor affecting the odds of escaping poverty.

Differences by neighborhood are most dramatically evident in the ultimate quality of life indicator: life expectancy. Unfortunately, racial disparities in life expectancy exist. In 2016, there was a 5-year gap in life expectancy between white (76.6) and black (71.6) Baltimoreans.<sup>8</sup> While race accounts for much of this difference, the spatial disparities among neighborhoods with similar racial make-up are even more stark. Take for example two sets of neighborhoods that are about the same percentage white and black, respectively. There can be as much as a 10-year difference among neighborhoods in different parts of Baltimore that are similar in one indicator such as race.

Based on more than a decade of research<sup>9</sup> on Baltimore’s neighborhoods, the work of BNIA-JFI has shown that to achieve a more equitable and just city overall, disparities among neighborhoods themselves must be addressed and eliminated. In the wake of the civil unrest that occurred in Baltimore in 2015, there is a critical urgency to ensure that all of Baltimore’s policies and programs not only remove barriers for people, but also promote equity across all neighborhoods by focusing on 3 outcomes: 1) housing diversity and affordability; 2) building occupancy and

## Life Expectancy in Select Baltimore CSAs, 2016

SOURCE: BALTIMORE CITY HEALTH DEPARTMENT

vacancy; and 3) neighborhood accessibility and mobility. To aid in the local discourse on the conditions of Baltimore’s neighborhoods, BNIA-JFI has identified the key indicators that all communities should track to help achieve these three goals.

### I. Increase housing diversity and affordability in every neighborhood

The most stable housing markets the Baltimore region are characterized by housing diversity and have moderate use of housing choice vouchers. However, only 1 in 4 households who are income-eligible for a housing voucher receive one; in Baltimore, while more than 15,000 households have access to a housing voucher, more than 25,000 households are on a waiting list. Providing more realistic housing options for a range of household incomes in Baltimore’s most stressed communities as well as its strongest markets will increase housing diversity in every neighborhood. Ultimately, housing diversity matters because the strength of the housing market is correlated with better educational outcomes for children.

## Introduction

Key Indicators to Track Goal	Baltimore City in Vital Signs 16
Percent of Housing Units that are Owner Occupied	54.9%
Affordability Index – Spending more than 30% of Income on Rent	50.2%
Rate of Housing Vouchers per 1,000 Rental Units	124.6

## 2. Reduce or maintain vacant and abandoned housing below 4% in every neighborhood

When a community loses population, the most evident result is the increase in vacant and abandoned housing. These buildings represent the physical vestiges of population decline, and their negative consequences rest on the shoulders of the people who currently deal with that loss every single day. Based on the experience in Baltimore neighborhoods, nearly all communities that grew between 2000 and 2010 had vacancy rates at or below 4%. Homes that are habitable but still do not have anyone living in them are less obvious from appearance alone, but are a growing concern for many neighborhoods.

Key Indicators to Track Goal	Baltimore City in Vital Signs 16
Percentage of Residential Properties that are Vacant and Abandoned	8.0%
Percent of Residential Properties that Do Not Receive Mail	58.2%

## 3. Reduce the percentage of households traveling more than 45 minutes to get to work

The impact of long commute times on urban neighborhoods is highly detrimental to population growth. A successfully employed resident is either more likely to move out of the neighborhood to be closer to a job or will not be able keep a job, remaining in the neighborhood unemployed. Neither outcome contributes to the quality of life in the neighborhood itself.

Key Indicators to Track Goal	Baltimore City in Vital Signs 16
Percent of Employed Population with Travel Time to Work of 45 Minutes and Over	20.5%

## What's New in Vital Signs 16?

Beyond the key indicators identified above, this edition of Vital Signs tracks over 100 indicators on the quality of life in Baltimore's neighborhoods. These indicators, when combined into each community's profile, generate a picture of what is happening in each neighborhood. From home prices to crime rates to clogged storm drains, the indicators in Vital Signs corroborate (or dispel) perceptions of residents, business and other stakeholders about the quality of life in Baltimore's neighborhoods. As communities continue to plan ahead over the next decade, these indicators can now be used as inputs into strategic planning processes as well as tracking and monitoring the effectiveness of neighborhood-based activities.

### Baltimore's Housing Market

In a city that appears to have an oversupply of building stock, that fact that many households struggle to find secure, stable housing in Baltimore may seem surprising. Part of the problem is the result of several years of discriminatory housing policies that led to the deferred maintenance of housing in many neighborhoods and today has resulted in significant number of properties that are vacant, abandoned and uninhabitable.<sup>11</sup> For the remaining housing units, both the for-sale and rental housing markets present barriers to residents. On the one hand, Baltimore has the lowest for-sale housing prices in the metropolitan region; however, even though home prices in many neighborhoods are modest, access to capital is difficult as banks find it less profitable to lend in these markets.<sup>12</sup>

On the other hand, Baltimore has some of the highest housing rental rates among comparable cities. For Baltimore's approximately 50% of renter households, more than half are paying in excess of 30% of their income on rent. Vital Signs 16 does provide some positive news about increases to the habitable supply of housing in Baltimore.

12. "Middle Neighborhoods: Action Agenda for a National Movement" Summary Report Prepared by Paul C. Brophy, Pamela Puchalski, and Stephanie Sung (2017). <http://middleneighborhoods.org/summary-report/>

## Introduction

- Between 2015 and 2016, the percentage of homes receiving a vacant house notice in Baltimore City decreased from 8.2% to 8.0%. The CSAs with the largest decreases in vacant and abandoned housing were Oldtown/Middle East (-8.5%) and Sandtown-Winchester/Harlem Park (-5.5%). The decrease in vacancy in Sandtown-Winchester/Harlem Park marks the first reduction for the community since Vital Signs began tracking this indicator in 2000.
- Between 2015 and 2016, the percentage of residential properties with rehabilitation permits in excess of \$5,000 in Baltimore increased from 2.9% to 3.2%. The CSAs that experienced the largest increases in the rate of rehabilitation permits were Highlandtown (+2.1%) and Forest Park/Walbrook (+2.0%).

### Neighborhood-Focused Economic Development

In 2016, newly-elected Mayor Catherine Pugh identified workforce development and business expansion as one of five key focus areas for her administration. Neighborhood employment data from the Vital Signs report served as a catalyst for Mayor Pugh's initiative to create the Baltimore Mobile Job units to travel to communities with high rates of unemployment and offer assistance to residents seeking work. Early indications exist of the effectiveness of this neighborhood-focused effort as unemployment rate in Baltimore City dropped from 7% in January of 2016 to 5.8% in December 2016.

- The total number of jobs in Baltimore City increased from 344,588 to 350,797 between 2014 and 2015 (the latest year available). In 2015, the communities with the highest number of jobs were Downtown/Seton Hill (78,158), Oldtown/ Middle East (27,354), and Orangeville/East Highlandtown (15,235).

### Tracking Violence Reduction Using Open Data

As in other cities around the country that experienced significant civil unrest in protest to concerns over police misconduct in communities, a U.S. Department of Justice investigation concluded in August 2016 that Baltimore City had violated federal anti-discrimination laws as well as multiple Constitutional Amendments by conducting unlawful searches, arrests, unreasonable force, and racial targeting. A consent decree was issued for Baltimore City, laying out reforms for the department, ending "zero toler-

### Total Number of Jobs in Baltimore City 2011-2015

SOURCE: LONGITUDINAL EMPLOYER-HOUSEHOLD DYNAMICS (LEHD)

ance" policing strategies in favor of a more community-oriented approach with greater accountability and oversight.

Now more than ever, having access to reliable, consistent data is crucial for accountability, community goalsetting, and measuring progress towards a city that is safe and just.

- Baltimore City experienced 318 homicides in 2016, a decrease from the 342 reported in 2015. In 2016, over 86% of the deaths were a result of a shooting. In 2016, there were 1,916 calls for shootings in Baltimore City for a rate of 1.9 reports per 1,000 residents. This is a decrease from 3.2 per 1,000 in 2015.
- The overall Part I crime rate in Baltimore City decreased between 2015 and 2016, from 65.1 offenses per 1,000 residents to 63.0 offenses per 1,000 residents.

### New indicator in Crime and Safety:

Examining communities that have high, persistent rates of 311-calls for street light outages is crucial, as these areas may have increased levels of victimization, as darkness can provide a cover for a variety of both property and violent offenses. In 2016, Baltimore City's rate of street light outages was 21.4 reports per 1,000 residents. The communities with the highest rates of reports calls per 1,000 residents include Washington Village/Pigtown (45.4), Downtown/Seton Hill (41.7), Poppleton/The Terraces/Hollins Market (35.8), and The Waverlies (35.3).

## Introduction

### A New Sustainability Plan for Baltimore

Baltimore launched a process to update the City’s Sustainability Plan between 2016 and 2018 that broadens the definition of what sustainability means by focusing greater attention to issues of equity and inclusion. Baltimore’s new plan acknowledges that “We all benefit from robust neighborhoods and thriving societies. The more equitable our city, the more sustainable we all are.” At the center of all aspects of sustainability lies the various mobility choices that exist in Baltimore that provide the means for everyone to have access to different parts of the city and region. Although Baltimore has made great strides in expanding mobility choices such as the Charm City Circulator, and car- and bike-sharing opportunities, according to the Central Maryland Transportation Alliance, the region received a “D” in the latest Transportation Report Card.<sup>13</sup> One of the worst-graded indicators in the report card was regarding “disconnected communities” – neighborhoods with high rates of households with long commute times to work.

Based on data from the 2012 - 2016 American Community Survey, a significant percentage of Baltimore commuters use alternative modes of transportation to get to work; however, travel times to work have increased between 2006-2010 and 2012-2016.

- Based on the 2012-2016 American Community Survey, 18.4% of Baltimore City residents used public transportation to commute to work, 6.7% of Baltimore City residents walked to work, and 59.8% of Baltimore City residents drove alone to work.
- From 2006-2010 to 2012-2016, the percentage of city residents commuting to work with a commute greater than 45 minutes increased slightly from 19.0% to 20.5%. During 2012-2016, the percentage of residents with a commute greater than 45 minutes ranged from a high of 33.9% in Sandtown-Winchester/Harlem Park to a low of 11.3% in Inner Harbor/Federal Hill.

### Data Stories

Every data point in Vital Signs represents a human story—of why the data exists in the first place and how people and organizations are working to move the needle on any one of the indicators. Several Baltimore community and non-profit groups, research organizations, and local government agencies provided data stories to take a deeper look at an indicator and help frame the context for

why specific indicators matter for quality of life in neighborhoods. Vital Signs 15 includes the following stories:

- **Deconstruction of Vacant Properties (Housing and Community Development).** Deconstruction is a labor intensive method for building removal which emphasizes the salvaging of materials which can be sold. In 2016, Details, Inc. worked with the City of Baltimore for the deconstruction of 98 buildings. Story written by Details, Inc., a Social Enterprise of Humanim.
- **Preventing Teen Pregnancy (Children and Family Health).** In 2010, B’more for Healthy Babies established the Teen Pregnancy Prevention Initiative (known as U Choose), a multi-agency task force committed to reducing unintended teen pregnancies. U Choose’s work for the last eight years to improve outcomes for young people resulted in a 49% reduction of teen births. Story written by the Baltimore City Health Department.
- **Small Business Access to Capital (Workforce and Economic Development).** Cultivation of a vibrant and growing startup and small business scene is a top priority for a range of public and private stakeholders in Baltimore. The Johns Hopkins 21st Century Cities Initiative researched the flows of various types of investment into Baltimore City’s small businesses and revealed some expected and unexpected patterns of small business investment across the city’s communities. Story written by the Johns Hopkins 21st Century Cities Initiative.
- **Ensuring Kindergarten Readiness (Education and Youth).** The Kindergarten Readiness Assessment (KRA) is administered to students early in their kindergarten year. The KRA assesses children’s readiness for kindergarten in the areas of language and literacy, mathematics, social foundations, and physical development. Story written by the Baltimore City Public School System.
- **Safe Streets Baltimore (Crime and Safety).** Safe Streets Baltimore is an interdisciplinary program with a primary focus on reducing gun homicides. Its data-driven model allows staff to focus resources into violence interventions on the street as well and emphasizes the need to view and treat violence through a public health lens. Story by the Mayor’s Office of Criminal Justice.
- **Planning for a More Sustainable, Equitable Baltimore (Sustainability).** In 2018, Baltimore City released a new, updated Sustainability Plan which significantly broadens the meaning of sustainability in two ways. First, it

13. For more information on the Transportation Report Card, visit <http://www.cmtalliance.org/reportcard/>

## Introduction

more intentionally integrates an equity lens—to incorporate a vision that is meaningful for ALL residents in the city. Second, the Plan expands the boundaries of sustainability to include strategies connected to good-paying local jobs, health and well-being. Story written by the Baltimore City Office of Sustainability.

Also in the past year, BNIA-JFI's primary research has produces information actionable at the neighborhood level. The following Data Stories by our staff helps coordinate the incorporation of the research results along with other indicators in Vital Signs:

- **Mapping Arts and Culture (Arts and Culture).** The GEOLOOM co-map is an online, interactive map that displays a broad range of arts and culture collected from crowdsourcing, neighborhood groups, arts and culture organizations, foundations, and city government data sets. The map demonstrates how arts and culture is an intrinsic part of every community as well as identifies disparities in support for arts and culture. Story written by the Baltimore Neighborhood Indicators Alliance.
- **Population Change by Neighborhood (Census Demographics):** By segmenting neighborhoods by population change first (growing, stable/stagnant, declining), communities can work together to better sequence how strategies can be implemented to address the root causes of many other community-based issues. Story written by the Baltimore Neighborhood Indicators Alliance.

### How to Use Vital Signs Data

The indicators available in Vital Signs have been chosen based on national trends, academic research on community-based indicators, local planning processes, and ongoing community engagement to ensure that the overall set of indicators is relevant to Baltimore's communities.

- **National best practices:** Through the NNIP network, BNIA-JFI is connected to 36 other cities for learning and staying ahead of the curve regarding research and development of neighborhood based data-driven initiatives. BNIA-JFI is committed to transforming data for policy-relevance and enhancing access to the data through technical assistance and online functionality.<sup>14</sup>
- **Local planning processes:** Several local and regional plans over the past decade have included specific indicators to monitor the effectiveness of plan implementation, such as the City's Comprehensive Economic Development Strategy, Sustainability Plan, and the regional Opportunity Collaborative Regional Plan for Sustainable Development. The Vital Signs indicators are intended to serve as a means of tracking and evaluating the relevant neighborhood impacts of these city and regional plans.
- **Grant-writing resources:** Community-based organizations and non-profits rely on Vital Signs data to help make a data-driven case for leveraging resources into their neighborhoods. Analysis of grant applications for programs such as Community Development Block Grant, Association of Baltimore Area Grantmakers Common Grant, and Maryland Sustainable Communities Grant identified several indicators that organizations require for satisfying basic data requirements for community-based funding.

14. For more information on transforming data into useful information, see "What Counts: Harnessing Data for America's Communities" edited by the Federal Reserve Bank of San Francisco and the Urban Institute (2014).

## Introduction

Every attempt is made to ensure that the indicators in Vital Signs are both available from the public agency that might be supplying the data and consistent<sup>15</sup> from one time period to the next. Continuous monitoring of quality of life for Baltimore's neighborhoods provides communities the chance to take immediate, hopefully preventative, measures to address issues that arise in their neighborhood.

The *Vital Signs* report and the compendium of data available longitudinally for Baltimore's neighborhoods is more than just a once-a-year presentation of information.<sup>16</sup> The release of *Vital Signs 16* marks the beginning or continuation of diverse, cross-sector conversations throughout Baltimore on how to transform these data into the means for improving the quality of life in every neighborhood. The indicators and data in Vital Signs are organized into eight sections each of which describes an issue or area that is central to quality of life in Baltimore City. The data within each of the following sections provide a picture of the conditions within Baltimore City's neighborhoods and their progress over time:

- Census Demographics;
- Housing and Community Development;
- Children and Family Health;
- Crime and Safety;
- Workforce and Economic Development;
- Education and Youth;
- Arts and Culture; and
- Sustainability;

Data within each of these sections are divided into additional subsections that allow for indicators to be clustered together around specific topics, such as housing conditions or safe neighborhoods, educational attainment, or student performance.

Vital Signs is a compilation of a large amount of data from a wide range of sources. There are over 150 indicators for each of Baltimore City's 55 community statistical areas (CSA), which means that there are over 8,000 data points in Vital Signs 16. Interesting facts and trends, graphics and community rankings are all included in the sections. Positive, neutral or negative changes over time are highlighted in green, blue or red respectively throughout the

sections for easy interpretation of the data. Each chapter in Vital Signs also includes a Rankings & Definitions section, which lists the five highest and lowest communities by their value for each indicator. With so much information in this report, it has been produced in a way that should serve as a reference guide to communities throughout the year.

Vital Signs is also 'open data'<sup>17</sup>. All of the indicators from previous Vital Signs are online<sup>18</sup> for everyone to see and download for use in a variety of innovative ways. Policy makers use the data to provide context and neighborhood interdependences across indicators. The data are used by neighborhood groups as well through Community Profiles for each of the City's 55 Communities which are available online for quick access to data specific to each neighborhood's needs.

### Take Action

1. **Download Your Profile: BNIA-JFI produces 55 Community Profiles, one for each CSA in Baltimore**
2. **Put it on Your Agenda: Encourage your community association (formal or informal!) to discuss the indicators in the community profile at their next meeting agenda**
3. **What's in Your Profile? Join the conversation across the City to reflect on what you see. Any interesting trends? Any surprises? Let BNIA-JFI know on Facebook or Twitter @bniajfi #VitalSigns16**

15. For specific changes to indicator definitions and calculations, see Changes & Explanations section of *Vital Signs 16*

## Introduction

### Geography and Data

The geographic level at which data is provided is important to understand. Wherever possible, Vital Signs uses Community Statistical Areas (CSAs) as the geographic level for which data is provided. CSAs are clusters of Census Tracts that correspond to Baltimore's neighborhoods boundaries and are consistent statistical boundaries

for which data can be acquired. Neighborhood lines often do not fall along CSA boundaries, but CSAs are representations of the conditions occurring within those particular neighborhoods. The CSAs were originally created in 2002 and were revised for Vital Signs 10 using new 2010 Census Tract boundaries.

# Census Demographics

For this chapter of the *Vital Signs* report, the main source of demographic and socioeconomic data about the people who live in Baltimore's neighborhoods comes from the United States Bureau of the Census. The Census Bureau collects a wide variety of information through the decennial Census as well as the continuous administration of the American Community Survey (ACS).

In 2010, the Census administered the latest decennial Census which was used to collect detailed information on all residents of the United States. Starting with the 2010 Census, only the short-form Census with just 10 questions was administered to all households. For more detailed information on residents, the Census Bureau administers the ACS which is an ongoing, continuous survey of a sample of residents in all census tracts. The main benefit of the ACS is the ability to access data for small areas of the City of Baltimore more frequently than once every 10 years.<sup>1</sup>

Because information at the community level is averaged over 5-years of data collection, comparisons across time can only be made with non-overlapping years. Even though ACS data is released annually, year-over-year comparisons cannot be made directly since four of the five years in each time period overlap.<sup>2</sup> However, with the latest release of data from the 2012-2016 ACS, comparisons can be made with either the 2010 Census or the 2006-2010 ACS, which was the first set of ACS data reported in *Vital Signs*.<sup>3</sup>

The socioeconomic and demographic indicators in *Vital Signs* are grouped into the following categories: population, race/ethnicity, age, households, and income and poverty. Population and household counts continue to use the 2010 Census<sup>4</sup> since these are based on the full enumeration of the City's population and are frequently used throughout *Vital Signs* as denominators for normalizing many other indicators and rates.

## Data Key

**Green colored text** denotes a positive change.

**Red colored text** denotes a negative change.

**Blue colored text** denotes a neutral change.

## Population

The total population of a neighborhood is the most important indicator in *Vital Signs* (see Data Story). The Community Statistical Areas (CSAs) that are used to report *Vital Signs* data are aggregations of census tracts that represent neighborhoods. Since the CSAs vary by population size, many indicators are normalized by population so that rates and percentages can be compared uniformly. Based on the 2010 Census, the **largest** CSAs in terms of population size are Cedonia/Frankford (23,557), Greater Rosemont (19,259), and Southwest Baltimore (17,885). The **smallest** CSAs are Dickeyville/Franklintown (4,101), Poppleton/The Terraces/Hollins Market (5,086), and Mt. Washington/Coldspring (5,168). These also are the **highest** and **lowest** CSAs with respect to total male population.

Total female population is **highest** in Cedonia/Frankford, Greater Rosemont, and Belair-Edison and **lowest** in Dickeyville/Franklintown, Poppleton/The Terraces/Hollins Market, and Washington Village/Pigtown.

## Households

Similar to population size, the CSAs vary by total number of households, and some indicators are normalized by households so that rates and percentages can be compared uniformly. CSAs, in terms of number of households, are not the same as the ones for population size, since households can range from a single person to large families. Based on the 2010 Census, the **largest** CSAs in terms of number of households are Cedonia/Frankford (9,348), Midtown (9,078), and Medfield/Hampden/Woodberry/Remington (8,289). The **smallest** CSAs are Dickeyville/Franklintown (1,877), Poppleton/The Terraces/Hollins Market (2,181), and Washington Village/Pigtown (2,273).

# Data Story: Population Change, The Most Important Indicator for Understanding Urban Neighborhoods

The annual release of the *Vital Signs* report provides more than 100 community indicators reflecting the quality of life in Baltimore's neighborhoods. However, in a city that had been "built-out" by the 1950s in terms of its size and geographic boundaries, how many people move in or move out is at the root of many issues at the neighborhood level. Using this one measure (the change in total population at the neighborhood level over two points in time), neighborhoods can be segmented into three main types of places, which lies at the heart of the kind of experience residents, businesses, and other stakeholders are having.

The first type is when population change is above average and growth is happening in a way that feels too fast for the existing residents. The second type is when the population remains relatively stable, which means that as people move out, there are households and businesses that move into their place. The third type is the neighborhood that is declining in population; as people naturally move out, there is no one choosing to occupy their place.

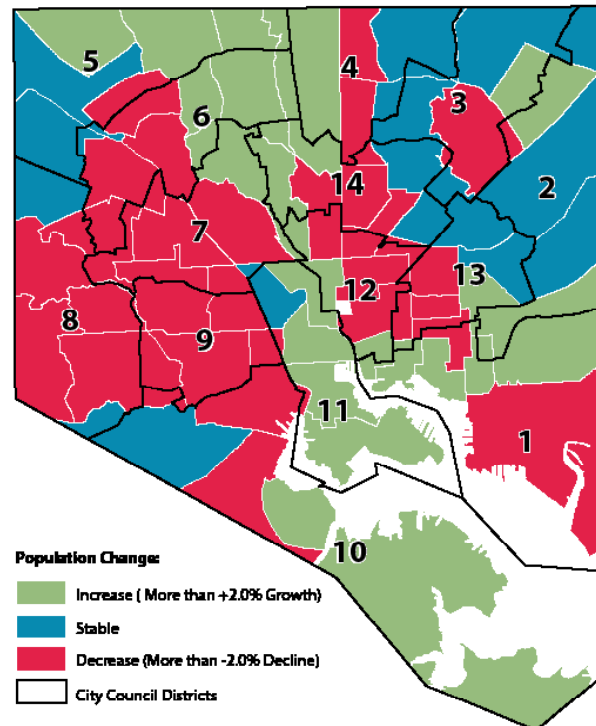

By segmenting neighborhoods by population change first (growing, stable/stagnant, declining), communities can work together to better sequence how strategies can be implemented to address the root causes of many other communi-

ty-based issues. In neighborhoods experiencing above-average growth, what policies does the city have in place to preserve affordable housing before housing prices rise? In declining neighborhoods, how can the quality of life be improved so that unoccupied homes can be inhabited and critical retail stores like food establishments or storefront banks choose to locate in the neighborhood?

All three types of neighborhoods exist in every city; even shrinking cities have growing neighborhoods for example. Even within a city, all three types of neighborhoods exist in every political district (See below). For elected officials representing those districts, the constituencies in these varying geographies have different experiences based on the type of neighborhood they live in. Finding common ground across districts by these neighborhood experiences is critical to ensuring every community in Baltimore can continuously attract new residents and businesses.

By the Baltimore Neighborhood Indicators Alliance—Jacob France Institute

**Population Change in  
Baltimore City by CSA, 2000-2010**

## Census Demographics

In 2010, the City's average household size is 2.4 persons with CSAs ranging from a **high** of 3.3 persons per household in Madison/East End to a **low** of 1.6 in Downtown/Seton Hill. These same CSAs correspond to the **highest** and **lowest** percentage of households with children under 18 years old (51.0% in Madison/East End and 8.6% in Downtown/Seton Hill).

**Households with Children**

During 2012-2016, the CSAs with the **highest** percentage of households with children were Westport/Mt. Winans/Lakeland (41.1%), Madison/East End (40.9%), and Cherry Hill (40.1%). The CSAs with the **lowest** percentage were Midtown (5.7%), and Downtown/Seton Hill (6.2%).

Between 2010 and 2012-2016, the percentage of households with children under 18 **declined** by 2.3%, from 28.4% to 26.1%. During that time period, the CSAs that experienced the largest **decreases** in the percentage of households with children were Midway/Coldstream (-12.4%), Madison/East End (-10.1%), and Howard Park/West Arlington (-10.0%). The CSAs with the largest **increases** in the percentage of households were Orangeville/East Highlandtown (+4.0%) and Mt. Washington/Coldspring (+3.0%).

**Female-Headed Households with Children**

During 2012-2016, the CSAs with the **highest** percentage of households with children under 18 that were female-headed were Oldtown/Middle East (91.8%) and Poppleton/The Terraces/Hollins Market (87.2%). The CSAs with the **lowest** percentage were Canton (9.1%) and Highlandtown (10.8%).

Between 2010 and 2012-2016, the percentage of households with children under 18 that were female-headed **declined** by 2.3%, from 54.9% to 52.6%. During that time period, the CSAs that experienced the largest **decreases** in the percentage of households with children that were female-headed were Highlandtown (-21.6%), Howard Park/West Arlington (-15.4%), and Patterson Park North & East (-14.3%). The CSAs with the largest **increases** in the percentage of households with children that were female-headed were Midway/Coldstream (+17.1%) and Poppleton/The Terraces/Hollins Market (+12.4%).

**Race (Non-Hispanic)**

The Census asks two separate questions for respondents to identify race (white, black, Asian, 2 or more, or other) and ethnicity (Hispanic or Non-Hispanic).

*Vital Signs 16* reports race for non-Hispanic persons separately from Hispanic population by CSA.

**Black/African-American**

During 2012-2016, the CSAs with the **highest** percentage of non-Hispanic Black/African-Americans were Greater Rosemont (96.6%), Sandtown-Winchester/Harlem Park (96.2%), and Edmondson Village (95.9%).

Between 2010 and 2012-2016, the percentage non-Hispanic Black/African-American population in Baltimore **declined** by 1.4% from 63.8% to 62.4%. The CSAs with the largest **decreases** in the percentage non-Hispanic Black/African-American population were Downtown/Seton Hill (-7.2%), Patterson Park North & East (-6.8%), and Dickeyville/Franklinton (-6.5%). The CSAs with the largest **increases** in the percentage non-Hispanic Black/African-American population were Washington Village/Pigtown (+11.1%) and Southeastern (+7.7%).

**White**

During 2012-2016, the CSAs with the **highest** percentage non-Hispanic White population were South Baltimore (89.7%), Canton (86.5%), and Greater Roland Park/Poplar Hill (78.3%).

Between 2010 and 2012-2016, the percentage non-Hispanic White population in Baltimore **declined** from 28.3% to 27.7%. The CSAs with the largest **decreases** in the percentage non-Hispanic White population were North Baltimore/Guilford/Homeland (-9.4%), Morrell Park/Violetteville and Orangeville/East Highlandtown (-8.1%). The CSAs with the largest **increases** in the percentage non-Hispanic White population were Patterson Park North & East (+11.9%) and Fells Point (+5.3%).

**Asian**

During 2012-2016, the CSAs with the **highest** percentage Asian population were Downtown/Seton Hill (14.5%), Greater Charles Village/Barclay (13.2%), and Greater Roland Park/Poplar Hill (7.8%).

Between 2010 and 2012-2016, the percentage Asian population in Baltimore **increased** slightly from 2.3% to 2.5%. The CSAs with the largest **increases** in the percentage Asian population were Cedonia/Frankford (+2.0%) and Medfield/Hampden/Woodberry and Westport/Mount Winans/Lakeland (+1.9%). The CSAs with the largest **decreases** in the percentage Asian population were Washington

## Census Demographics

Village/Pigtown (-3.1%) and Greater Roland Park/Poplar Hill (-2.1%).

### Ethnicity and Diversity

#### Hispanic

During 2012-2016, the CSAs with the **highest** percentage Hispanic population were Orangeville/East Highlandtown (35.1%), Southeastern (23.3%), and Patterson Park North & East (17.1%).

Between 2010 and 2012-2016, the Hispanic population in Baltimore increased from 4.2% to 4.8%. The CSAs with the largest **increases** in the Hispanic population were Madison/East End (+5.4%) and Orangeville/East Highlandtown (+4.7%). The CSAs with the largest **decreases** in the Hispanic population were Westport/Mount Winans/Lakeland (-8.8%) and Fells Point (-4.6%).

#### Racial Diversity Index

In order to measure overall diversity across all communities, *Vital Signs* includes the racial diversity index, which measures the chance of choosing two people at random in a neighborhood and each being a different race or ethnicity. Although Baltimore has a history of segregated neighborhoods, by 2012-2016, six out of the City's 55 CSAs had a racial and ethnic compositions with no majority one race.

Between 2010 and 2012-2016, Baltimore's overall racial diversity index **increased** slightly from 54.5 to 55.5.

During 2012-2016, the CSAs with the **greatest** racial diversity were Orangeville/East Highlandtown (78.3), Southeastern (76.3), and Brooklyn/Curtis Bay/Hawkins Point (71.5). The CSAs with the **lowest** racial diversity were Greater Rosemont (7.0) and Sandtown-Winchester/Harlem Park (7.7).

### Age

Population age groups in *Vital Signs* reflect general "life cycle" ranges from under 5 years old, school-age, college-age, working-age, and seniors. Age ranges were compared over time between the 2010 Census and the 2012-2016 American Community Survey.

#### Under 5 Years Old

From 2010 to 2012-2016, the percentage of the population under 5 years old **increased** in Baltimore from 6.6% to 6.7%.

During 2012-2016, the CSAs with the **highest** percentage of the population under 5 years old were Dickeyville/Franklinton (12.0%) and Orangeville/East Highlandtown

(11.8%). The CSAs with the lowest percentage were Downtown/Seton Hill (2.1%) and Midtown (2.4%).

#### 5 to 17 Years Old

From 2010 to 2012-2016, the percentage of the population 5 to 17 years old **decreased** slightly in Baltimore from 14.9% to 14.5%.

During 2012-2016, the CSAs with the **highest** percentage population 5 to 17 years old were Cherry Hill (26.6%) and Belair-Edison (22.7%). The CSAs with the **lowest** percentage were Canton (2.9%) and Midtown (3.6%).

#### 18 to 24 Years Old

From 2010 to 2012-2016, the percentage of the population 18 to 24 years old **decreased** in Baltimore from 12.6% to 10.9%.

During 2012-2016, the CSAs with the **highest** percentage population 18 to 24 years old were Greater Charles Village/Barclay (30.1%) and Northwood (27.0%). The CSAs with the **lowest** percentage were Mount Washington/Coldspring (2.9%) and Morrell Park/Violetville (5.1%).

#### 25 to 64 Years Old

From 2010 to 2012-2016, the percentage of the population 25 to 64 years old **increased** in Baltimore from 54.2% to 55.7%.

During 2012-2016, the CSAs with the **highest** percentage population 25 to 64 years old were Fells Point (77.2%) and South Baltimore (76.1%). The CSAs with the lowest percentage were Northwood (42.1%) and Cross-Country/Cheswolde (43.6%).

#### 65 Years Old or Older

From 2010 to 2012-2016, the percentage of the population 65 years old or older **increased** slightly in Baltimore from 11.7% to 12.3%.

During 2012-2016, the CSAs with the **highest** percentage population 65 years old or older were Howard Park/West Arlington (24.9%) and Greater Roland Park/Poplar Hill (21.3%). The CSAs with the **lowest** percentage were Downtown/Seton Hill (4.7%) and Brooklyn/Curtis Bay/Hawkins Point (5.8%).

### Income and Poverty

#### Median Household Income

During 2012-2016, the CSA with the **greatest** median household income was Greater Roland Park/Poplar Hill (\$105,555) and the **lowest** is Oldtown/Middle East (\$14,417).

## Census Demographics

Adjusting for inflation, the median household income in Baltimore increased from \$42,213 from 2006-2010 to \$44,262 from 2012-2016. The CSAs that experienced the greatest **increases** in median household income were South Baltimore (+\$32,665), Canton (+\$21,065) and Fells Point (+\$17,075). The CSAs that experienced the greatest **decreases** in median household income were Washington Village/Pigtown (-\$17,151) and Mt. Washington/Cold-spring (-\$9,788).

#### Households Earning Less than \$25,000

During 2012-2016, roughly a third (31.1%) of the City's households earn less than \$25,000 annually. The CSAs with the **greatest** percentage of households earning less than \$25,000 annually include Oldtown/Middle East (62.4%), Upton/Druid Heights (58.7%), and Poppleton/The Terraces/Hollins Market (57.3%).

#### Households Earning More than \$75,000

During 2012-2016, slightly more than a quarter (28.5%) of households in Baltimore City earn more than \$75,000 annually. The CSAs with the **greatest** percentage of households earning more than \$75,000 annually include South Baltimore (67.6%), Canton (66.1%), and Greater Roland Park/Poplar Hill (62.0%).

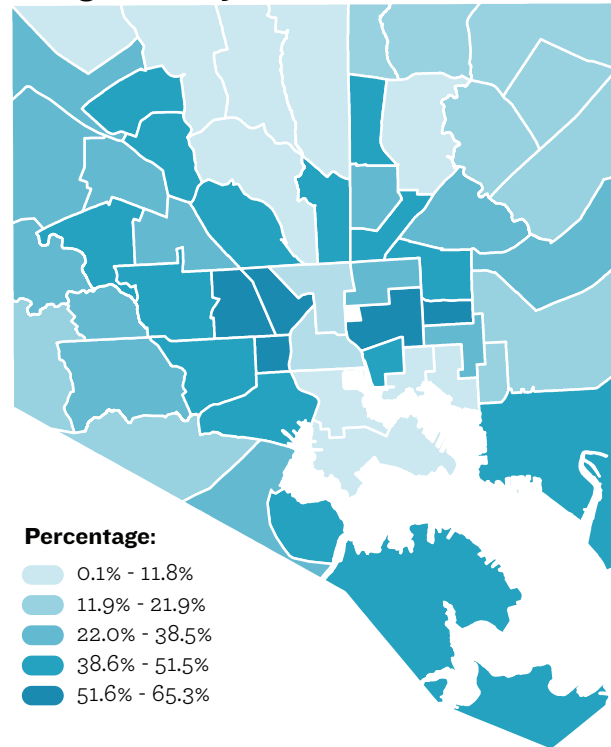

#### Family Households Living Below the Poverty Line<sup>1</sup>

During 2012-2016, 18.3% of family households in Baltimore City were living below the poverty line. The CSAs with the **greatest** percentage of families in poverty included Poppleton/The Terraces/Hollins Market (47.7%) and Upton/Druid Heights (44.2%).

#### Children Living Below the Poverty Line

During 2012-2016, 33.3% of children in Baltimore City lived below the poverty line. The CSAs with the **greatest** percentage of children living in poverty included Poppleton/The Terraces/Hollins Market (65.3%) and Upton/Druid Heights (63.7%).

#### Percentage of Children Living in Poverty, 2012-2016

## Census Demographics

### Indicator Definitions and Rankings

For each indicator reported in *Vital Signs 16*, we provide the data source, the years for which it is reported, and the five CSAs with the highest and lowest values for the indicator; these may not correspond to positive or negative trends.

#### Population

##### Total Population

Measure of persons living in an area.

Definition: The total number of persons of all ages that live within an area. This indicator is frequently used to normalize data to allow for comparison across areas. (SOURCE: U.S. CENSUS BUREAU, 2010)

##### Five Highest:

1. Cedonia/Frankford
2. Greater Rosemont
3. Southwest Baltimore
4. North Baltimore/  
Guilford/Homeland
5. Belair-Edison

##### Five Lowest:

1. Dickeyville/  
Franklinton
2. Poppleton/The Terraces/  
Hollins Market
3. Mt. Washington/  
Coldspring
4. Harbor East/Little Italy
5. Washington  
Village/Pigtown

##### Total Female Population

Measure of females living in an area.

Definition: The total number of women of all ages that live within an area. (SOURCE: U.S. CENSUS BUREAU, 2010)

##### Five Highest:

1. Cedonia/Frankford
2. Greater Rosemont
3. Belair-Edison
4. North Baltimore/  
Guilford/Homeland
5. Southwest Baltimore

##### Five Lowest:

1. Dickeyville/  
Franklinton
2. Poppleton/The Terraces/  
Hollins Market
3. Washington  
Village/Pigtown
4. Harbor East/Little Italy
5. Mt. Washington/  
Coldspring

##### Total Male Population

Measure of males living in an area.

Definition: The total number of men of all ages of all ages that live within an area. (SOURCE: U.S. CENSUS BUREAU, 2010)

##### Five Highest:

1. Cedonia/Frankford
2. Greater Rosemont
3. Southwest Baltimore
4. Greater Charles  
Village/Barclay
5. Medfield/Hampden/  
Woodberry

##### Five Lowest:

1. Dickeyville/  
Franklinton
2. Mt. Washington/  
Coldspring
3. Poppleton/The  
Terraces/Hollins Market
4. Harbor East/Little Italy
5. Washington  
Village/Pigtown

## Non-Hispanic Race/Ethnicity/Diversity

### Black/African American

Measure of non-Hispanic African American persons living in an area.

Definition: The total number of persons that identify themselves as being racially Black or African American (and ethnically non-Hispanic) out of the total number of persons living in an area. “Black or African American” refers to a person having origins in any of the Black racial groups of Africa. It includes people who indicated their race as “Black.” (SOURCE: AMERICAN COMMUNITY SURVEY, 2012-2016)

#### Five Highest:

1. Greater Rosemont
2. Sandtown-Winchester/  
Harlem Park
3. Edmondson Village
4. Dorchester/Ashburton
5. Pimlico/Arlington/  
Hilltop

#### Five Lowest:

1. South Baltimore
2. Canton
3. Fells Point
4. Greater Roland  
Park/Poplar Hill
5. Highlandtown

### Non-Hispanic Asian

Measure of Asian persons living in an area.

Definition: The total number of persons that identify themselves as being Asian (and non-Hispanic) out of the total number of persons living in an area. “Asian” refers to a person having origins in any of the original peoples of the Far East, Southeast Asia, or the Indian subcontinent, including, for example, Cambodia, China, India, Japan, Korea, Malaysia, Pakistan, the Philippine Islands, Thailand, and Vietnam. (SOURCE: AMERICAN COMMUNITY SURVEY, 2012-2016)

#### Five Highest:

1. Downtown/Seton Hill
2. Greater Charles  
Village/Barclay
3. Greater Roland  
Park/Poplar Hill
4. North Baltimore/  
Guilford/Homeland
5. Midtown

#### Five Lowest:

1. Edmondson Village
2. Forest Park/Walbrook
3. Greenmount East
4. Madison/East End
5. Greater Govans

### Non-Hispanic White

Measure of non-Hispanic White persons living in an area.

Definition: The total number of persons that identify themselves as being racially White (and ethnically non-Hispanic) out of the total number of persons living in an area. “White” refers to a person having origins in any of the original peoples of Europe, the Middle East, or North Africa. It includes people who indicated their race as “White”. (SOURCE: AMERICAN COMMUNITY SURVEY, 2012-2016)

#### Five Highest:

1. South Baltimore
2. Canton
3. Greater Roland  
Park/Poplar Hill
4. Medfield/Hampden/  
Woodberry/Remington
5. Fells Point

#### Five Lowest:

1. Sandtown-Winchester/  
Harlem Park
2. Edmondson Village
3. Greater Rosemont
4. Dorchester/Ashburton
5. Madison/East End

### Hispanic

Measure of the number of Hispanic persons in an area.

Definition: The total number of persons that identify their ethnicity as being Hispanic or Latino out of the total number of persons living in an area. Hispanic origin can be viewed as the heritage, nationality group, lineage, or country of birth of the person or the person’s parents or ancestors before their arrival in the United States. People who identify their origin as Hispanic, Latino, or Spanish may be any race. (SOURCE: AMERICAN COMMUNITY SURVEY, 2012-2016)

#### Five Highest:

1. Orangeville/East  
Highlandtown
2. Southeastern
3. Patterson Park  
North & East
4. Highlandtown
5. Brooklyn/Curtis Bay/  
Hawkins Point

#### Five Lowest:

1. Sandtown-Winchester/  
Harlem Park
2. Pimlico/Arlington/  
Hilltop
3. Upton/Druid Heights
4. Howard Park/  
West Arlington
5. Dorchester/Ashburton

## Census Demographics

### All Other Races

Measure of persons reporting being of a race other than African American, White, Asian, or Two or More races living in an area.

Definition: The total number of persons that identify themselves as being of either American Indian, Alaskan Native, Native Hawaiian or Other Pacific Islander, or some other race (non-Hispanic) out of the total number of persons living in an area. (SOURCE: AMERICAN COMMUNITY SURVEY, 2012-2016)

#### Five Highest

1. Downtown/Seton Hill
2. The Waverlies
3. Lauraville
4. Orangeville/East Highlandtown
5. Sandtown-Winchester/Harlem Park

#### Five Lowest:

1. Allendale/Irvington/S. Hilton, Chinquapin Park/Belvedere, Highlandtown, Mount Washington/Coldspring, Washington Village/Pigtown
2. Cedonia/Frankford
3. Southern Park Heights
4. Westport/Mount Winans/Lakeland
5. Greater Govans

### Racial Diversity Index

Measures the degree of racial diversity within an area.

Definition: The percent chance that two people picked at random within an area will be of a different race/ethnicity. This number does not reflect which race/ethnicity is predominant within an area. The higher the value, the more racially and ethnically diverse an area. (SOURCE: AMERICAN COMMUNITY SURVEY, 2012-2016)

#### Five Highest:

- 1 Orangeville/East Highlandtown
2. Southeastern
3. Brooklyn/Curtis Bay/Hawkins Point
4. Downtown/Seton Hill
5. Patterson Park North & East

#### Five Lowest:

1. Greater Rosemont
2. Sandtown-Winchester/Harlem Park
3. Edmondson Village
4. Dorchester/Ashburton
5. Pimlico/Arlington/Hilltop

### Two or More Races

Measure of persons reporting being of two or more races living in an area.

Definition: The total number of persons that identify themselves as being of two or more races (and non-Hispanic) out of the total number of persons living in an area. (SOURCE: AMERICAN COMMUNITY SURVEY, 2012-2016)

#### Five Highest:

1. Dickeyville/Franklintown
2. North Baltimore/Guilford/Homeland
3. Greater Charles Village/Barclay
4. Hamilton
5. Fells Point

#### Five Lowest:

1. Oldtown/Middle East
2. Cross-Country/Cheswolde
3. Madison/East End
4. Greenmount East
5. Southeastern

## Census Demographics

## Age

**Percent of Population:  
Under 5 Years Old**

Measure of very young persons (before school age) in an area.

Definition: The percent of persons under 5 years out of all persons living in an area. (SOURCE: AMERICAN COMMUNITY SURVEY, 2012-2016)

**Five Highest:**

1. Dickeyville/  
Franklintown
2. Orangeville/East  
Highlandtown
3. Cross-Country/  
Cheswolde
4. Claremont/Armistead
5. Mount Washington/  
Coldspring

2. Midtown
3. Howard Park/  
West Arlington
4. Northwood
5. North Baltimore/  
Guilford/Homeland

**Percent of Population:  
5 to 17 Years Old**

Measure of persons aged 6 to 18 years old (school aged) in an area.

Definition: The percent of persons aged 5 to 17 years old out of all persons living in an area. (SOURCE: AMERICAN COMMUNITY SURVEY, 2012-2016)

**Five Highest:**

1. Cherry Hill
2. Belair-Edison
3. Southeastern
4. Madison/East End
5. Upton/Druid Heights

**Five Lowest:**

1. Canton
2. Midtown
3. Downtown/Seton Hill
4. Fells Point
5. South Baltimore

**Percent of Population:  
18 to 24 Years Old**

Measure of persons aged 18 to 24 years old (approximately college age) in an area.

Definition: The percent of persons aged 18 to 24 years old out of all persons living in an area. (SOURCE: AMERICAN COMMUNITY SURVEY, 2012-2016)

**Five Highest:**

1. Greater Charles  
Village/Barclay
2. Northwood
3. North Baltimore/  
Guilford/Homeland
4. Downtown/Seton Hill
5. Greater Mondawmin

**Five Lowest:**

1. Mount Washington/  
Coldspring
2. Morrell Park/Violetville
3. Southeastern
4. South Baltimore
5. Fells Point

**Percent of Population:  
25 to 64 Years Old**

Measure of persons aged 25 to 64 (approximately working age) in an area.

Definition: The percent of persons aged 25 to 64 years old out of all persons living in an area. (SOURCE: AMERICAN COMMUNITY SURVEY, 2012-2016)

**Five Highest:**

1. Fells Point
2. South Baltimore
3. Canton
4. Downtown/Seton Hill
5. Inner Harbor/  
Federal Hill

**Five Lowest:**

1. Northwood
2. Cross-Country/  
Cheswolde
3. Cherry Hill
4. North Baltimore/  
Guilford/Homeland
5. Upton/Druid Heights

**Percent of Population:  
65 Years Old and Above**

Measure of seniors living in an area.

Definition: The total number of persons 65 years old and above out of all persons living in an area. (SOURCE: AMERICAN COMMUNITY SURVEY, 2012-2016)

**Five Highest:**

1. Howard Park/  
West Arlington
2. Greater Roland  
Park/Poplar Hill
3. Pimlico/Arlington/  
Hilltop
4. Mount Washington/  
Coldspring
5. Morrell Park/Violetville

**Five Lowest:**

1. Downtown/Seton Hill
2. Brooklyn/Curtis Bay/  
Hawkins Point
3. Patterson Park  
North & East
4. Westport/Mount  
Winans/Lakeland
5. Harbor East/Little Italy

## Households

### Total Number of Households

Measure of households in an area.

Definition: A household consists of all the people occupying a housing unit. A household includes related and unrelated persons, if any, such as lodgers, foster children, wards, or employees who share the housing unit. A person living alone in a housing unit, or a group of unrelated people sharing a housing unit such as partners or roomers, is also counted as a household. The count of households excludes group quarters. (SOURCE: U.S. CENSUS BUREAU, 2010)

#### Five Highest:

1. Cedonia/Frankford
2. Midtown
3. Medfield/Hampden/  
Woodberry
4. Greater Charles  
Village/Barclay
5. Harford/Echodale

#### Five Lowest:

Franklinton
2. Poppleton/The Terraces/  
Hollins Market
3. Washington  
Village/Pigtown
4. Madison/East End
5. Harbor East/Little Italy

### Average Household Size

Measures the average size of the households within an area.

Definition: The median value of number of persons living within a household. The average size of a household is obtained by dividing the number of persons in households by the number of households (or householders). (SOURCE: U.S. CENSUS BUREAU, 2010)

#### Five Highest:

1. Madison/East End
2. Midway/Coldstream
3. Belair-Edison
- Three CSAs tied  
for 4th and 5th

#### Five Lowest:

1. Downtown/Seton Hill
2. Midtown
3. Canton
4. Mt. Washington/  
Coldspring
5. Inner Harbor/  
Federal Hill

### Percent of Households

#### with Children Under the Age of 18

Measure of households with children.

Definition: The percentage of households with children living in the household that are under the age of 18 out of all households. (SOURCE: AMERICAN COMMUNITY SURVEY, 2012-2016)

#### Five Highest:

1. Westport/Mt.  
Winans/Lakeland
2. Madison/East End
3. Cherry Hill
4. Brooklyn/Curtis Bay/  
Hawkins Point
5. Belair-Edison

#### Five Lowest:

1. Midtown
2. Downtown/Seton Hill
3. Canton
4. Greater Charles  
Village/Barclay
5. Fells Point

### Percent of Female-Headed Households with Children under 18

Measure of households with children headed by females in an area.

Definition: The percentage of female-headed households with children under 18 out of all households with children under 18 in an area. (SOURCE: AMERICAN COMMUNITY SURVEY, 2012-2016)

#### Five Highest:

1. Oldtown/Middle East
2. Poppleton/The Terraces/  
Hollins Market
2. Midway/Coldstream
4. Upton/Druid Heights
5. Harbor East/Little Italy

#### Five Lowest:

1. Canton
2. Highlandtown
3. South Baltimore
4. North Baltimore/  
Guilford/Homeland
5. Greater Roland  
Park/Poplar Hill

## Income and Poverty

### Median Household Income

Measures the relative wealth of households in an area.

Definition: The median household income is the middle value of the incomes earned by households within an area for the prior year. The median value is used as opposed to the average so that both extremely high and extremely low prices do not distort the total amount of income earned by households in an area. (SOURCE: AMERICAN COMMUNITY SURVEY, 2012-2016)

#### Five Highest:

1. Greater Roland Park/Poplar Hill
2. Canton
3. Inner Harbor/Federal Hill
4. South Baltimore
5. North Baltimore/Guilford/Homeland

#### Five Lowest:

1. Oldtown/Middle East
2. Upton/Druid Heights
3. Poppleton/The Terraces/Hollins Market
4. Cherry Hill
5. Greenmount East

### Percent of Households Earning Less than \$25,000 a Year

Measures the concentration of households that earned less than \$25,000 in the previous year.

Definition: The percentage of households earning less than \$25,000 out of all households in an area. (SOURCE: AMERICAN COMMUNITY SURVEY, 2012-2016)

#### Five Highest:

1. Oldtown/Middle East
2. Upton/Druid Heights
3. Poppleton/The Terraces/Hollins Market
4. Cherry Hill
5. Sandtown-Winchester/Harlem Park

#### Five Lowest:

1. South Baltimore
2. Canton
3. Greater Roland Park/Poplar Hill
4. Fells Point
5. Mount Washington/Coldspring

### Percent of Households Earning \$25,000 to \$40,000 a Year

Measures the concentration of households with earnings in the previous year between \$25,000 and \$39,999 in an area.

Definition: The percentage of households earning between \$25,000 and \$39,999 out of all households in an area. (SOURCE: AMERICAN COMMUNITY SURVEY, 2012-2016)

#### Five Highest:

1. Edmondson Village
2. Claremont/Armistead
3. Cedonia/Frankford
4. Greater Rosemont
5. Clifton-Berea

#### Five Lowest:

1. South Baltimore
2. Inner Harbor/Federal Hill
3. Greater Roland Park/Poplar Hill
4. Canton
5. Highlandtown

### Percent of Households Earning \$40,000 to \$60,000 a Year

Measures the concentration of households with earnings in the previous year between \$40,000 and \$59,999 in an area.

Definition: The percentage of households earning between \$40,000 and \$59,999 out of all households in an area. (SOURCE: AMERICAN COMMUNITY SURVEY, 2012-2016)

#### Five Highest:

1. Edmondson Village
2. Loch Raven
3. Brooklyn/Curtis Bay/Hawkins Point
4. Beechfield/Ten Hills/West Hills
5. Harford/Echodale

#### Five Lowest:

1. Poppleton/The Terraces/Hollins Market
2. Canton
3. Mount Washington/Coldspring
4. North Baltimore/Guilford/Homeland
5. Greater Roland Park/Poplar Hill

## Census Demographics

### Percent of Households Earning \$60,000 to \$75,000 a Year

Measures the concentration of households with earnings in the previous year between \$60,000 and \$74,999 in an area.

Definition: The percentage of households earning between \$60,000 and \$74,999 out of all households in an area.

(SOURCE: AMERICAN COMMUNITY SURVEY, 2012-2016)

#### Five Highest:

1. Lauraville
2. Loch Raven
3. Northwood
4. Allendale/  
Irvington/S. Hilton
5. Greater Mondawmin

#### Five Lowest:

1. Cherry Hill
2. Claremont/Armistead
3. Oldtown/Middle East
4. Upton/Druid Heights
5. Washington  
Village/Pigtown

### Percent of Households Earning More than \$75,000 a Year

Measures the concentration of households with earnings in the previous year over \$75,000 in an area.

Definition: The percentage of households earning more than \$75,000 out of all households in an area. (SOURCE: AMERICAN COMMUNITY SURVEY, 2012-2016)

#### Five Highest:

1. South Baltimore
2. Canton
3. Greater Roland  
Park/Poplar Hill
4. Inner Harbor/  
Federal Hill
5. Fells Point

#### Five Lowest:

1. Upton/Druid Heights
2. Poppleton/The  
Terraces/Hollins Market
3. Cherry Hill
4. Greenmount East
5. Oldtown/Middle East

### Percent of Households Living Below the Poverty Line

Measures economic conditions in an area.

Definition: This indicator measures the percentage of households whose income fell below the poverty threshold out of all households in an area. Federal and state governments use such estimates to allocate funds to local communities. Local communities use these estimates to identify the number of individuals or families eligible for various programs. (SOURCE: AMERICAN COMMUNITY SURVEY, 2012-2016)

#### Five Highest:

1. Poppleton/The  
Terraces/Hollins Market
2. Upton/Druid Heights
3. Oldtown/Middle East
4. Cherry Hill
5. Southwest Baltimore

#### Five Lowest:

1. South Baltimore
2. Canton
3. Inner Harbor/  
Federal Hill
4. Greater Roland  
Park/Poplar Hill
5. Mount Washington/  
Coldspring

### Percent of Children Living Below the Poverty Line

Measures economic conditions facing persons under the age of 18.

Definition: This indicator measures the percentage of persons under the age of 18 living in households where the total income fell below the poverty threshold out of all children in households in an area. Federal and state governments use such estimates to allocate funds to local communities. Local communities use these estimates to identify the number of individuals or families eligible for various programs. (SOURCE: AMERICAN COMMUNITY SURVEY, 2012-2016)

#### Five Highest:

1. Poppleton/The Terraces/  
Hollins Market
2. Upton/Druid Heights
3. Cherry Hill
4. Oldtown/Middle East
5. Madison/East End

#### Five Lowest:

1. South Baltimore
2. Canton
3. Mount Washington/  
Coldspring
4. North Baltimore/  
Guilford/Homeland
5. Fells Point

# Housing and Community Development

In a city that was once 50% larger in population size than it is today, the fact that many households struggle to find secure, stable housing in Baltimore may seem surprising.<sup>1</sup> Part of the problem is the result of several years of discriminatory housing policies that led to the deferred maintenance of housing in many neighborhoods and today has resulted in significant vacant and abandoned properties.<sup>2</sup> Baltimore has developed innovative policies such as the Vacants to Value (V2V)<sup>3</sup> program which aims to strategically rehabilitate, redevelop, or potentially demolish vacant housing in order to stabilize neighborhoods. A 2017 evaluation of the program found that while the program is effectively getting developers to rehabilitate vacant properties, it cannot be effective everywhere. Additionally, focusing on vacant properties alone is not a neighborhood revitalization strategy.<sup>4</sup>

The other issues that impact the ability to find housing arise from the nature of both the for-sale and rental housing markets. On the one hand, Baltimore has the lowest for-sale housing prices in the metropolitan region,<sup>5</sup> while on the other hand has some of the highest housing rental rates among comparable cities.<sup>6</sup> For potential home-buyers, even though home prices in many neighborhoods are modest, access to capital is difficult as banks find it less profitable to lend in these markets.<sup>7</sup>

For Baltimore's approximately 50% of renter households, more than half are paying in excess of 30% of their income on rent. Housing unaffordability and insecurity is a nationwide problem that contributes to poor outcomes in many other spheres of life such as health, employment, and education. In his 2016 book *Evicted*, MacArthur "Genius" Fellow Matthew Desmond wrote about how crucial addressing housing security is for alleviating poverty in the U.S. The statistics are sobering: only 1 out of 4 households who qualify for housing assistance actually receives it in America; in Baltimore, the waitlist for households who qualify for

assistance is nearly 25,000 which has led some programs to close the list to potential applicants as too few resources exist to meet the demand.

Significant vacancies in some neighborhoods, lack of access to capital for moderately priced homes, and lack of housing assistance overall make it difficult to understand how much housing Baltimore really needs and at what levels of affordability. Researchers at New York University's Furman Center refer to this as "supply skepticism," which is when both housing advocates and homeowners may inadvertently contribute to housing insecurity by opposing new development.<sup>8</sup> Instead, they suggest that for communities to remain (or become) economically diverse as they grow, they should use both incentives and housing requirements to ensure that when new supply is added in a community, it achieves a healthy balance of incomes in all neighborhoods.

## Housing and Community Development

In order to increase resources for more affordable housing in Baltimore, voters went to the ballot in 2016 in support of the Housing For All initiative that established a charter amendment for an Affordable Housing Trust Fund.<sup>9</sup> Several local groups worked together, including the Baltimore Housing Roundtable and United Workers, to mobilize voters towards a Baltimore that is “United Not Blighted” with funding for more equitable development.<sup>10</sup>

### Data Sources

*Vital Signs 16* tracks 21 indicators for Community Statistical Areas (CSAs)<sup>11</sup> designed to follow the city’s housing market and community development processes over time. These indicators are grouped into the following categories: housing market, affordability and choice, tax credits, permits and code enforcement, and vacancy.

Data for *Vital Signs 16* Housing indicators come from sources that can be grouped into the following categories:

**City sources:** Baltimore City Department of Housing, Baltimore City Circuit Court, Baltimore City Department of Finance, BidBaltimore

**State sources:** Maryland Department of Planning

**Federal sources:** United States Postal Service, Bureau of the Census, American Community Survey (ACS), Department of Housing and Urban Development

**Proprietary sources:** First American Real Estate Solutions, RBIntel

When possible, indicators are created by normalizing data by the number of residential properties to establish rates that allow for comparison across neighborhoods and over time.

### Data Key

Green colored text denotes a positive change.

Red colored text denotes a negative change.

Blue colored text denotes a neutral change.

### Housing Market

Housing market transactions within neighborhoods provide a glimpse into how well homes in the area are sold to people moving in using formal financing mechanisms. Mortgage-based sales of homes generally suggest that the housing unit will be owner-occupied. Cash-based sales suggest investment transactions that may not be occupied by the buyer, or possibly not occupied at all.<sup>12</sup> Bank-owned (REO) sales occur after a property owner has been foreclosed upon, which typically means that displacement has occurred.

Nine housing market indicators for Baltimore’s neighborhoods are included in *Vital Signs 16*: percentage of properties that are owner-occupied, total number of homes sold, median price of homes sold, median number of days on market, percent of homes sold in foreclosure, percent of homes sold for cash, percent of properties under mortgage foreclosure, and percentage of residential tax lien sales.

### Owner-Occupancy

Between 2015 and 2016, the owner-occupancy rate in Baltimore **decreased** from 56.1% to 54.9%. The CSAs with the **highest** percentage of owner-occupied properties Claremont/Armistead (83.4%), Cross-Country/Cheswolde (82.2%), and Mount Washington/Coldspring (81.8%). The CSAs with the **lowest** percentage of owner-occupied properties Madison/East End (23.1%) and Southwest Baltimore (23.6%).

### Number of Homes Sold

Between 2015 and 2016, the total number of homes sold in Baltimore City **increased** from 6,583 to 9,034. The **highest** number of homes were sold in Patterson Park North & East (500), Medfield/Hampden/Woodberry/Remington (483), and Inner Harbor/Federal Hill (402). The **lowest** number of homes sold were in Cherry Hill (16) and Dickeyville/Franklinton (17).

### Median Sales Price

Between 2015 and 2016, the median sales price of homes sold **increased** by 10.4% from \$125,000 to \$138,000. The CSAs with the **highest** median home sales in 2016 include North Baltimore/ Guilford/Homeland (\$373,875), Inner Harbor/Federal Hill (\$319,600), and South Baltimore (\$307,250). The CSAs with the **lowest** median home sales

9. Baltimore Voters Support Housing for All (Winter 2017) <https://housingtrustfundproject.org/baltimore-voters-supports-housing-for-all>

10. For more information, visit the United Workers website [http://www.unitedworkers.org/baltimore\\_s\\_20\\_20\\_vision](http://www.unitedworkers.org/baltimore_s_20_20_vision)

11. CSAs are groups of census tracts that correspond to neighborhoods. See *Vital Signs 16* Introduction for more details.

12. Alan Mallach (2012), “Depopulation, Market Collapse and Property Abandonment” in *Rebuilding America’s Legacy Cities*, Alan Mallach, editor. The American Assembly.

## Housing and Community Development

include Clifton-Berea (\$13,000), Sandtown-Winchester/Harlem Park (\$24,400), and Greater Rosemont (\$25,358).

### Median Days on Market

Between 2015 and 2016, the median number of days that a house was listed on the market in Baltimore City **decreased** from 37 to 33. The CSAs where it took the **least** amount of time to sell a home in 2016 included Medfield/Hampden/Woodberry/Remington (21.0 days) and South Baltimore (21.5 days). The CSAs with where it took the **most** amount of time to sell a home were Greenmount East (71.0 days) and Downtown/Seton Hill (53.0 days).

### Cash-Based Homes Sales

Between 2015 and 2016, the percentage of all homes sold in Baltimore purchased for cash **decreased** from 46.3% to 42.1%. The CSAs with the **highest** percentage of homes sold as cash-based purchases in 2016 were Clifton-Berea (89.1%), Midway/Coldstream (88.8%), and Sandtown-Winchester/Harlem Park (88.5%). The CSAs with the **lowest** percentage of the homes sold in cash were South Baltimore (12.4%), Highlandtown (12.6%), and Dickeyville/Franklin-town (14.3%).

### Foreclosure Sales

Between 2015 and 2016, the percentage of homes sold under foreclosure or as a real estate owned (REO) sale **declined** from 1.6% to 1.0%. The CSAs with the **highest** percentage of homes sold under foreclosure in 2016 were Cherry Hill and Loch Raven (4.4%) and Mount Washington/Coldspring (4.1%). Eighteen CSAs had zero homes sold in foreclosure.

### Foreclosure Filings

Between 2015 and 2016, the percentage of homes in Baltimore receiving notice of a mortgage foreclosure filing due to delinquent payment **decreased** from 1.7% to 1.4%. The **highest** percentage of homes receiving a mortgage foreclosure filing occurred in Forest Park/Walbrook (2.7%), Belair-Edison (2.6%), and Howard Park/West Arlington (2.4%). The **lowest** foreclosure filing rates occurred in Canton (0.3%) and South Baltimore (0.3%).

### Tax Lien Sales

Residential properties with unpaid taxes can be sold as tax certificates at the annual tax lien certificate sale held in May. Between 2015 and 2016, the percent of residential properties with tax liens for sale **declined** from 5.4% to 4.6%. The CSAs with the **highest** percentage of tax lien sales were Midway/Coldstream (12.7%), and Sandtown-Winchester/Harlem Park (12.6%). Greater Roland

Park/Poplar Hill had **0.5%** of residential properties with tax liens for sale.

### Housing Affordability and Choice <sup>13</sup>

Housing costs are a burden for households on a fixed or low income, those who have experienced job loss or displacement, or for those living in areas where housing values are increasing rapidly. Federal housing choice vouchers assist households by subsidizing rent so that households do not spend more than 30% of their income on housing. Although the vouchers can be used in the private market, rental units in some neighborhoods have rents too high for landlords to accept vouchers as market value.

*Vital Signs 16* tracks the percentage of households paying 30% or more of their total household income on either mortgage or rent as well as the number of housing vouchers per 1,000 rental units being used in a neighborhood.

#### Affordability—Mortgage

Between 2006-2010 and 2012-2016, the percentage of households with mortgages paying more than 30% of their total household income on home-related expenses **decreased** by -4.2% from 40.0% to 35.8%. During 2012-2016, the CSAs with the **highest** percentage of homeowners spending more than 30% of their total income on housing included Clifton-Berea (51.4%), Harbor East/Little Italy and Greenmount East (51.0%). The CSAs with the **lowest** percentage of homeowners spending more than 30% of their total income on housing were South Baltimore (20.1%) and Highlandtown (20.9%).

#### Affordability—Rent

Between 2006-2010 and 2012-2016, the percentage of households paying more than 30% of their total household income on rent **decreased** from 52.7% to 50.2%. During 2012-2016, the CSAs with the **greatest** percentage of renters paying in excess of 30% of their income on housing included Belair-Edison (68.0%), Washington Village/Pigtown (67.3%), and Edmondson Village (66.6%). The CSAs with the **lowest** percentage of renters who paid more than 30% of their total household income on rent were Canton (28.2%), South Baltimore (30.7%) and Fells Point (33.3%).

#### Housing Voucher Use

Between 2015 and 2016, the rate of housing vouchers used per 1,000 rental units in Baltimore City **declined** from 127.8 to 124.6. This is the result of a small reduction in the number of housing choice vouchers and a significant

13. Sources for Housing Affordability indicators are the American Community Survey (ACS) and the Picture of Subsidized Housing (US Department of Housing and Urban Development).

## Housing and Community Development

increase in the overall number of rental units. The CSAs with the **highest** rates of housing voucher use per 1,000 rental units were Belair-Edison (389.3), Madison/East End (301.4), and Washington Village (256.1).

### Housing Tax Credits<sup>14</sup>

Although Baltimore City has one of the highest property tax rates in the State of Maryland, many residents avail themselves to tax credit programs based on ownership status, income eligibility and/or rehabilitation of historic properties. Baltimore City residential property owners can apply for two property tax credits in order for owner-occupants to manage fluctuations in assessed value (homestead tax credit) and to ensure their tax bill does not exceed a percentage of household gross income (homeowner's tax credit). Property owners must apply for these credits and many homeownership preservation strategies are aimed at raising awareness about how and when to apply.

For property owners in designated historic districts, Historic Tax credits help incentivize renovation of buildings located in these districts. *Vital Signs 16* tracks the percentage of properties that receive each of these credits to show the rate of uptake of these potential credits in different parts of the city.

#### Homestead Tax credit

From 2015 to 2016, the rate of residential properties receiving the Homestead Tax credit in Baltimore **declined** from 258.5 to 251.7 per 1,000 residential properties. The CSAs with the **highest** rates of residential properties that received the Homestead Tax credit were located in Cross-Country/Cheswolde (561.1 per 1,000 residential units), Northwood (514.3 per 1,000), and Dorchester/Ashburton (441.8 per 1,000). The CSAs with the **lowest** rates of residential properties that received the Homestead Tax credit were located in Greater Rosemont (35.5 per 1,000), Southwest Baltimore (68.3 per 1,000), and Sandtown-Winchester/Harlem Park (73.4 per 1,000).

#### Homeowners Tax credit

From 2015 to 2016, the rate of residential properties in Baltimore that received the Homeowners Tax credit **declined** from 46.5 to 45.3 per 1,000 residential properties. In 2016, the **highest** rates of Homeowners Tax credit were located in Edmondson Village (96.2 per 1,000), Howard Park/West Arlington (90.9 per 1,000 residential units), and Glen-Fallstaff (89.9 per 1,000). In 2016, there was only one CSA with

less than 10 per 1,000 residential properties receiving the Homeowners Tax credit: Midtown (9.2 per 1,000).

### Historic Tax Credits

Between 2015 and 2016, the rate of Historic Tax credits per 1,000 residential units **increased** from 10.1 to 11.6 per 1,000 residential properties. In 2016, the CSAs with the **highest** rates of Historic Tax credits were Oldtown/Middle East (78.0 per 1,000 residential units), Midtown (71.2 per 1,000 residential units), and Patterson Park North & East (68.4 per 1,000 residential units). There were 18 CSAs that did not have any allocations of historic tax credits in 2016.

### Housing Permits and Code Enforcement

Baltimore City's Department of Housing and Community Development is responsible for issuing permits for rehabilitation, new construction, and demolition, as well as enforcing the building code and issuing violations. *Vital Signs 16* uses these datasets to track both investment in and/or potential neglect of a neighborhood's housing stock.

#### New construction permits

Between 2015 and 2016, the rate of new construction permits **decreased** from 2.4 to 1.3 per 1,000 homes. The CSAs with the highest **increase** in the rate of new construction permits were South Baltimore (+7.8) and Westport/Mount Winans/Lakeland (+4.2). In 2016, the CSAs with the **highest** rate of new construction permits occurred in South Baltimore (16.9 per 1,000 homes) and Orangeville/East Highlandtown (12.5 per 1,000 homes). Twenty-one CSAs experienced no new construction permits in 2016.

#### Rehabilitation permits

Between 2015 and 2016, the percentage of residential properties with rehabilitation permits in excess of \$5,000 in Baltimore **increased** from 2.9% to 3.2%. The CSAs that experienced the largest **increases** in the rate of rehabilitation permits were Highlandtown (+2.1%) and Forest Park/Walbrook (+2.0%).

In 2016, the CSAs that had the **highest** percentage of residential properties with rehabilitation permits were Highlandtown (8.3%), Canton and Patterson Park North & East (5.9%). The CSAs that had the **lowest** percentage of residential properties with rehabilitation permits were Cherry Hill (0.5%), Greater Rosemont (0.8%), and Claremont/Armistead (0.9%).

14. Tax credit data has been provided by the Baltimore City Department of Finance.

## Housing and Community Development

### Demolition permits

Given that Baltimore declined in population, the supply of housing in the city today greatly outnumbers current demand, which over many decades, has resulted in deferred maintenance of residential properties and ultimately abandonment. In 2015, Maryland Governor Hogan announced funding for Project C.O.R.E.<sup>15</sup> to support the City's ability to demolish buildings deemed unsafe. A burgeoning industry for deconstruction of properties is growing as a means of a more sustainable way to reuse materials from vacant buildings (see Data Story).

Between 2015 and 2016, the rate of demolition permits **decreased** from 3.8 to 3.5 per 1,000 homes. In 2016, the **greatest** rate of demolition permits occurred in Oldtown/Middle East (43.5 per 1,000 homes), Greenmount East (19.7 per 1,000 homes), and Upton/Druid Heights (15.8 per 1,000 homes). The **smallest** rate of demolition permits occurred in Loch Raven and Chinquapin Park/Belvedere (0.1 per 1,000 homes) and Northwood (0.2 per 1,000 homes).

### Housing violations (other than vacant and abandoned notices)

Between 2015 and 2016, the percentage of properties in Baltimore receiving a housing violation (excluding a violation for vacancy—see below) **increased** from 2.4% to 2.7%. In 2016, the CSAs with the **highest** percentage of properties receiving a housing violation included were Downtown/Seton Hill and Greenmount East (6.7%). The CSAs with the **lowest** percentage of housing violations include Greater Roland Park/Poplar Hill and Claremont/Armistead (0.3%), and South Baltimore (0.5%).

### Vacant Buildings and Unoccupied Housing

Baltimore is one of few cities in the country that tracks vacant housing based on an official violation notice from the City's Department of Housing and Community Development. Vacant and abandoned housing is relatively easy to identify with boarded up windows and/or other signs of disrepair that makes the structure uninhabitable. Homes that are habitable but still do not have anyone living in

them are less obvious from appearance alone, but are a growing concern for many neighborhoods. Homes that the United States Postal Service no longer delivers mail to can be considered unoccupied.

### Vacant and Abandoned Housing

Between 2015 and 2016, the percentage of homes receiving a vacant house notice (VHN) in Baltimore City **decreased** from 8.2% to 8.0%. The CSAs with the largest **decreases** in vacant and abandoned housing were Oldtown/Middle East (-8.5%) and Sandtown-Winchester/Harlem Park (-5.5%). The percentage of vacant and abandoned properties **increased** most in Midway/Coldstream (+8.2%) and Downtown/Seton Hill (+4.3%).

In 2016, the CSAs with **highest** percentage of vacant and abandoned homes were Greenmount East (33.5%), Sandtown-Winchester/Harlem Park (30.0%), and Midway/Coldstream (28.2%). In 2016, 14 CSAs had less than 1% vacant and abandoned properties.

### Homes Receiving No Mail

Between 2015 and 2016, the percent of residential addresses that did not receive mail from the U.S. Postal Service identified as unoccupied for more than 90 days **increased** from 7.5% to 8.2%. The CSAs with the **highest** percentages of addresses not receiving mail were Penn North/Reservoir Hill (21.0%), Greenmount East (20.2%), and Greater Mondawmin (18.9%). The **lowest** percentages occurred in Cross-Country/Cheswolde (0.6%) and Downtown/Seton Hill (1.0%).

From 2015 to 2016, the CSAs with the greatest **increase** in the percentage of addresses not receiving mail were Greenmount East (+3.8%) and Patterson Park North & East (+3.2%). The CSAs with the greatest **decrease** in the percentage of homes not receiving mail were Penn North/Reservoir Hill (-0.8%) and Medfield/Hampden/Woodberry (-0.4%).

## Data Story: Social Entrepreneurship through Deconstruction of Vacant Properties

Baltimore City has over 16,000 vacant and abandoned buildings, many of which were built during a time when construction materials were meant to endure for several generations. Although these structures have become a visual blight for neighborhoods, demolition by bulldozers just creates waste and does not allow high-quality building materials, such as brick and old-growth wood, to be recycled and reused. Instead, the City of Baltimore's Department of Housing and Community Development (HCD) has helped support a burgeoning industry for the deconstruction of vacant buildings. Deconstruction is a labor intensive method for building removal which emphasizes the salvaging of materials which can be sold. In 2016, HCD contracted with Details for the deconstruction of 98 buildings (see map below).

Creating living wage jobs has been job #1 for Humanim through Details Deconstruction. Overall, Details has employed 175 people over the last 6 years, many of whom are returning from engagement with the criminal justice system. Described by HCD Commissioner Michael Braverman as "double duty dollars", the money allocated for deconstruction can create 6 to 8 times more jobs than demolition. Beyond the obvious benefits associated with employment, returning citizens who get a job are less likely to go back to prison. Baltimore's recidivism rate is currently just under 50%. In contrast, those who have been hired by Details as their first employer have a slightly greater than 2% recidivism rate. Stable employment, while removing blight in Baltimore, provides a living wages and sense of purpose. Perhaps more importantly, it allows people to plan for the future. The result is a dramatically reduced rate of recidivism and an increase in personal wealth building.

By Details, Inc., a Social Enterprise of Humanim

### Deconstructed Properties and Demolition Permits by CSA, 2016

# Housing and Community Development

## Indicator Definitions and Rankings

For each indicator reported in *Vital Signs 16*, we provide the data source, the years for which it is reported, and the five CSAs with the highest and lowest values for the indicator; these may not correspond to positive or negative trends.

### Housing Market Indicators

#### Total Number of Homes Sold

Measures housing market activity in an area.

Definition: The total number of homes and condominiums that are sold within a full calendar year. This includes both market and private transactions of single family homes, rowhouses/townhouses, mid- and high-rise condominiums, apartments, duplexes, and multi-family dwellings. (SOURCE: FIRST AMERICAN REAL ESTATE SOLUTIONS (FARES), 2010, 2011, 2012, 2013, 2014)

##### Five Highest:

1. Patterson Park  
North & East
2. Medfield/Hampden/  
Woodberry/Remington
3. Inner Harbor/  
Federal Hill
4. Canton
5. Harford/Echodale

##### Five Lowest:

1. Cherry Hill
2. Dickeyville/  
Franklintown
3. Claremont/Armistead
4. Downtown/Seton Hill
5. Upton/Druid Heights

#### Median Price of Homes Sold

Measures the value of residential properties in an area.

Definition: The median home sales price is the middle value of the prices for which homes are sold (both market and private transactions) within a calendar year. The median value is used as opposed to the average so that both extremely high and extremely low prices do not distort the prices for which homes are sold. This measure does not take into account the assessed value of a property. (SOURCE: FIRST AMERICAN REAL ESTATE SOLUTIONS (FARES), 2010, 2011, 2012, 2013, 2014)

##### Five Highest:

1. North Baltimore/  
Guilford/Homeland
2. Harbor East/Little Italy

2. Sandtown-Winchester/  
Harlem Park
3. Greater Rosemont
4. Madison/East End
5. Southwest Baltimore

### Median Number of Days on the Market

Measures the demand for housing in an area.

Definition: The median number of days that homes listed for sale sits on the public market in a given area. This time period is from the date it is listed for sale till the day the contract of sale is signed. Private (non-listed) home sale transactions are not included in this indicator. The median days on market is used as opposed to the average so that both extremely high and extremely low days on the market do not distort the length of time for which homes are listed on the market.(SOURCE: RBINTEL, 2010, 2011, 2012, 2013, 2014, 2015, 2016)

#### Five Highest:

1. Greenmount East
2. Downtown/Seton Hill
3. Southwest Baltimore
4. Harbor East/Little Italy
5. Hamilton

#### Five Lowest:

1. Medfield/Hampden/  
Woodberry/Remington
2. South Baltimore
3. Greater Mondawmin
4. Greater Roland  
Park/Poplar Hill
5. Mount Washington/  
Coldspring

### Percentage of Residential Tax Lien Sales

Measures the percentage of residential properties with city liens sold.

Definition: The percentage of residential properties with city liens sold as tax certificates at the annual tax lien certificate sale held in May. Tax sales are used to collect delinquent real property taxes and other unpaid charges to the city, which are liens against the real property. The tax certificate sale is a public online auction of City lien interests on properties that occurs annually in May. (SOURCE: BIDBALTIMORE, 2015, 2016)

#### Five Highest:

1. North Baltimore/  
Guilford/Homeland
2. Harbor East/Little Italy

2. Sandtown-Winchester/  
Harlem Park
3. Greater Rosemont
4. Madison/East End
5. Southwest Baltimore

### Percent of Homes Sold in Foreclosure

Measures sales of homes by banks owning foreclosed properties

Definition: The portion of the homes and condominiums sold that were identified as being owned by the bank (REO) out of all residential properties sold in a calendar year.(SOURCE: RBINTEL, 2010, 2011, 2012, 2013, 2014, 2015, 2016)

#### Five Highest:

1. Cherry Hill, Loch Raven
2. Mount Washington/  
Coldspring
3. Belair-Edison
4. Cedonia/Frankford
5. Southeastern

#### Five Lowest:

Eighteen CSAs had zero homes sold in foreclosure

### Percent of Homes Sold for Cash

Measures the purchasing of homes in cash, without a mortgage.

Definition: The portion of homes and condominiums sold for cash out of all residential properties sold in a calendar year. These types of sales tend to signify investor-based purchases as homes purchased for cash either become rental properties or later sold again in an effort to generate a profit.(SOURCE: RBINTEL, 2010, 2011, 2012, 2013, 2014, 2015, 2016)

#### Five Highest:

1. Clifton-Berea
2. Midway/Coldstream
3. Sandtown-Winchester/

2. Highlandtown
3. Dickeyville/  
Franklintown
4. Canton
5. Inner Harbor/  
Federal Hill

## Housing and Community Development

**Percent of Properties Receiving Mortgage Foreclosure Filing**

Measures properties for which foreclosure proceedings are underway due to mortgage delinquencies.

Definition: The percentage of properties where the lending company or loan servicer has filed a foreclosure proceeding with the Baltimore City Circuit Court out of all residential properties within an area. This is not a measure of actual foreclosures since not every property that receives a filing results in a property dispossession. (SOURCE: BALTIMORE CITY CIRCUIT COURT, 2010, 2011, 2012, 2013, 2014, 2015, 2016; MD PROPERTY VIEW 2010, 2011, 2012, 2013, 2014, 2015, 2016)

**Five Highest:**

1. Forest Park/Walbrook
2. Belair-Edison
3. Howard Park/  
West Arlington
4. Hamilton
5. Cedonia/Frankford

**Five Lowest:**

1. Canton
2. South Baltimore
3. Downtown/Seton Hill
4. North Baltimore/  
Guilford/Homeland
5. Harbor East/Little Italy

**Percent of Properties that are Owner-Occupied**

Measures property occupancy by owners.

Definition: The percentage of homeowners that are the principal residents of a particular residential property out of all residential properties. It is important to note that a portion of these owner-occupied properties may be subdivided and have tenants that pay rent and are not included in the calculation. (SOURCE: MD PROPERTY VIEW 2010, 2011, 2012, 2013, 2014, 2015, 2016)

3. Greenmount East
4. Sandtown-Winchester/  
Harlem Park
5. Poppleton/The Terraces/  
Hollins Market

**Percent of Addresses that Do Not Receive Mail (USPS No Stat)**

Measures housing units where mail delivery has been discontinued.

Definition: The percentage of residential addresses for which the United States Postal Service has identified as being unoccupied (no mail collection) for a period of at least 90 days or longer. These properties may be habitable, but are not currently being occupied. It is important to note that a single residential property can contain more than one address. (SOURCE: UNITED STATES POSTAL SERVICE, 2010, 2011, 2012, 2013, 2014, 2015, 2016)

3. Fells Point
4. Dickeyville/  
Franklintown
5. Midtown

## Housing and Community Development

**Affordability Index: Rent**

Measures housing burden for households paying rent in an area.

Definition: The percentage of households that pay more than 30% of their total household income on rent and related expenses out of all households in an area. (SOURCE: AMERICAN COMMUNITY SURVEY, 2012-2016)

**Five Highest:**

1. Belair-Edison
2. Washington Village/Pigtown
3. Edmondson Village
4. Midway/Coldstream
5. Madison/East End

**Five Lowest:**

1. Canton
2. South Baltimore
3. Fells Point
4. Greater Roland Park/Poplar Hill
5. Mount Washington/Coldspring

**Rate of Housing Vouchers Per 1,000 Rental Units**

Measures the ability of housing voucher holders to find housing in the private rental market

Definition: The Housing Choice Voucher (HCV) program is the federal government's largest low-income housing assistance program where people can seek housing in the private market. The maximum housing assistance is generally the lesser of the payment standard minus 30% of the family's monthly adjusted income or the gross rent for the unit minus 30% of monthly adjusted income. (SOURCE: US DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT, PICTURE OF SUBSIDIZED HOUSING, 2014, 2016)

**Five Lowest:**

1. Greater Roland Park/Poplar Hill
2. South Baltimore
3. Canton
4. Fells Point
5. Mount Washington/Coldspring

**Housing Tax Credit****Rate of Properties Receiving Homestead Tax Credit**

Measures homeownership and residential properties receiving a tax credit.

Definition: The number of residential properties that received the homestead tax credit per 1,000 residential properties within an area. The Homestead Credit limits the increase in taxable assessments each year to a fixed percentage. Every county and municipality in Maryland is required to limit taxable assessment increases to 10% or less each year, with the Baltimore City rate capped at 4%. (SOURCE: BALTIMORE CITY DEPARTMENT OF FINANCE, 2011, 2012, 2013, 2014, 2015, 2016; MDPROPERTY VIEW 2011, 2012, 2013, 2014, 2016)

**Five Highest:**

1. Cross-Country/Cheswolde
2. Northwood

2. Southwest Baltimore
3. Sandtown-Winchester/Harlem Park
4. Poppleton/The Terraces/Hollins Market
5. Pimlico/Arlington/Hilltop

**Rate of Properties Receiving Homeowners Tax Credit**

Measures homeownership and residential properties receiving a tax credit.

Definition: The number of residential properties that received the homeowners tax credit per 1,000 residential properties within an area. The homeowner's tax credit sets a limit on the amount of property taxes any homeowner must pay based upon his or her income. (SOURCE: BALTIMORE CITY DEPARTMENT OF FINANCE, 2011, 2012, 2013, 2014, 2015, 2016; MD PROPERTY VIEW 2010, 2011, 2012, 2013, 2014, 2015, 2016)

2. Downtown/Seton Hill
3. Poppleton/The Terraces/Hollins Market
4. Madison/East End
5. Sandtown-Winchester/Harlem Park

## Housing and Community Development

### Historic Tax Credit

Measures number of residential properties receiving historic tax credits.

Definition: The number of residential properties that received the Historic Tax Credit per 1,000 residential properties within an area. The credit is granted on the increased assessment directly resulting from qualified improvements. The duration of the credit is for 10 years, and is applicable to properties located in designated areas of significant historical value. (SOURCE: BALTIMORE CITY DEPARTMENT OF FINANCE, 2012, 2013, 2014, 2015, 2016; MDPROPERTY VIEW, 2012, 2013, 2014, 2016, 2016)

#### Five Highest:

1. Oldtown/Middle East
2. Midtown
3. Patterson Park North & East
4. Canton
5. Fells Point

#### Five Lowest:

Eighteen CSAs did not have any allocations of Historic Tax credits.

## Housing Permits and Code Enforcement Indicators

### Percent of Residential Properties with Rehabilitation Permits Exceeding \$5,000

Measure of interest, demand, and financial ability to invest in residential properties in an area.

Definition: The portion of residential properties that have applied for and received a permit to renovate the interior and/or exterior of a property where the cost of renovation will exceed \$5,000. The threshold of \$5,000 is used to differentiate a minor and more significant renovation project. (SOURCE: BALTIMORE CITY DEPARTMENT OF HOUSING, 2010, 2011, 2012, 2013, 2014, 2015, 2016; MDPROPERTY VIEW 2010, 2011, 2012, 2013, 2014, 2015, 2016)

#### Five Highest:

1. Highlandtown
2. Canton
3. Patterson Park North & East
4. Oldtown/Middle East
5. South Baltimore

#### Five Lowest:

1. Cherry Hill
2. Greater Rosemont
3. Claremont/Armistead
4. Southwest Baltimore
5. Sandtown-Winchester/Harlem Park

### Rate of New Construction Permits

Measures new construction and residential investment in an area.

Definition: The number of permits issued for new residential buildings per 1,000 existing residential properties within a community. The permits are analyzed by date of issue and not date of completion. (SOURCE: BALTIMORE CITY DEPARTMENT OF HOUSING, 2011, 2012, 2013, 2014, 2015, 2016; MDPROPERTY VIEW 2011, 2012, 2013, 2014, 2015, 2016)

#### Five Highest:

1. South Baltimore
2. Orangeville/East Highlandtown
3. Oldtown/Middle East
4. Dickeyville/Franklinton
5. Highlandtown

#### Five Lowest:

Twentyone CSAs did not have any permits issued for new residential construction.

### Rate of New Demolition Permits

Measures residential demolition permits issued by area.

Definition: The number of permits issued for the demolition of residential buildings per 1,000 existing residential properties. The permits are analyzed by date of issue and not date of actual demolition. (SOURCE: BALTIMORE CITY DEPARTMENT OF HOUSING, 2011, 2012, 2013, 2014, 2015, 2016; MDPROPERTY VIEW 2011, 2012, 2013, 2014, 2015, 2016)

#### Five Highest:

1. Oldtown/Middle East
2. Greenmount East
3. Upton/Druid Heights
4. Downtown/Seton Hill
5. Clifton-Berea

#### Five Lowest:

1. Loch Raven
2. Chinquapin Park/Belvedere
3. Northwood
4. Belair-Edison
5. Beechfield/Ten Hills/West Hills

## Housing and Community Development

**Percent of Residential Properties that are Vacant and Abandoned**

Measure of homes with an official Vacant House Notice (VHN) issued by Baltimore Housing.

Definition: The percentage of residential properties that have been classified as being vacant and abandoned by the Baltimore City Department of Housing out of all properties. Properties are classified as being vacant and abandoned if: the property is not habitable and appears boarded up or open to the elements; the property was designated as being vacant prior to the current year and still remains vacant; and the property is a multi-family structure where all units are considered to be vacant. (SOURCE: BALTIMORE CITY DEPARTMENT OF HOUSING, 2010, 2011, 2012, 2013, 2014; MDPROPERTY VIEW 2010, 2011, 2012, 2013, 2014, 2015, 2016)

**Five Highest:**

1. Greenmount East
2. Sandtown-Winchester/  
Harlem Park
3. Midway/Coldstream
4. Southwest Baltimore
5. Clifton-Berea

**Five Lowest:**

1. Greater Roland  
Park/Poplar Hill
2. Cross-Country/  
Cheswolde
3. Mount Washington/  
Coldspring
4. Canton
5. North Baltimore/  
Guilford/Homeland

**Percent of Residential Properties with Housing Violations**

Measure of homes receiving housing violations (excluding vacancy).

Definition: The percentage of residential properties that have received at least one housing code violation from the Baltimore City Department of Housing out of all properties. Properties whose façade, structure, and/or surrounding area violate the City's Housing Code are issued a notice and are considered open till the property is found in compliance. A property may receive multiple violations. (SOURCE: BALTIMORE CITY DEPARTMENT OF HOUSING, 2010, 2011, 2012, 2013, 2015, 2016; MDPROPERTY VIEW 2010, 2011, 2012, 2013, 2015, 2016)

**Five Highest:**

1. Downtown/Seton Hill
2. Greenmount East
3. Poppleton/The Terraces/  
Hollins Market
4. Midway/Coldstream
5. Dickeyville/  
Franklintown

**Five Lowest:**

1. Greater Roland  
Park/Poplar Hill
2. Claremont/Armistead
3. South Baltimore
4. Mount Washington/  
Coldspring
5. North Baltimore/  
Guilford/Homeland

**Total Residential Properties****Number of Residential Properties**

The number of residential properties is used as a denominator in several of the indicators.

Definition: The total number of residential properties located within an area as identified by Maryland Property View. It is important to note that this indicator is a count of properties (single family homes, condominiums, and duplexes) and that a property can be comprised of multiple housing units. (SOURCE: MDPROPERTY VIEW, 2010, 2011, 2012, 2013, 2014, 2015, 2016)

**Five Highest:**

1. Southwest Baltimore
2. Greater Rosemont
3. Medfield/Hampden/  
Woodberry/Remington
4. Patterson Park  
North & East
5. Belair-Edison

**Five Lowest:**

1. Dickeyville/  
Franklintown
2. Downtown/Seton Hill
3. Cherry Hill
4. Poppleton/The Terraces/  
Hollins Market
5. Oldtown/Middle East

**From Previous Vital Signs****Percent of Vacant Properties Owned by Baltimore City**

Measure of local government ownership of vacant residential properties.

Definition: The percent of properties that are classified as being vacant and abandoned that are owned by Baltimore City. Baltimore City has come to own these properties through a variety of ways including (but not limited to) eminent domain, unpaid tax or water bills, and purchase. (SOURCE: BALTIMORE CITY DEPARTMENT OF HOUSING, 2011, 2012, 2013)

**Five Highest:**

1. Oldtown/Middle East
2. Downtown/Seton Hill
3. Upton/Druid Heights
4. Poppleton/The Terraces/  
Hollins Market
5. Midtown

**Five Lowest:**

Twenty-one CSAs have no vacant properties identified as being owned by Baltimore City.

BALTIMORE NEIGHBORHOOD  
INDICATORS ALLIANCE  
Jacob France Institute

# Children and Family Health

There is a growing acknowledgement around the country that health outcomes are more correlated with our zipcode than to our genetic code. Research has shown that the neighborhoods where we live, work, and play every day significantly influence the ability to lead a healthy lifestyle. Healthy children and families need surroundings that are not concentrated in high rates of vacant buildings, concentrated poverty, or violent crime. Too often, however, all of these issues exist in the same neighborhoods; the interrelatedness of these neighborhood indicators requires deeper understanding of the places where all Baltimoreans live.

The differences by neighborhood are most dramatically evident in the ultimate quality of life indicator: life expectancy. Unfortunately, racial disparities in life expectancy exist. In 2016, there was a 5-year gap in life expectancy between white (76.6) and black (71.6) Baltimoreans.<sup>1</sup> While race accounts for much of this difference, the spatial disparities among neighborhoods with similar racial make-up are even more stark.

Take for example two sets of neighborhoods that are about the same percentage white and black. There can be as much as a 10-year difference among neighborhoods in different parts of Baltimore that are similar on one indicator such as race.

To address these health disparities and increase more equitable health outcomes in all neighborhoods, the Baltimore City Health Department released Healthy Baltimore 2020<sup>2</sup> in 2016. Key strategic areas of the plan include behavioral health, violence prevention, chronic disease, and life course and core services. In addition to these initiatives, Baltimore City has also had a long-term strategy to improve birth outcomes<sup>3</sup> coordinated by the B'More for Healthy Babies initiative.

*Vital Signs 16* tracks many indicators identified by these initiatives as key to achieving greater health equity for Baltimore's residents across all neighborhoods. In order to ensure consistent communication of health-related data to communities, analysis of indicators in this chapter has been closely coordinated with the Baltimore City Health Department.

## Life Expectancy in Select Baltimore CSAs, 2016

SOURCE: BALTIMORE CITY HEALTH DEPARTMENT

## Data

Children & Family Health data for *Vital Signs 16* indicators come from several sources. State sources include the Maryland Department of Vital Statistics, Maryland Department of the Environment, and Maryland Department of Human Resources. City sources include Baltimore City Health Department, Baltimore City Liquor Board, and research partners at the Johns Hopkins Center for a Livable Future. Indicators are created by normalizing data to the number of residents in a given area. This will reflect the concentration of an indicator within an area, and allow for comparison across neighborhoods and over time.

## Children and Family Health

*Vital Signs 16* includes eighteen indicators for Community Statistical Areas<sup>4</sup> (CSAs) designed to track the health of adults, children, and infants in Baltimore City and its neighborhoods. These indicators are grouped into the following categories: birth outcomes; life expectancy and mortality; lead poisoning; built environment and food security; and social assistance programs.

### Birth Outcomes<sup>5</sup>

*Vital Signs 16* tracks four birth outcome indicators for Baltimore's Community Statistical Areas (CSAs): teen birth rate; percent of births delivered at term; percent of babies born with satisfactory birth weight; and percent of births where the mother received early prenatal care.

#### Teen birth rate

Baltimore City's teen birth rate (the number of girls aged 15-19 who have given birth per 1,000 females aged 15-19) has continued to **decrease** over the past several years (see Data Story). Between 2015 and 2016, the teen birth rate further **decreased** from 29.2 to 26.9. In 2016, the CSAs with the **highest** teen birth rates were Brooklyn/Curtis Bay/Hawkins Point (89.8), Cherry Hill (66.3), and Pimlico/Arlington/Hilltop (63.7). Three CSAs with **zero** teen births were Greater Roland Park/Poplar Hill, Mount Washington/Coldspring, and South Baltimore.

#### Births Delivered at Term

Between 2015 and 2016, the percentage of births that were delivered at term (at least 37 weeks gestation) in Baltimore City **decreased** from 86.7% to 86.4%. In 2016, the CSAs with the **highest** percentage of births at term were Fells Point (95.0%) and Greater Roland Park/Poplar Hill (94.0%). The CSAs with the **lowest** percentage of births at term occurred in Clifton-Berea (76.6%), Poppleton/The Terraces/Hollins Market (79.1%), and Belair-Edison (80.0%).

#### Babies Born with Satisfactory Weight

Between 2015 and 2016, the percentage of births where the child was of satisfactory weight (at least 5.5lbs) in Baltimore City **increased** from 87.7% to 88.4%. In 2016, the CSAs

### Teen Birth Rate in Baltimore City, 2010-2016

SOURCE: MARYLAND VITAL STATISTICS

with the **highest** percentage of births with satisfactory birth weight were Canton (96.0%) and South Baltimore (95.3%); the CSAs with the **lowest** percentage of births with satisfactory birth weight were Clifton-Berea (77.9%) and Edmondson Village (80.0%).

#### Early Prenatal Care

Between 2015 and 2016, the percentage of births where the mother received early prenatal care (care that began during the first trimester of pregnancy) in Baltimore City **increased** slightly from 50.4% to 50.9%. In 2016, the CSAs with the **highest** percentage of births where the mother received early prenatal care were Canton (79.2%) and Greater Roland Park/Poplar Hill (76.0%). The CSAs with the **lowest** percentages of mothers receiving early prenatal care included Pimlico/Arlington/Hilltop (37.4%), Belair-Edison (40.5%), and Southwest Baltimore (41.7%).

### Life Expectancy and Mortality<sup>6</sup>

Life expectancy (how long one might expect to live) and mortality rates (chances of dying) are fundamental health outcomes that are increasingly correlated with other indicators about a person's neighborhood. *Vital Signs 16* reports life expectancy at birth and mortality rates for five age categories. These two indicators are inversely related; CSAs with low life expectancy have high rates of mortality in the younger age categories.

#### Life Expectancy

Between 2015 and 2016, the life expectancy at birth in Baltimore City **declined** from 73.6 years to 73.2 years. The CSAs with the **highest** life expectancy were Cross-Country/Cheswolde (85.2 years), Greater Roland Park/Poplar Hill (83.6 years), and North Baltimore/Guilford/Homeland (83.5 years). The CSAs with the **lowest** life expectancy

#### Data Key

**Green colored text** denotes a positive change.

**Red colored text** denotes a negative change.

**Blue colored text** denotes a neutral change.

4. CSAs are groups of census tracts that correspond to neighborhoods which vary in size. See *Vital Signs 16* Introduction.

5. Birth outcome data comes from the Maryland Department of Vital Statistics. Of the 8,526 births recorded in Baltimore City in 2016, 26 births (0.3%) were not assigned to any one part of the city.

6. Data and methodology provided by the Baltimore City Department of Health.

# Data Story: Preventing Teen Pregnancy in Baltimore

For nearly a decade, B'more for Healthy Babies (BHB), Baltimore's infant mortality reduction strategy, has worked with over 150 partners across Baltimore to ensure that all Baltimore babies and families thrive. Baltimore's teen birth rate is calculated by the number of teen births in girls aged 15-19 per 1,000 girls aged 15-19. The negative effects of early childbearing affect the health, education, and employment opportunities of young mothers and fathers. The long-term implications for offspring include lack of opportunity, risks of poor health, and adverse developmental outcomes. In addition to adverse outcomes, teen parents often experience stigma that prevent them from accessing care and opportunities.

In 2010, BHB established the Teen Pregnancy Prevention Initiative (known as U Choose) a multi-agency task force committed to reducing unintended teen pregnancies. U Choose is the key message of the campaign. It speaks to young people's desire to make their own decisions about their future and reproductive health. U Choose operates on multiple levels to create change. U Choose convenes a monthly coalition to provide strategic direction, planning, and implementation of activities. The U Choose coalition received federal funding to implement evidence-based teen pregnancy prevention curricula in all Baltimore middle and high schools and clinics reaching over 10,000 youth annually. U Choose works to improve clinical services for adolescents and improve teens' access to family planning services through provider training and youth-friendly care. The Youth Advisory Council (YAC) is central to U Choose's success. Comprised of Baltimore City youth, the YAC meets frequently to provide feedback and launch ideas for the initiative. Members are trained as peer health advocates and utilize various forms of media and outreach activities to educate other youth. The YAC runs the U Choose Campaign

**Teen Birth Rate in Baltimore City by CSA, 2016**

that empowers youth to plan for their future by providing them with reproductive and sexual health information in a fun and interactive way.

U Choose's work for the last eight years to improve outcomes for young people resulted in a 49% reduction of teen births and significant reduction to disparity: 47% reduction in disparities between Latinx and White teens and a 75% reduction in disparities between Black and White teens.

**By the Baltimore City Health Department**

## Children and Family Health

were Downtown/Seton Hill (66.4 years), Southwest Baltimore (67.1 years), and Clifton-Berea (67.4 years).

### Infant Mortality

The infant mortality rate measures the average number of deaths over a 5-year period in persons under the age of one per 1,000 live births. During 2012-2016, the infant mortality rate was 9.5 per 1,000 live births in Baltimore City. The CSAs with the **highest** infant mortality rate were Cherry Hill (19.9), Southern Park Heights (19.7), and Clifton-Berea (18.0). Mt. Washington/Coldspring experienced an infant mortality rate of **zero**.

### Mortality Ages 1-14

During 2012-2016, Baltimore City's age-specific mortality rate for persons aged 1-14 was 2.3 per 10,000 persons. There were 14 CSAs with **zero** deaths of persons in this age group. The CSAs with the **highest** mortality rates were Downtown/Seton Hill (25.9) and Midway/Coldstream (6.3).

### Mortality Ages 15-24

During 2012-2016, Baltimore City's age-specific mortality rate for persons aged 15-24 was 11.5 per 10,000 persons. Greater Roland Park/Poplar Hill experienced a mortality rate of **zero** for this age group. The CSAs with the **highest** rates were Pimlico/Arlington/Hilltop (31.8) and Sandtown-Winchester/Harlem Park (26.6).

### Mortality Ages 25-44

During 2012-2016, Baltimore City's age-specific mortality rate for persons aged 25-44 was 25.3 per 10,000 persons. The CSAs with the **lowest** rates were Canton (5.1) and Inner Harbor/Federal Hill (5.9). The CSAs with the **highest** rates were Southwest Baltimore (54.3) and Greenmount East (52.9).

### Mortality Ages 45-64

During 2012-2016, Baltimore City's age-specific mortality rate for persons aged 45-64 was 122.3 per 10,000 persons. The CSAs with the **highest** rates were Poppleton/The Terraces/Hollins Market (195.9), Clifton-Berea (189.5), and Upton/Druid Heights (184.5). The CSAs with the **lowest** rates were Greater Roland Park/Poplar Hill (32.3), Mt. Washington/Coldspring (39.9), and Cross-Country/Cheswolde (47.4).

SOURCE: BALTIMORE CITY HEALTH DEPARTMENT

## Children and Family Health

**Mortality Ages 65-84**

During 2012-2016, Baltimore City's age-specific mortality rate for persons aged 65-84 was 387.3 per 10,000 persons. The CSAs with the **highest** rates were Downtown/Seton Hill (730.6) and Claremont/Armistead (571.4). The CSAs with the **lowest** rates were Greater Roland Park/Poplar Hill (182.9) and Cross-Country/Cheswolde (190.4).

**Mortality Ages 85+**

During 2012-2016, Baltimore City's age-specific mortality rate for persons 85 and over was 1,311.9 per 10,000 persons. The CSAs with the **highest** rates were Midway/Coldstream (2,076.2) and The Waverlies (1,938.8). The CSAs with the **lowest** rates were Cross-Country/Cheswolde (888.6), Midtown (1,008.4), and Medfield/Hampden/Woodberry/Remington (1,027.6).

**Lead Poisoning<sup>7</sup>**

Although lead-based paint has been banned in the United States since 1978, many Baltimore homes were constructed prior to the ban and continue to contain paint and other sources of lead toxic to human health. When human blood lead levels are high, it can affect many organs and tissues including heart, kidneys, bones, and the nervous system. In children, elevated levels of lead in the blood can lead to permanent learning and behavior disorders. Baltimore has been a leader for remediating the effects of lead poisoning through organizations such as the Green & Healthy Homes Initiative<sup>8</sup>.

**Children Tested for Elevated Blood Lead Levels**

From 2015 to 2016, the total number of children between the ages of 0 and 6 tested for elevated levels of lead in their blood **decreased** by 1.9%, from 17,222 to 16,892<sup>9</sup>. In 2016, the **greatest** number of children tested for elevated blood lead were in Cedonia/Frankford (337 children), Brooklyn/Curtis Bay/Hawkins Point (310 children), and Beechfield/Ten Hills/West Hills (295 children).

**Percent of Children with Elevated Blood Lead Levels**

From 2015 to 2016, the percent of children age 0-6 tested and identified with elevated blood lead levels **decreased** from 1.2% to 1.0%. Of the 47 CSAs that reported having children tested for elevated levels of blood lead in 2016, only 4 CSAs had children found to have elevated blood lead levels: Greenmount East (6.3%), Sandtown-Winchester/Harlem Park (2.5%), Midway/Coldstream (2.5%), and Madison/East End (2.4%).

**Social Assistance Programs<sup>10</sup>**

Baltimore residents have access to several federal programs aimed at assisting people during times of financial distress. The uptake of these programs ebbs and flows with economic cycles but also varies by neighborhoods in the City. *Vital Signs 16* tracks Temporary Assistance to Needy Families (TANF), a program administered through the Maryland Department of Human Resources.

**Families Receiving TANF**

Between 2015 and 2016, the percent of families in Baltimore City who received TANF support at some point during the year **decreased** from 8.7% to 7.9%. The CSAs with the **highest** percentage of families receiving TANF were Clifton-Berea (19.1), Madison/East End (17.6%), and Southwest Baltimore (17.5%). The CSAs with the **lowest** percentage included Mount Washington/Coldspring (0.1%), Canton (0.2%) and South Baltimore (0.4%).

**Built Environment**

A neighborhood's built environment (buildings, streets, stores, etc.) provide the context for human activity and can directly or indirectly impact the ability of residents to live healthy lives. High concentrations of establishments that sell alcohol can have adverse effects on crime and safety.<sup>11</sup> *Vital Signs 16* tracks the density of off-premise liquor outlets.

7. "Middle Neighborhoods: Action Agenda for a National Movement" Summary Report Prepared by Paul C. Brophy, Pamela Puchalski, and Stephanie Sung (2017). <http://middleneighborhoods.org/summary-report/>

8. Vicki Been, Ingrid Gould Ellen, Katherine O'Regan (2018). "Supply Skepticism: Housing Supply and Affordability" Hosing Policy Debate

9. Due to either non-reporting lead testing for census tracts with low numbers (7,819 children are in census tracts with < 5) or no information on the location of children tested (1,390 children are in unknown census tracts), only 2/3 of the total citywide number of children tested are available at the CSA-level.

10. Source of data is the Maryland Department of Human Resources through a data sharing agreement with the Jacob France Institute. Research has shown that administrative records yield significantly higher counts of participation in government safety-net programs compared with survey (Census) estimates. Lynch et al (2008) "Differences in Estimates of Public Assistance Reciprocity Between Surveys and Administrative Records" [www.ubalt.edu/jfi/jfi/reports/TANFJan2008.pdf](http://www.ubalt.edu/jfi/jfi/reports/TANFJan2008.pdf)

## Children and Family Health

### Liquor Outlet Density

Between 2015 and 2016, the density of off-premise liquor outlets in Baltimore City, where alcohol can be taken out of the establishment that sells it, **remained the same** at 1.1 per 1,000 persons. The **highest** density of liquor stores was in Downtown/Seton Hill (5.4 per 1,000 persons) and Highlandtown (5.0 per 1,000 persons). There were **zero** liquor stores in Cross-Country/Cheswolde and Dickeyville/Franklinton.

### Food Security (From Previous Vital Signs)

The Johns Hopkins Center for Livable Future (CLF) has been mapping<sup>12</sup> and conducting primary research on food security and accessibility in Baltimore for many years. CLF prepared community-based indicator on fast food/prepared-food and average healthy food availability index).

### Healthy Food Availability Index

From 2012 to 2015, the average healthy food availability index for Baltimore City **declined** from 10.3 to 9.4. The CSAs with the **highest** average healthy food availability index ranking were Mt. Washington/Coldspring (28.5), Canton (15.2), and South Baltimore (14.0). The CSAs with the **lowest** average healthy food availability index ranking included Cross-Country/Cheswolde (0.0) Dickeyville/Franklinton (2.0), and Claremont/Armistead (6.6).

### Density of Fast or Prepared Food

From 2011 to 2013, the density of fast or prepared food in Baltimore **increased** from 1.4 stores per 1,000 residents to 1.5 stores per 1,000 residents. In 2013, the CSAs with the **highest** density of fast food outlets per 1,000 residents were Downtown/Seton Hill (25.6), Madison/East End (5.0), and Inner Harbor/Federal Hill (4.4). Twenty-two CSAs had less than 1.0 fast food outlets per 1,000 residents. The CSAs with the **lowest** density of fast food outlets per 1,000 residents included Cross-Country/Cheswolde (0.0), Dickeyville/Franklinton (0.0) and Edmonson Village (0.1).

# Children and Family Health

## Indicator Definitions and Rankings

For each indicator reported in *Vital Signs 16*, we provide the data source, the years for which it is reported, and the five CSAs with the highest and lowest values for the indicator; these may not correspond to positive or negative trends.<sup>1</sup>

### Birth Outcome Indicators

#### Teen Birth Rate

Measure of birth among young persons.

Definition: The rate of female teens aged 15-19 that gave birth per 1,000 females aged 15-19. (MARYLAND DEPARTMENT OF VITAL STATISTICS, 2010, 2011, 2012, 2013, 2014, 2015, 2016; U.S. CENSUS, 2010)

##### Five Highest:

1. Brooklyn/Curtis Bay/Hawkins Point
2. Cherry Hill
3. Pimlico/Arlington/Hilltop
4. Westport/Mount Winans/Lakeland
5. Highlandtown

##### Five Lowest:

1. Greater Roland Park/Poplar Hill, Mount Washington/Coldspring, South Baltimore
2. North Baltimore/Guilford/Homeland
3. Midtown
4. Greater Charles Village/Barclay
5. Cross-Country/Cheswolde

#### Percent of Births Delivered at Term

Measures the portion of births that are considered to be full-term and likely to result in a healthier baby.

Definition: The percentage of births delivered at term measures the percentage of births in a calendar year where the baby is delivered between 37 and 42 weeks of gestation. (MARYLAND DEPARTMENT OF VITAL STATISTICS 2010, 2011, 2012, 2013, 2014, 2015, 2016)

##### Five Highest:

1. Fells Point
2. Greater Roland Park/Poplar Hill
3. Cross-Country/Cheswolde
4. Northwood
5. Chinquapin Park/Belvedere

##### Five Lowest:

1. Clifton-Berea
2. Poppleton/The Terraces/Hollins Market
3. Belair-Edison
4. Upton/Druid Heights
5. Dickeyville/Franklintown

#### Percent of Babies

#### Born with a Satisfactory Birth Weight

Measure of babies born at a healthy weight.

Definition: The percentage of children born with a birth weight of at least 5 ½ pounds out of all births in the area. (MARYLAND DEPARTMENT OF VITAL STATISTICS 2010, 2011, 2012, 2013, 2014, 2015, 2016)

##### Five Highest:

1. Canton
2. South Baltimore
3. Mount Washington/Coldspring
4. Fells Point
5. Glen-Fallstaff

##### Five Lowest:

1. Clifton-Berea
2. Edmondson Village
3. Pimlico/Arlington/Hilltop
4. Dickeyville/Franklintown
5. Belair-Edison, Greenmount East

#### Percent of Births Where the Mother Received Early Prenatal Care

Measure of healthy pregnancies and healthy babies.

Definition: The percentage of births where the mother received prenatal care during the first trimester of the pregnancy in a calendar year out of all births within an area. This information is calculated by the Vital Statistics registration information collected from each live birth. (SOURCE: MARYLAND DEPARTMENT OF VITAL STATISTICS 2010, 2011, 2012, 2013, 2014, 2015, 2016)

##### Five Highest:

1. Canton
2. Greater Roland Park/Poplar Hill
3. North Baltimore/Guilford/Homeland
4. South Baltimore
5. Medfield/Hampden/Woodberry/Remington

##### Five Lowest:

1. Pimlico/Arlington/Hilltop
2. Belair-Edison
3. Southwest Baltimore
4. Southern Park Heights
5. Greater Rosemont

## Lead Poisoning Indicators

### Number of Children Tested for Elevated Blood Lead Levels

Measure of child testing for the potential of elevated blood lead levels.

Definition: This indicator reflects the total number of children aged 0-6 who are tested for the presence of blood lead in a calendar year. (SOURCE: MARYLAND DEPARTMENT OF THE ENVIRONMENT, LEAD POISONING PREVENTION PROGRAM, 2010, 2011, 2012, 2013, 2014, 2015, 2016)

#### Five Highest:

1. Cedonia/Frankford
2. Brooklyn/Curtis Bay/Hawkins Point
3. Beechfield/Ten Hills/West Hills
4. Southwest Baltimore
5. Northwood

#### Five Lowest:

Six CSAs did not report for 2016.

### Percent of Children with Elevated Blood Lead Levels

Measure of high exposure to lead for young children.

Definition: The number of children aged 0-6 that are found to either have elevated blood lead levels ( $\geq 10$  Mg/dL) or lead poisoning ( $\geq 20$  Mg/dL) out of the number of children tested within an area in a calendar year. (SOURCE: MARYLAND DEPARTMENT OF THE ENVIRONMENT, LEAD POISONING PREVENTION PROGRAM, 2010, 2011, 2012, 2013, 2014, 2015, 2016)

#### Five Highest:

1. Greenmount East
2. Sandtown-Winchester/Harlem Park
3. Midway/Coldstream
4. Madison/East End

#### Five Lowest:

Forty-four CSAs had no children found to have elevated blood lead levels in 2016.

## Life Expectancy and Mortality Indicators

### Life Expectancy at Birth

Summarizes health over the entire lifespan.

Definition: The average number of years a newborn can expect to live, assuming he or she experiences the currently prevailing rates of death through their lifespan. (SOURCE: VITAL STATISTICS MORTALITY DATA, 2007-2011, 2008-2012, 2009-2013, 2010-2014, 2011-2015, 2012-2016, ANALYSIS BY: BALTIMORE CITY HEALTH DEPARTMENT)

#### Five Highest:

1. Cross-Country/Cheswolde
2. Greater Roland Park/Poplar Hill
3. North Baltimore/Guilford/Homeland
4. Mount Washington/Coldspring
5. Inner Harbor/Federal Hill

#### Five Lowest:

1. Downtown/Seton Hill
2. Southwest Baltimore
3. Clifton-Berea
4. Greenmount East
5. Poppleton/The Terraces/Hollins Market

### Infant Mortality

Measure of death rate in persons under one year of age.

Definition: The number of infant deaths (babies under one year of age) per 1,000 live births within the area in a five year period. This is the most stable and commonly measured indicator of mortality in this age group. (SOURCE: VITAL STATISTICS MORTALITY DATA, 2007-2011, 2008-2012, 2009-2013, 2010-2014, 2011-2015, 2012-2016, ANALYSIS BY: BALTIMORE CITY HEALTH DEPARTMENT)

#### Five Highest:

1. Cherry Hill
2. Southern Park Heights
3. Clifton-Berea
4. Pimlico/Arlington/Hilltop
4. Midway/Coldstream

#### Five Lowest:

1. Mount Washington/Coldspring
2. South Baltimore
3. North Baltimore/Guilford/Homeland
4. Morrell Park/Violetville
5. Westport/Mount Winans/Lakeland

## Children and Family Health

**Mortality by Age  
1-14 years old**

Measure of death rate for persons between one and 14 years old.

Definition: The number of deaths of persons between the ages of one and 14 per 10,000 persons within the area in a five year period. (SOURCE: VITAL STATISTICS MORTALITY DATA, 2007-2011, 2008-2012, 2009-2013, 2010-2014, 2011-2015, 2012-2016, ANALYSIS BY: BALTIMORE CITY HEALTH DEPARTMENT)

**Five Highest:**

1. Downtown/Seton Hill
2. Midway/Coldstream
3. Greater Charles Village/Barclay
4. Greater Mondawmin
5. Westport/Mount Winans/Lakeland

**Five Lowest:**

Fourteen CSAs reported zero deaths for this age in 2016.

**Mortality by Age  
15-24 years old**

Measure of death rate for persons between 15 and 24 years old.

Definition: The number of deaths of persons between the ages of 15 and 24 per 10,000 persons within the area in a five year period. (SOURCE: VITAL STATISTICS MORTALITY DATA, 2007-2011, 2008-2012, 2009-2013, 2010-2014, 2011-2015, 2012-2016, ANALYSIS BY: BALTIMORE CITY HEALTH DEPARTMENT)

**Five Highest:**

1. Pimlico/Arlington/Hilltop
2. Sandtown-Winchester/Harlem Park
3. Upton/Druid Heights
4. Midway/Coldstream
5. Dorchester/Ashburton

**Five Lowest:**

1. Greater Roland Park/Poplar Hill
2. Midtown
3. North Baltimore/Guilford/Homeland
4. Canton
5. Highlandtown

**Mortality by Age  
25-44 years old**

Measure of death rate for persons between 25 and 44 years old.

Definition: The number of deaths of persons between the ages of 25 and 44 per 10,000 persons within the area in a five year period. (SOURCE: VITAL STATISTICS MORTALITY DATA, 2007-2011, 2008-2012, 2009-2013, 2010-2014, 2011-2015, 2012-2016, ANALYSIS BY: BALTIMORE CITY HEALTH DEPARTMENT)

**Five Highest:**

1. Southwest Baltimore
2. Greenmount East
3. Clifton-Berea
4. Greater Mondawmin
5. Sandtown-Winchester/Harlem Park

**Five Lowest:**

1. Canton
2. Inner Harbor/Federal Hill
3. Greater Roland Park/Poplar Hill
4. South Baltimore
5. Fells Point

**Mortality by Age  
45-64 years old**

Measure of death rate for persons between 45 and 64 years old.

Definition: The number of deaths of persons between the ages of 45 and 64 per 10,000 persons within the area in a five year period. (SOURCE: VITAL STATISTICS MORTALITY DATA, 2007-2011, 2008-2012, 2009-2013, 2010-2014, 2011-2015, 2012-2016, ANALYSIS BY: BALTIMORE CITY HEALTH DEPARTMENT)

**Five Highest:**

1. Poppleton/The Terraces/Hollins Market
2. Clifton-Berea
3. Upton/Druid Heights
4. Madison/East End
5. Southwest Baltimore

**Five Lowest:**

1. Greater Roland Park/Poplar Hill
2. Mount Washington/Coldspring
3. Cross-Country/Cheswolde
4. North Baltimore/Guilford/Homeland
5. Inner Harbor/Federal Hill

## Mortality by Age 65-84 years old

Measure of death rate for persons between 65 and 84 years old.

Definition: The number of deaths of persons between the ages of 65 and 84 per 10,000 persons within the area in a five year period. (SOURCE: VITAL STATISTICS MORTALITY DATA, 2007-2011, 2008-2012, 2009-2013, 2010-2014, 2011-2015, 2012-2016, ANALYSIS BY: BALTIMORE CITY HEALTH DEPARTMENT)

### Five Highest:

1. Downtown/Seton Hill
2. Claremont/Armistead
3. Washington Village/Pigtown
4. Brooklyn/Curtis Bay/Hawkins Point
5. Southwest Baltimore

### Five Lowest:

1. Greater Roland Park/Poplar Hill
2. Cross-Country/Cheswolde
3. North Baltimore/Guilford/Homeland
4. Mount Washington/Coldspring
5. Glen-Fallstaff.

## Mortality by Age 86 and Over

Measure of death rate for persons between 85 years old and above.

Definition: The number of deaths of persons 85 years and older per 10,000 persons within the area in a five year period. (SOURCE: VITAL STATISTICS MORTALITY DATA, 2007-2011, 2008-2012, 2009-2013, 2010-2014, 2011-2015, 2012-2016, ANALYSIS BY: BALTIMORE CITY HEALTH DEPARTMENT)

### Five Highest:

1. Midway/Coldstream
2. The Waverlies
3. Belair-Edison
4. South Baltimore
5. Beechfield/Ten Hills/West Hills

### Five Lowest:

1. Cross-Country/Cheswolde
2. Midtown
3. Medfield/Hampden/Woodberry/Remington
4. Morrell Park/Violetville
5. North Baltimore/Guilford/Homeland

## Social Assistance Indicators

### Percentage of Families

#### Receiving TANF

Measure of uptake of federal cash assistance.

Definition: Temporary Assistance for Needy Families (TANF) is a federal assistance program. TANF provides temporary financial assistance while aiming to get people off of that assistance, primarily through employment. (SOURCE: MARYLAND DEPARTMENT OF HUMAN RESOURCES, 2011, 2012, 2013, 2014, 2015, 2016 U.S. CENSUS, 2010)

### Five Highest:

1. Clifton-Berea
2. Madison/East End
3. Southwest Baltimore
4. Poppleton/The Terraces/Hollins Market
5. Cherry Hill

### Five Lowest:

1. Mount Washington/Coldspring
2. Canton
3. South Baltimore
4. Greater Roland Park/Poplar Hill
5. Fells Point

## Built Environment and Food Security

### Liquor Outlet Density

Measures the concentration of access to off-premise liquor.

Definition: This indicator reflects the number of business establishments that possess a Class A (Off Sale package goods no on-premises consumption - 6 days, 6:00 a.m. - Midnight. No Sunday sales except Sundays between Thanksgiving Day and New Year's Day upon issuance of a special license for each Sunday) or BD7 (tavern) business license that allows them to sell beer, wine, or liquor. Other liquor licenses to restaurants or on-premise consumption were not included in this analysis. This number is provided by 1,000 residents to allow for comparison across neighborhoods. (SOURCE: BALTIMORE CITY LIQUOR BOARD 2011, 2012, 2013, 2014, 2015, 2016 U.S. CENSUS 2010)

### Five Highest:

1. Downtown/Seton Hill
2. Highlandtown
3. Canton
4. Fells Point
5. South Baltimore

### Five Lowest:

1. Cross-Country/Cheswolde, Dickeyville/Franklinton
2. Northwood
3. Beechfield/Ten Hills/West Hills
4. Cherry Hill
5. Edmondson Village

## Children and Family Health

**Fast Food Outlet Density (From Vital Signs 13)**

Measures the concentration of prepared foods (ready-made, to-go meals and snacks) locations.

Definition: The Johns Hopkins Center for a Livable Future (CLF) obtained the food permit list from the Baltimore City Health Department in August 2011, which includes all sites that sell food, such as stores, restaurants, and temporary locations such as farmers' market stands and street carts. The restaurants were grouped into three categories, including full service restaurants, fast food chains, and carryouts. Carryout and fast food chain restaurants were extracted from the restaurant layer and spatially joined with the 2010 Community Statistical Area (CSA) data layer, provided by BNIA-JFI. The prepared foods density, per 1,000 people, was calculated for each CSA using the CSA's population and the total number of carryout and fast food restaurants, including vendors selling prepared foods in public markets. (SOURCE: BALTIMORE CITY HEALTH DEPARTMENT, 2011, 2013 ANALYSIS BY: JOHNS HOPKINS CENTER FOR A LIVABLE FUTURE)

**Five Highest:**

1. Downtown/Seton Hill
2. Madison/East End
3. Inner Harbor/  
Federal Hill
4. Oldtown/Middle East
5. Harbor East/Little Italy

**Five Lowest:**

1. Cross-Country/  
Cheswolde
2. Dickeyville/  
Franklintown
3. Edmondson Village
4. Loch Raven
5. Forest Park/Wallbrook

**Average Healthy Food Availability Index (from Vital Signs 15)**

The Baltimore City Healthy Food Availability Index (HFAI) is a quantitative depiction of the availability of healthy and whole food in supermarkets, small groceries & corner stores, convenience stores, and other stores that sell food.

Definition: The Johns Hopkins Center for a Livable Future (CLF) calculated HFAI scores for all food stores in Baltimore, in summer 2012, using an adapted version of the NEMS-S (Nutrition Environment Measures Survey in Stores) tool. The NEMS-S tool was developed by researchers at the Rollins School of Public Health at Emory University to measure the nutritional environment of food retail stores and was designed to assess healthy food availability in grocery and convenience stores. CLF obtained a food permit list from the Baltimore City Health Department in August 2011, which includes all sites that sell food, such as stores, restaurants, and temporary locations such as farmers' market stands and street carts. HFAI scores range from zero to 28.5, with higher scores indicating more availability of healthy and whole food in a food store. (SOURCE: BALTIMORE CITY HEALTH DEPARTMENT, 2011, 2014, ANALYSIS BY: JOHNS HOPKINS CENTER FOR A LIVABLE FUTURE (CLF) 2012, 2015)

**Five Highest:**

1. Mt. Washington/  
Coldspring
2. Canton
3. South Baltimore
4. Highlandtown
5. Southeastern

**Five Lowest:**

1. Cross-Country/  
Cheswolde
2. Dickeyville/  
Franklintown
3. Claremont/Armistead
4. Edmondson Village
5. Greater Rosemont

# Crime and Safety

In April 2015, the City of Baltimore erupted into civil and racial unrest following the death of Freddie Grey while in police custody. For the rest of the year, Baltimore was plagued with violence in many of its communities, with 342 homicides—nearly a murder a day over the year. During this period, arrest rates declined and many residents voiced their frustration at the Baltimore Police Department through public demonstrations.<sup>1</sup>

The following year, the City continued to experience higher rates of violent crimes, yet lower arrest rates. In August 2016, a U.S. Department of Justice investigation concluded that the city had violated federal anti-discrimination laws as well as multiple Constitutional Amendments by conducting unlawful searches, arrests, unreasonable force, and racial targeting.<sup>2</sup> A consent decree was issued for Baltimore City, laying out reforms for the department, ending “zero tolerance” policing strategies in favor of a more community-oriented approach with greater accountability and oversight.

The indicators presented in *Vital Signs 16* detail the overall crime and safety trends within the city and the variation across its communities. It is important to recognize the context for many of the statistics presented in this chapter; the individual narratives of Baltimore’s communities vary and each area faces its own unique challenges or successes. The resiliency of each community is dependent on its ability to adapt to changes in the community, new policies in policing, and collaboration around shared goals for safety and improved quality of life.

Now more than ever, having access to reliable, consistent data is crucial for accountability, community goalsetting, and measuring progress towards a city that is safe and just. Baltimore City’s Open Baltimore data portal<sup>3</sup> now includes frequently updated datasets from the Baltimore Police Department, including 911 calls for service, adult arrests, and crime incidents which are included in the national Uniform Crime Report<sup>4</sup> cooperative statistical reporting. These datasets are used in *Vital Signs 16* to create several

indicators on general crime and safety, arrests, specific reported incidents, and has developed a new indicator on street lighting, focusing on its role in overall neighborhood safety and victimization.

## General Crime and Safety

Four indicators are tracked in *Vital Signs 16* reflecting general crime and safety measures: Part I crime rate, violent crime rate, gun-related homicides, and property crime rate. Incidents of crime reported in Part I of the UCR are considered the more serious criminal offenses. These offenses are categorized as either violent crimes (homicide, rape, aggravated assault, and robbery) or property crimes (burglary, larceny, and auto theft). The violent and property crime rates are derived from these two categories. The indicator for homicides that were committed with a firearm looks at one specific offense within the Part I dataset.

4. Uniform Crime Reporting <https://ucr.fbi.gov>

### Part I Offenses

Between 2015 and 2016, the Part I crime rate in Baltimore City **decreased** from 65.1 offenses per 1,000 residents to 63.0 offenses per 1,000 residents. From 2015 to 2016, 33 of the 55 CSAs<sup>5</sup> experienced a **decrease** in the Part I crime rate. The greatest **decreases** in offenses per 1,000 residents occurred in Harbor East/Little Italy (-30), Fells Point (-20.6), and The Waverlies (-19.5). Despite the citywide trend, the Part I crime rate **increased** most significantly in Downtown/Seton Hill (+30), Westport/Mt. Winans/Lakeland (+23.5), and Brooklyn/Curtis Bay/Hawkins Point (+18.7).

### Violent Offenses

The subset of Part I crimes that makeup the violent crime rate **increased**, from 16.1 violent offenses per 1,000 residents in 2015 to 17.6 per 1,000 persons in 2016. In 2016, Downtown/Seton Hill (97.6 incidents per 1,000), Harbor East/Little Italy (40.7), Washington Village/Pigtown (40.2), and Poppleton/The Terraces/Hollins Market (34.8) had the **highest** rates of violent crime. In 2016, the communities with the **lowest** rates of violent crime were concentrated in northern Baltimore City, in Cross-Country/Cheswolde (1.8), Greater Roland Park/Poplar Hill (4.1), and North Baltimore/Guilford/Homeland (6.0). South Baltimore, which includes the Locust Point neighborhood, also had one of the **lowest** violent crime rates in the City.

### Homicides

Baltimore City experienced 318 homicides in 2016, a **decrease** from the 342 reported in 2015. In 2016, over 86% of the deaths were a result of a shooting. In 2015, communities in West Baltimore had the **highest** rates of gun homicide; in 2016, communities all across Baltimore were experiencing an increase in their homicide rate. Areas with the **highest** rates of gun homicides in 2016 included Madison/East End (1.7 incidents per 1,000 residents), Midway/Coldstream (1.7), Greater Mondawmin (1.3), Southwest Baltimore (1.3), and Sandtown-Winchester/Harlem Park (1.2). Two additional communities saw a notable **increase** in their rates from 2015 to 2016: Cherry Hill (0.1 incidents per 1,000 to 0.7) and Howard Park/West Arlington (0.5 to 0.9).

### Property Crime

The property crime rate citywide **decreased** from 48.2 to 44.5 incidents per 1,000 between 2015 and 2016. The

### Total Number of Part I Crimes by Type in Baltimore City, 2016

Source: Baltimore City Police Department

communities with the **highest** rates of property crime incidents per 1,000 residents were Downtown/Seton Hill (195.3), Washington Village/Pigtown (105.6), Harbor East/Little Italy (84.7), and Orangeville/East Highlandtown (79.3). Many CSAs experienced notable **decreases** in their property crime rate from 2015 to 2016, including Harbor East/Little Italy, Fells Point, Cherry Hill, Chinquapin Park/Belvedere, and Allendale/Irvington/S. Hilton.

### Arrests

The relationship between incidents of crime and arrests in a neighborhood is often complicated—not all crime incidents lead to a direct and immediate arrest; one person may be arrested for more than one crime; and, not all arrests lead to charges being filed by the State's Attorney. Furthermore, arrest data only reflects the locations of arrests, not necessarily the location of the crime.

The rate of adults arrested per 1,000 adult residents aged 18 and above provides information about where police action is occurring. This data from the Baltimore City Police Department reflects all adults who were arrested and processed through the Central Booking and Intake facility. Continuing the trend started in 2015 following the

5. CSAs are groups of census tract that correspond to neighborhoods. See *Vital Signs 16* Introduction for more details.

civic unrest, the year 2016 saw continued low arrest rates for most of the communities in Baltimore.

From 2015 to 2016 the adult arrest rate **declined** from 30.9 to 20.5 arrests per 1,000 adults. The CSAs with the **highest** arrest rates were Downtown/Seton Hill (95.7 arrests per 1,000), Washington Village/Pigtown (60.0), Upton/Druid Heights (57.8), and Southwest Baltimore (56.0).

The **lowest** arrest rates in 2016 were seen in the northern region of Baltimore, in Cross-Country/Cheswolde (0.5), Mount Washington/Coldspring (1.6), and Greater Roland Park/Poplar Hill (2.0), in addition to Canton and South Baltimore.

### Juvenile Arrests (from Vital Signs 15)

The juvenile arrest rate in Baltimore City **decreased** city-wide from 2014 to 2015. *Vital Signs 15* includes three indicators related to juvenile crime: juvenile arrest rate, juvenile arrest rate for violent offenses, and juvenile arrest rate for drug-related offenses. Each of these indicators is normalized by the number of persons living in the community between the ages of 10 and 17.

Arrests are analyzed for the purposes of this report, rather than crimes committed, because not all juveniles arrested are charged with committing a crime; these indicators also exclude offenders who are later charged as adults. Furthermore, the indicators are calculated by the place of arrest, not by where the crime had been committed. As the rates show, many CSAs near the city center, such as Downtown/Seton Hill, Midtown, Inner Harbor/Federal Hill, and Fells Point have low residential juvenile populations, suggesting that rates may be skewed by youth arrests at various points of interest where juveniles may congregate, such as businesses, parks, transit hubs, and so on. Juvenile arrests for drugs are the exception; the highest rates for this indicator in 2015 are away from the city center.

### Juvenile Arrest Rate

In 2015, the overall juvenile arrest rate in Baltimore City was 32.7 arrests per 1,000 juveniles. The CSAs with the **highest** rates include Downtown/Seton Hill (450 arrests per 1,000), Inner Harbor/Federal Hill (186.0), Midtown (117.5), and Highlandtown (91.7).

### Juvenile Violent Offenses

Juvenile violent offenses include arrests for murder, rape, attempted rape, aggravated assault, and robbery. In regards to arrests for violent offenses, the city rate was 8.5 arrests per 1,000 youth for Baltimore City. The CSAs with the **highest** arrest rates include Downtown/Seton Hill (122.2 arrests per 1,000 juveniles), Midtown (60.4), Fells Point (54.9), and Inner Harbor/Federal Hill (28.9). Three CSAs in 2015 had **zero** juvenile arrests for violent offenses: Canton, Cross-Country/Cheswolde, and Dickeyville/Franklintown.

### Juvenile Drug Related Arrests

For drug-related arrests, Baltimore City had an arrest rate of 4.7 per 1,000 youth. Drug-related offenses include arrests for possession, sale, manufacture, or abuse of illegal drugs. Alcohol is also included for this indicator since it is illegal for juveniles to possess or consume alcohol. A total of thirteen CSAs had **zero** juvenile arrest for drugs in 2015. The communities that had the **highest** rates included Highlandtown (30.6 arrests per 1,000 juveniles), Southwest Baltimore (29.7), Washington Village/Pigtown (17.9), and Pimlico/Arlington/Hilltop (17.0). The latter three communities also had the **highest** rates of calls for service to 911 for narcotics in 2015.

### Specific Crime Reports and Accidents

In order to address residents' concerns about safety and quality of life, *Vital Signs 16* includes four indicators developed using calls for service to the Baltimore City Police Department. Calls for service are both calls from persons using 911 and calls initiated by police officers who are on duty. These indicators include reported shootings, common assaults, reports of narcotics, and automotive accidents. Each of these indicators is presented per 1,000 residents allowing for comparison across each of the CSAs. Data on auto accidents was not included in this edition of *Vital Signs*.<sup>6</sup>

6. Please see the section on Changes and Explanations for more details

## Crime and Safety

### Shootings

In 2016, there were 1,916 calls for shootings in Baltimore City for a rate of 1.9 reports per 1,000 residents. This is a **decrease** from 3.2 per 1,000 in 2015. The CSAs with the **highest** rates of shootings were Oldtown/Middle East (7.0), Downtown/Seton Hill (6.1), Madison/East End (5.8), and Midway/Coldstream (5.2), the latter two also having among the **highest** rates of gun homicides in Baltimore City in 2016. Five Communities had **zero** 911 calls for shootings: Canton, Cross-Country/Cheswolde, Greater Roland Park/Poplar Hill, Inner Harbor/Federal Hill, and South Baltimore.

From 2015 to 2016, the rate in calls for service for shootings **reduced** by over 5 points in three communities: Downtown/Seton Hill, which had its rate halved from 12.7 to 6.1 reports per 1,000 residents, Pimlico/Arlington/Hilltop, and Sandtown-Winchester/Harlem Park (see Data Story).

### Common Assaults

The Baltimore City rate of 911 calls for common assaults in 2016 was 55.9 per 1,000 residents, a considerable **decrease** from 71.9 the previous year. Although Downtown/Seton Hill continued to have the highest rate of common assault calls for service at 195.3 per 1,000 residents, it was a **drop** from 404.1 in 2015. The CSAs with the **lowest** rates were concentrated in the outer edges of the city, including Cross-Country/Cheswolde, Greater Roland Park/Poplar Hill, Mt. Washington/Coldspring, and North Baltimore/Guilford/Homeland.

Only four CSAs experienced an **increase** in the rate of 911 calls for common assaults: Claremont/Armistead (+12.5), Morrell Park/Violetville (+9.2), Forest Park/Walbrook(+6.5), and Cedonia/Frankford(+1.5).

### Narcotics

In 2016, Baltimore City's rate of 911 calls for narcotics was 53.0 calls per 1,000 residents, or 47,494 total calls. The top five CSAs for narcotics calls all had rates three times **higher** than the city rate: Washington Village/Pigtown (219.5 calls per 1,000 residents), Pimlico/Arlington/Hilltop (215.1), Upton/Druid Heights (207.3), Sandtown-Winchester/Harlem Park (175.7), and Southwest Baltimore (167.6). All five Communities are located in West Baltimore.

Many communities had notable **decreases** in the number of calls for service for narcotics from 2015 to 2016, including Downtown/Seton Hill (-106.6), Poppleton/The Terraces/Hollins Market(-79.2), and Pimlico/Arlington/Hilltop (-55.3 despite being the second-highest CSA for calls).

### Auto Accidents (From Vital Signs 15)

With any examination of the number of motor vehicle accident calls for service per 1,000 residents it is important to note that not every accident is reported to the Police Department and therefore is not included in the calls for service data. Some communities that contain portions of high speed roads such as highways and interstates often have higher reported numbers of calls.

In 2015, the rate of automobile accident calls for service was 75.9 per 1,000 residents in Baltimore City. The CSAs with the **highest** rates include Downtown/Seton Hill 475.5 per 1,000 residents), Washington Village (201.3), Orangeville/East Highlandtown (184.9), and Oldtown/Middle East (165.8). The **lowest** rates mostly occurred in CSAs that boarder the Baltimore City and Baltimore County line, with Cross-Country/Cheswolde reporting the **lowest** rate of automobile accidents: 12.0 per 1,000 residents.

### Personal Safety

*Vital Signs 15* presented new research on developing an indicator on the rate of street light outages being reported to the 311 system. This research was an outcome of over three years of work that Baltimore Neighborhood Indicators Alliance-Jacob France Institute conducted as the data evaluation team and embedded research partner for the Byrne Criminal Justice Innovation Grant (BCJI) in McElderry Park, Baltimore. The grant was focused on community-driven approaches to crime reduction and evidence-based solutions for implementation. A literature review conducted by the University of Baltimore's School of Criminal Justice found that improvements in lighting have reduced both crime victimization and perceptions of crime risk.<sup>7</sup>

Examining communities that have high, persistent rates of 311-calls for street light outages is crucial, as these areas may have increased levels of victimization, as darkness can provide a cover for a variety of both property and violent offenses. Data for this indicator originates from calls for service requests, which occur when residents or

Accessible online at [https://bniajfi.org/wp-content/uploads/2014/10/Evidence-Based-Programs-and-Practices\\_Final.pdf](https://bniajfi.org/wp-content/uploads/2014/10/Evidence-Based-Programs-and-Practices_Final.pdf).

# Data Story: Reducing Shootings and Homicides Through Safe Streets Baltimore

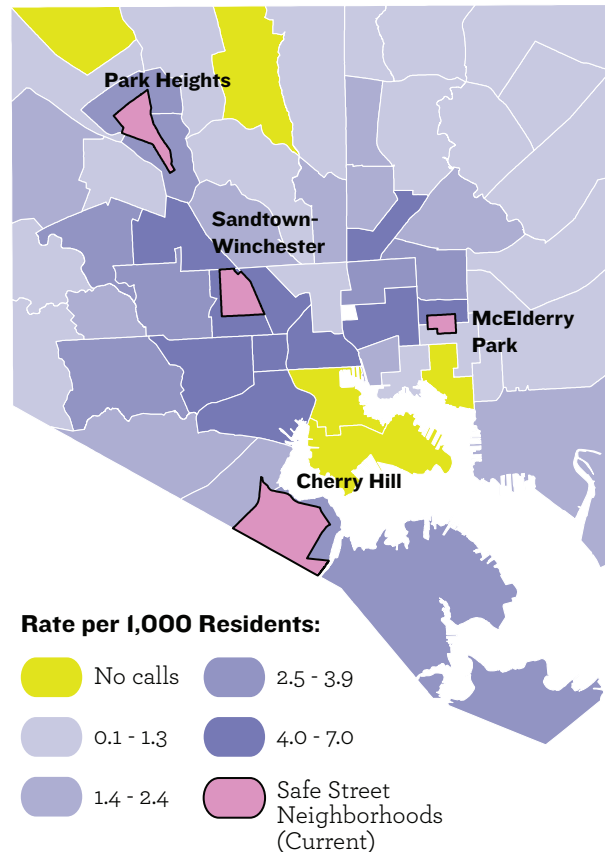

Safe Streets Baltimore is an interdisciplinary program with primary on reducing homicides through the use of guns. The program uses a public health approach to reducing violence, and utilizing the Cure Violence model as a guide. The philosophy of Cure Violence maintains that violence is a learned behavior that can be prevented using disease control methods. Safe Streets Baltimore works primarily with high-risk youth, aged 14 to 25, through regular individual interactions, conflict mediation, and community mobilization. Using proven public health techniques the program improves neighborhood safety through focusing on the prevention of violence through a three-prong approach:

1. Identification & detection
2. Interruption, Intervention, & risk reduction
3. Changing behavior and norms

Safe Streets Baltimore is a data-driven model to support its effort to identify and detect potential acts of violence. Through a combination of statistical information and street knowledge staff identify where to concentrate efforts, focus our resources, and intervene in violence. This data guides staff to communities most impacted by violence. It provides a picture of those individuals at the highest-risks for violence, and shows staff how to intervene. Safe Streets Baltimore staff intervenes in crises, mediates disputes between individuals, and intercedes in group disputes to prevent acts of violence. Staff are experienced and well-trained professionals from the communities they represent. These individuals have criminal backgrounds and strong reputations in the community. Staff understand who holds the influence in communities, and who they need to engage to deescalate situations before and act of violence occurs.

A major focus of staff is to change behaviors and norms of neighborhoods. This is achieved through staff working at the community-level and for society-at-large. For disproportionately impacted communities violence has come to be accepted as an appropriate—even expected—way to solve conflict. At the street-level staff provide tools to resolve conflicts in alternative ways. Safe Streets Baltimore looks to shift the discourse toward the view of violence as a disease and placing the emphasis on finding solutions to end this epidemic.

**Rate of Calls for Service for Shootings by CSA, 2016**

There are many success with the Safe Streets program and a few include having three of the four sites having more than 365 days without a fatal shooting. One of the sites has more than 500 days without a fatal shooting.

By the Mayor's Office of Criminal Justice

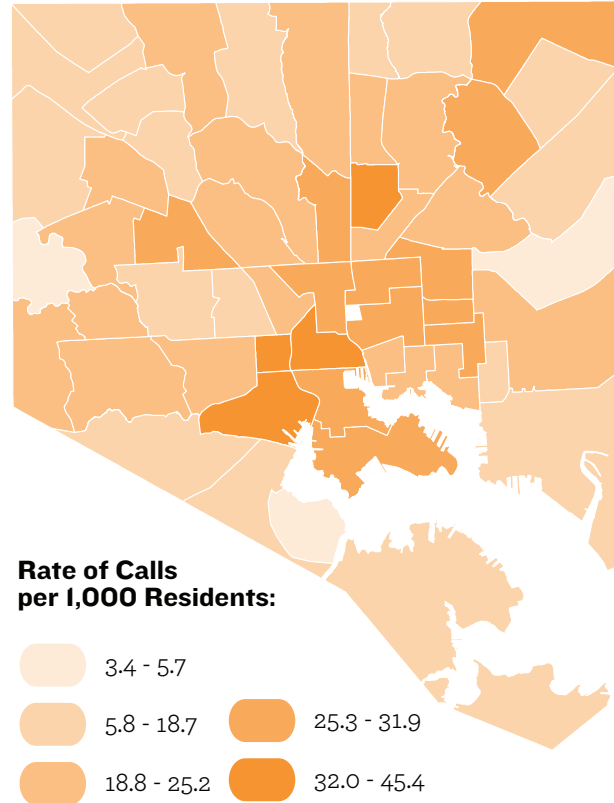

workers call the city's 311 line, use the mobile phone application, or files a request with the city's website.

#### Rate of Street Light Outages

In 2016, Baltimore City's rate of street light outages was 21.4 reports per 1,000 residents. The communities with the **highest** rates of reports calls per 1,000 residents include Washington Village/Pigtown (45.4), Downtown/Seton Hill (41.7), Poppleton/The Terraces/Hollins Market (35.8), and The Waverlies (35.3). These communities are also home to many businesses, a research park, and universities so higher rates may be due to employees and students calling in requests, in addition to residents.

The **lowest** rates of outage reports come from lower density, more predominantly residential neighborhoods: Cherry Hill (3.4 reports per 1,000 residents), Dickeyville/Franklin-town (4.9), and Claremont/Armistead (5.7).

#### Rate of Calls for Service for Street Light Outages by CSA, 2016

## Crime and Safety

### Indicator Definitions and Rankings

For each indicator reported in *Vital Signs 16*, we provide the data source, the years for which it is reported, and the five CSAs with the highest and lowest values for the indicator; these may not correspond to positive or negative trends.

### Crime and Safety

#### Crime Rate

Measures the overall rate of Part 1 crimes in an area.

Definition: The Part I crime rate captures incidents of homicide, rape, aggravated assault, robbery, burglary, larceny, and auto theft that are reported to the Police Department. These incidents are per 1,000 residents in the neighborhood to allow for comparison across areas. (SOURCE: BALTIMORE CITY POLICE DEPARTMENT, 2010, 2011, 2012, 2013, 2014, 2015, 2016; U.S. CENSUS, 2010)

##### Five Highest:

1. Downtown/Seton Hill
2. Washington Village/Pigtown
3. Harbor East/Little Italy
4. Oldtown/Middle East
5. Orangeville/East Highlandtown

##### Five Lowest:

1. Cross-County/Cheswolde
2. Greater Roland Park/Poplar Hill
3. Loch Raven
4. Northwood
5. North Baltimore/Guilford/Homeland

#### Violent Crime Rate

Measures the rate of violent crimes, a subset of all Part I crimes, in an area.

Definition: The violent crime rate measures the number of Part I crimes identified as being violent (homicide, rape, aggravated assault, and robbery) that are reported to the Police Department. These incidents are per 1,000 residents in the neighborhood to allow for comparison across areas (SOURCE: BALTIMORE CITY POLICE DEPARTMENT, 2010, 2011, 2012, 2013, 2014, 2015, 2016; U.S. CENSUS, 2010)

##### Five Highest:

1. Downtown/Seton Hill
2. Harbor East/Little Italy
3. Washington Village/Pigtown
4. Poppleton/The Terraces/Hollins Market
5. Oldtown/Middle East

##### Five Lowest:

1. Cross-County/Cheswolde
2. Greater Roland Park/Poplar Hill
3. South Baltimore
4. North Baltimore/Guilford/Homeland
5. Dickeyville/Franklintown

**Property Crime Rate**

Measures the rate of personal property crimes, a subset of all Part I crimes, in an area.

Definition: The property crime rate measures the number of Part 1 crimes identified as being property-based (burglary and auto theft) that are reported to the Police Department. These incidents are per 1,000 residents in the neighborhood to allow for comparison across areas. (SOURCE: BALTIMORE CITY POLICE DEPARTMENT, 2011, 2012, 2013, 2014, 2015, 2016; U.S. CENSUS, 2010)

**Five Highest:**

1. Downtown/Seton Hill
2. Washington Village/Pigtown
3. Harbor East/Little Italy
4. Orangeville/East Highlandtown
5. Southeastern

**Five Lowest:**

1. Cross-Country/Cheswolde
2. Loch Raven
3. Edmondson Village
4. Northwood
5. Greater Roland Park/Poplar Hill

**Rate of Gun-Related Homicides**

Measures the gun-related homicides in an area.

Definition: The rate of homicides by firearm as reported in the Part 1 crime data per 1,000 residents in an area. (SOURCE: BALTIMORE CITY POLICE DEPARTMENT, 2011, 2012, 2013, 2014, 2015, 2016; U.S. CENSUS, 2010)

**Five Highest:**

1. Madison/East End
2. Midway/Coldstream
3. Greater Mondawmin
4. Southwest Baltimore
5. Sandtown-Winchester/Harlem Park

**Five Lowest:**

Eleven CSAs reported no gun-related homicides.

**Arrests****Rate of Adult Arrests**

Measures the rate of arrests for adults in an area.

Definition: The rate of arrests for adults aged 18+ per 1,000 adult residents in an area. This indicator is calculated by where an individual was arrested and not by where the crime was committed. This indicator includes arrests for all charges processed at Baltimore's Central Booking & Intake Facility. (SOURCE: BALTIMORE CITY POLICE DEPARTMENT, 2014, 2015, 2016; U.S. CENSUS, 2010)

**Five Highest:**

1. Downtown/Seton Hill
2. Southeast Baltimore
3. Clifton-Berea
4. Madison/East End
5. Sandtown-Winchester/Harlem Park

**Five Lowest:**

1. Cross-Country/Cheswolde
2. Mount Washington/Coldspring
3. Greater Roland Park/Poplar Hill
4. Canton
5. South Baltimore

**Juvenile Crime**

(From Vital Signs 15)

**Juvenile Arrest Rate**

Measures the rate of arrests for juveniles in an area.

Definition: The number of persons aged 10 to 17 arrested per 1,000 juveniles that live in an area. This indicator is calculated by where the arrested juvenile was arrested and not by where the crime is committed. Arrests are used instead of crimes committed since not all juveniles that are arrested are charged with committing a crime. This indicator also excludes offenders who are later charged as adults for their crime(s). (SOURCE: BALTIMORE CITY POLICE DEPARTMENT, 2011, 2012, 2013, 2014, 2015; U.S. CENSUS, 2010)

**Five Highest:**

1. Downtown/Seton Hill
2. Inner Harbor/Federal Hill
3. Midtown
4. Highlandtown
5. Greater Charles Village/Barclay

**Five Lowest:**

1. Cross-Country/Cheswolde
2. Dickeyville/Franklinton
3. Beechfield/Ten Hills/West Hills
4. Forest Park/Walbrook
5. Edmondson Village

### Juvenile Arrest Rate for Drug-Related Offenses

Measures the juvenile arrest rates for drug-related offences in an area.

Definition: The number of persons aged 10 to 17 for drug-related offenses per 1,000 juveniles that live in an area. Drug-related offenses include arrests for possession, sale, manufacture, or abuse of illegal drugs, including alcohol. This indicator is calculated by where the arrested juvenile was arrested and not by where the crime is committed. Arrests are used instead of crimes committed since not all juveniles that are arrested are charged with committing a crime. This indicator also excludes offenders who are later charged as adults for their crime(s). (SOURCE: BALTIMORE CITY POLICE DEPARTMENT, 2011, 2012, 2013, 2014, 2015; U.S. CENSUS, 2010)

#### Five Highest:

1. Highlandtown
2. Southwest Baltimore
3. Washington Village/Pigtown
4. Pimlico/Arlington/Hilltop
5. Downtown/Seton Hill

#### Five Lowest:

Thirteen CSAs did not have any juvenile arrests for drug-related offences.

### Juvenile Arrest Rate for Violent Offenses

Measure of juveniles arrests for violent offences in an area.

Definition: The number of persons aged 10 to 17 arrested for violent offenses per 1,000 juveniles that live in an area. Violent offenses may include homicide, rape, assault (with or without a weapon), and robbery. This indicator is calculated by where the arrested juvenile was arrested and not by where the crime is committed. Arrests are used instead of crimes committed since not all juveniles that are arrested are charged with committing a crime. This indicator also excludes offenders who are later charged as adults for their crime(s). (SOURCE: BALTIMORE CITY POLICE DEPARTMENT, 2011, 2012, 2013, 2014, 2015; U.S. CENSUS, 2010)

#### Five Highest:

1. Downtown/Seton Hill
2. Midtown
3. Fells Point
4. Inner Harbor/Federal Hill
5. Patterson Park North & East

#### Five Lowest:

1. Canton
2. Cross-Country/Cheswolde
3. Hamilton
4. Beechfield/Ten Hills/West Hills
5. Claremont/Armistead Edmondson Village Loch Raven

## Specific Crime Reports and Accidents

### Rate of Shootings Calls

Measure of non-fatal shootings in an area.

Definition: The rate of 911 calls for shootings per 1,000 residents in an area. Since the data comes from 911 calls, it is possible that multiple calls could be made for a single incident. (SOURCE: BALTIMORE CITY POLICE DEPARTMENT, 2015, 2016; U.S. CENSUS, 2010)

#### Five Highest:

1. Oldtown/Middle East
2. Downtown/Seton Hill
3. Madison/East End
4. Midway/Coldstream
5. Upton/Druid Heights

#### Five Lowest:

Five CSAs reported no calls for service for shootings (Canton, Cross-Country/Cheswolde, Greater Roland Park/Poplar Hill, Inner Harbor/Federal Hill, and South Baltimore).

### Rate of Common Assault Calls

Measure of common assault calls for service in an area.

Definition: The rate of calls for assaults that do not involve a weapon per 1,000 residents in an area. Since the data comes from 911 calls, it is possible that multiple calls could be made for a single incident. (SOURCE: BALTIMORE CITY POLICE DEPARTMENT, 2015, 2016; U.S. CENSUS, 2010)

#### Five Highest:

1. Downtown/Seton Hill
2. Washington Village/Pigtown
3. Brooklyn/Curtis Bay/Hawkins Point
4. Southwest Baltimore
5. Oldtown/Middle East

#### Five Lowest:

1. Cross-Country/Cheswolde
2. Greater Roland Park/Poplar Hill
3. Mount Washington/Coldspring
4. North Baltimore/Guilford/Homeland
5. Canton

## Crime and Safety

### Rate of Narcotics-Related Calls

Measures drug-related activity in an area.

Definition: The rate of calls for narcotics per 1,000 residents in an area. Since the data comes from 911 calls, it is possible that multiple calls could be made for a single incident. (SOURCE: BALTIMORE CITY POLICE DEPARTMENT, 2015, 2016; U.S. CENSUS, 2010)

#### Five Highest:

1. Washington Village/Pigtown
2. Pimlico/Arlington/Hilltop
3. Upton/Druid Heights
4. Sandtown-Winchester/Harlem Park
5. Southwest Baltimore

#### Five Lowest:

1. Cross-Country/Cheswolde
2. Greater Roland Park/Poplar Hill
3. Canton
4. Fells Point
5. Inner Harbor/Federal Hill

### Rate of Motor Vehicle Accident Calls

Measure of auto-accidents in an area.

Definition: The rate of calls for accidents involving motor vehicles per 1,000 residents in an area. Since the data comes from 911 calls, it is possible that multiple calls could be made for a single incident. Additionally, not every accident involving a motor vehicle is reported to the Police Department. (SOURCE: BALTIMORE CITY POLICE DEPARTMENT, 2015; U.S. CENSUS, 2010)

#### Five Highest:

1. Downtown/Seton Hill
2. Washington Village/Pigtown
3. Orangeville/East Highlandtown
4. Oldtown/Middle East
5. Southeastern

#### Five Lowest:

1. Cross-Country/Cheswolde
2. Harford/Echodale
3. North Baltimore/Guilford/Homeland
4. Cherry Hill
5. Edmondson Village

## Personal Safety

### Rate of 311 Calls for

### Street Light Outages per 1,000 Residents

Measure of neighborhood lighting.

Definition: The rate of service requests for street light outages through Baltimore's 311 system per 1,000 residents. More than one service request may be made for the same issue but is logged as a unique request. (SOURCE: BALTIMORE CITY CITISTAT, 2016; U.S. CENSUS, 2010)

#### Five Highest:

1. Washington Village/Pigtown
2. Downtown/Seton Hill
3. Poppleton/The Terraces/Hollins Market
4. The Waverlies
5. Midtown

#### Five Lowest:

1. Cherry Hill
2. Dickeyville/Franklintown
3. Claremont/Armistead
4. Cross-Country/Cheswolde
5. Glen-Fallstaff

# Workforce and Economic Development

In 2016, newly-elected Mayor Catherine Pugh identified workforce development and business expansion as one of five key focus areas for her administration. Neighborhood employment data from the Vital Signs report served as a catalyst for Mayor Pugh's initiative to create the Baltimore Mobile Job units to travel to communities with high rates of unemployment and offer assistance to residents seeking work.<sup>1,2</sup>

Early indications exist of the effectiveness of this neighborhood-focused effort. Over the course the year, data from the Maryland Department of Labor and Licensing show that the unemployment rate in Baltimore City dropped from 7% in January of 2016 to 5.8% in December 2016. However, despite this improvement, the city's unemployment rate remained higher in comparison to the State of Maryland unemployment rate of 4.1%.<sup>3</sup>

In addition to more proximate resources for job-seekers, several initiatives in Baltimore are aimed at supporting local business and local hiring. The Baltimore Integration Partnership (BIP) is a collaborative partnership of anchor institutions, funders, nonprofits, and local organizations whose goal is to connect low-income Baltimore City residents to greater economic opportunity. This is achieved through various means including increasing anchor institutions' purchasing from small, local, and minority- and women-owned businesses (procurement), and by connecting low-income residents to jobs within the City's anchor institutions and anchor-supporting businesses (hiring).

As an example, Johns Hopkins University, including Johns Hopkins Health Care System, is one of the largest anchor institutions in Baltimore and has committed to increasing both its local procurement and hiring through two initiatives, BLocal and HopkinsLocal. During the first year of these programs, Hopkins, along with other program partners, increased spending by over \$15 million with Baltimore-based businesses for goods and services and

hired over 770 new employees from Baltimore City neighborhoods.<sup>4,5</sup>

There are additional locally-based efforts to help small businesses succeed in the city. *Made in Baltimore*, now run by the Baltimore Office of Sustainability, supports local makers and manufacturers through a local-brand certification program, promotion and marketing events (including a retail store), and business development services.<sup>6</sup> These initiatives help to create diverse communities that are rich in economic opportunity all across the city.

## Data

For *Vital Signs 16*, eighteen workforce and economic development indicators are tracked for Community Statistical Areas (CSAs)<sup>7</sup> and which measure the City's progress towards sustainable economic development. These indicators highlight the important role of Baltimore as both a major source of labor and as a center of economic activity. Indicators are grouped into the following categories: labor force participation and employment; educational attainment; commercial investment activity; business size and age; neighborhood businesses; and regional dynamics. These indicators provide fundamental data on the City's economic assets and that can be incorporated into data-driven decision making processes.

Data for *Vital Signs 16* Workforce and Economic Development Indicators comes from the 2012–2016 American Community Survey (ACS), InfoUSA, and the Baltimore

## Workforce and Economic Development

City Department of Housing and Community Development. Data from the Maryland Division of Parole and Probation were not available for updating at the time of release. When possible, indicators are created by normalizing data by the number of residents or commercial properties to establish rates that allow for comparison across neighborhoods and over time.

### Jobs

The Number of Total Jobs comes from the Longitudinal Employer-Household Dynamics (LEHD) database.<sup>8</sup>Including this indicator enables the ability to track job creation year-over-year, giving us even more insight into the health of Baltimore City's economy.

#### Total Number of Jobs (2015)

Between 2014 and 2015, the total number of jobs in Baltimore City increased from 344,588 to 350,797. The CSAs with the **highest** number of jobs were Downtown/Seton Hill (78,158), Oldtown/ Middle East (27,354), and Orangeville/East Highlandtown (15,235). The CSAs with the **lowest** number of jobs were Edmondson Village (176), Dick-eyville/Franklinton (212), and Madison/East End (429).

#### Total Number of Jobs in Baltimore City 2011-2015

SOURCE: LONGITUDINAL EMPLOYER-HOUSEHOLD DYNAMICS (LEHD)

#### Data Key

**Green colored text** denotes a positive change.

**Red colored text** denotes a negative change.

**Blue colored text** denotes a neutral change.

### Labor Force Participation and Employment

Residents of Baltimore City who are of working age fall into three main categories: in the labor force (employed), actively seeking employment (unemployed), and those who are not in the labor force either by choice or by circumstance. Residents who are discouraged or believe that they cannot find work and therefore are not actively seeking a job are classified as not in the labor force.

Based on the 2012-2016 ACS, 61.6% of city residents of working age (between 16 and 64 years old) were employed and 8.9% of the city's working age residents unemployed and seeking work. Combined, these figures represent the city's total labor force, which means that almost one-third (30.3%) of the city's working age residents were not in the labor force.

#### Employed

Between 2006-2010 and 2012-2016, the percentage of employed working age city residents **decreased** by 0.5%, and the percentage of working age city residents not in the labor force **increased** by 0.6%. During 2012-2016, the CSAs with the **highest** percentage of working-age residents who were employed were Canton (88.1%), South Baltimore (86.6%), Fells Point (83.7%), and the Inner Harbor (82.5%). The CSAs with the **lowest** percentage of working age residents who were employed were Oldtown/Middle East (43.6%), Southern Park Heights (45.6%), Upton/Druid Heights (45.7%), Greenmount East (47.0%), and Sandtown-Winchester/Harlem Park (48.3%).

#### Unemployed and Looking for Work

During 2012-2016, the CSAs with the **highest** percentage of unemployed persons looking for work were Midway/Coldstream (17.3%), Madison/East End (16.3%), and Greenmount East (16.2%). The CSAs with the **lowest** percentage of unemployed persons seeking work lived in Canton (3.0%), Downtown/Seton Hill (3.3%), Fells Point (4.0%), Inner Harbor/Federal Hill (4.0%), and South Baltimore (4.1%).

#### Not in the Labor Force

The CSAs with **highest** percentage of residents not in the labor force included Oldtown/Middle East (50.0%), Upton/Druid Heights (45.2%), and Greater Charles Village/Barclay (44.5%). The CSAs with the **lowest** percentage were Fells Point (13.1%), Inner Harbor/Federal Hill (14.7%), Highlandtown (16.0%), Canton (9.7%), and South Baltimore (10.1%).

8. The latest available data on the number of jobs comes from the Longitudinal Employee-Household Dynamics (LEHD) U.S. Census Bureau which was updated in January 2018 to include 2015 data. [www.onthemap.ces.census.gov](http://www.onthemap.ces.census.gov)

## Workforce and Economic Development

### Unemployment Rate

Focusing only on the population in the labor force, the unemployment rate measures the share of jobless persons who are looking for work in Baltimore City. Between 2006–2010 and 2012–2016, the unemployment rate **increased** by 1.1%, from 11.7% to 12.8%. The unemployment rate by CSA from 2012–2016 ranged from a **low** of 3.3% in Canton to a **high** of 25.8% in Greenmount East.

### Regional Dynamics

*Vital Signs* tracks the percentage of residents from each CSA who work outside the city using the Longitudinal Employer-Household Dynamics (LEHD) data. Approximately 25% of all jobs in the metropolitan area are located in Baltimore City, which means that many Baltimore residents need access to some form of transportation to the 75% of jobs that are elsewhere in the region. At the time of this report's publication, 2016 LEHD data had not yet been released. The data for 2015 are given below.

### Residents from Each CSA

#### Who Work Outside the City (2015)

Based on the 2015 LEHD, over half (53.5%) of Baltimore City's residents commuted to work outside of the city. The CSAs with the **smallest** percentage of workers that commute outside of the city were Downtown/Seton Hill (40.7%), Harbor East/Little Italy (43.2%), and Midtown (43.5%). The CSAs where the **largest** percentage of workers commuted outside of the city to work were Brooklyn/Curtis Bay/Hawkins Point (71.9%), Morrell Park/Violetville (69.3%), and Westport/Mount Winans/Lakeland (63.5%).

### Educational Attainment

Education and training are major pathways to employment. More than half of the new jobs expected to be created between 2010 and 2020 will require educational training beyond a high school diploma.<sup>9</sup> Education at the level of a bachelor's degree or higher influences lifetime potential earnings<sup>10</sup> and increases the likelihood that individuals will earn a living wage.<sup>11</sup> *Vital Signs 16* tracks three indicators on educational attainment for the multiple stages of high school through college education. These categories are mutually exclusive in that a survey respondent can

only be in one category and the total of the three categories sums to 100%.

### Less Than a High School Diploma or GED

Based on the 2012–2016 ACS, 17.5% of Baltimore residents over the age of 25 had not obtained a high school diploma. The CSAs with the **largest** percentage of residents without a high school diploma were Southwest Baltimore (33.4%), Orangeville/East Highlandtown (33.2%), Midway/Coldstream (30.8%), and Oldtown/Middle East (30.3%). The CSAs with the **smallest** percentage were Greater Roland Park/Poplar Hill (0.8%), North Baltimore/Guilford/Homeland (3.2%), Canton (4.3%), and Cross-Country/Cheswolde (4.6%).

### High School Diploma and

#### Some College or Associate Degree

During the 2012–2016 time period, more than half (53.7%) of the city's residents over the age of 25 obtained a high school diploma and/or completed some college or received an associate's degree. The CSAs with the **largest** percentage of residents over the age of 25 with a high school degree, some college, or an associate degree were Edmondson Village (72.4%), Greenmount East (70.8%), and Cherry Hill (70.6%). The CSAs with the **smallest** percentage were Greater Roland Park/Poplar Hill (17.4%), Fells Point (23.2%), and North Baltimore/Guilford/Homeland (23.3%).

### Bachelor's Degree or Above

During the 2012–2016 time period, 29.7% of the City's residents over the age of 25 had a Bachelor's degree, a Graduate degree, or a Professional degree. The CSAs with the **highest** percentage of residents with a Bachelor's degree or above were Greater Roland Park/Poplar Hill (81.8%), North Baltimore/Guilford/Homeland (73.6%), Fells Point (72.2%), and Mt. Washington/Coldspring (69.6%). The CSAs with the **lowest** percentage of residents with college degrees were Sandtown-Winchester/Harlem Park (5.8%), Brooklyn/Curtis Bay/Hawkins Point (6.4%), and Madison/East End (7.3%).

## Workforce and Economic Development

### Commercial Investment Activity

Commercial properties and establishments in neighborhoods are an important part of urban life for the jobs as well as the amenities they provide. Upkeep of commercial properties is an indicator of commercial investment and is equally important to owners of residential properties in the area as their respective values are mutually dependent. The number of commercial properties **decreased**<sup>12</sup> during the past few years and the percentage of businesses applying for, and receiving, rehabilitation permits has remained **steady** since 2010.

### Number of Commercial Properties

The number of commercial properties in Baltimore City was 15,317 in 2016. The CSAs with the **highest** number of commercial properties were Downtown/Seton Hill (1,201), Midtown (781), Brooklyn/Curtis Bay/Hawkins Point (758), and Southwest Baltimore (648). The CSA's with the **lowest** number of commercial properties were Cross-Country/Cheswolde (28), Dickeyville/ Franklintown (30), Edmondson Village (33), and Beechfield/Ten Hills/West Hills (45).

### Rehabilitation Permits of over \$5,000

Between 2015 and 2016, the percentage of commercial properties that applied for and received a rehabilitation permit greater than \$5,000 **decreased** slightly from 13.4% to 12.7%. In 2016, the CSAs with the **largest** percentage of commercial businesses with rehabilitation permits greater than \$5,000 were South Baltimore (36.9%) and Loch Raven (36.5%). The CSAs with the **smallest** percentage of commercial properties with a rehabilitation permit were Southwest Baltimore (2.8%), Midway/Coldstream (2.8%), and Upton/Druid Heights(2.9%).

### Business Size and Age<sup>13</sup>

The majority of businesses in the United States are small- to mid-size firms<sup>14</sup>. Aside from clusters of major business activity in the downtown or regional centers, most firms are located in Baltimore's neighborhoods. The ability to start and sustain a business is often related to the environment in the surrounding area that enables entrepreneurship and viability (see Data Story).

### Total Number of Businesses

Overall in 2016, Baltimore City had 19,019 businesses. The CSAs with the **highest** number of businesses were Downtown/Seton Hill (2,774), Midtown (1,055), Medfield/Hampden/Woodberry/Remington (852), Greater Charles Village/Barclay (848), and Inner Harbor/Federal Hill (793). The CSAs with the **lowest** number of businesses were Dickeyville/Franklintown (44) and Edmondson Village (54).

### Number of Businesses with Fewer than 50 Employees

In 2016, the number of small businesses (businesses reporting fewer than 50 employees) in Baltimore City was 17,416; 14.5% were located in the Downtown/Seton Hill CSA. Aside from Downtown/Seton Hill, the CSAs with the **highest** number of small businesses were Midtown (937), and Medfield/ Hampden/Woodberry/Remington (781). The CSAs with the **lowest** number of small businesses were Dickeyville/ Franklintown (40), Edmondson Village (52), and Poppleton/The Terraces/Hollins Market (108).

### Businesses One Year Old or Less

In 2016, 6.1% of businesses located in Baltimore City were less than one year old. The CSAs with the **highest** percentage of businesses less than one year old were located in Oldtown/ Middle East (21.7%), Pimlico/Arlington/Hilltop (12.4%), and Edmondson Village (11.1%). The CSAs with the **lowest** percent were Southern Park Heights (0.6%), Harford/Echodale (1.1%), and Lauraville (1.5%).

### Businesses Two Years Old or Less

In 2016, the percentage of businesses located in Baltimore City that were less than two years old was 18.6%. The CSAs with the **highest** percentage of firms that were less than two years old were Oldtown/Middle East (50.4%), Dickeyville/Franklintown (31.8%), and Edmondson Village (25.9%). The CSAs with the **lowest** percentage of firms that were less than two years old were Claremont/Armistead (7.2%), Lauraville (8.0%), and Penn North/Reservoir Hill (9.7%).

12. In 2012, Baltimore City and the Downtown Partnership began promoting and incentivizing conversion of Class B & C office space to multifamily residential space to adaptively reuse commercial spaces and meet the growing demand for rental housing choices.

13. Due to InfoUSA's survey methodology, which consists of compiling a list of publicly-available phone numbers to conduct a sample phone survey, some businesses, such as those without landlines, are not represented. Additionally, firms with multiple branches may report total employment out of a single location, distorting employee counts by geography. For this reason, year-over-year comparisons of the data are not recommended.

14. US Small Business Administration.[www.sba.org](http://www.sba.org)

# Data Story: Small Business Access to Capital

Baltimore's small businesses form the backbone of the local economy, providing tax revenue for the city, jobs for residents, and services and identities to neighborhoods and commercial districts. The city's small businesses are as diverse as the neighborhoods where they are located, ranging from breweries and restaurants to electrical contracting companies and robotics manufacturers to tech startups and cyber security firms.

The Johns Hopkins 21st Century Cities Initiative (21CC) has been researching the flows of commercial loans, microloans, venture capital and other equity investments, business grants, and other investment vehicles in order to better understand whether the financing system catering to Baltimore's small businesses is sufficiently expansive and diverse to support the entire landscape of companies and their varying needs for launching, growing, and thriving in Baltimore.

In 2016, small businesses located in the City of Baltimore accessed more than \$580 million from over 8,900 loan, equity investment, and grant transactions. These transactions ranged from microloans under \$5,000, including one made by a local, nonprofit Community Development Financial Institution (CDFI), to several later stage venture capital funding rounds over \$20 million made by Silicon Valley and nationally based venture capital firms. Also included in the data are bank and credit card business loans, Small Business Administration guaranteed loans, and a number of federal, state, and city loan, grant, and investment programs, all of which comprise most of the formal small business financial system. Not included in the dataset are investments from friends and families, as well as loans from small and de novo banks and emerging online lenders.

The map reveals patterns of investment in small businesses across the city. As might be expected, the downtown, inner harbor neighborhoods that comprise the city's central business district attracted a large dollar amount of investment in 2016, \$110 million in total, in an area with a total of 793 businesses. Also to be expected, historically underserved markets such as Upton/Druid Heights have a small dollar amount of investments, \$560,000\*, despite being home to a significant number of businesses, 228 in total. Perhaps somewhat surprising, seemingly isolated neighborhoods that house successful tech and startup incubators, such as the Waverlies, can result in large sums of business investments coming into the community, \$10 million\* in this case, but relatively few businesses in the neighborhood, just 167. One neighborhood that stands out as a potential model for being home to a healthy, diverse small business community

**Total Dollar Amounts Invested in Small Businesses per 50 Businesses, 2016**

is Southeastern, where a mix of Main Street businesses, port related industries, and tech startups (414 total businesses) received \$24 million\* in financing in 2016.

Cultivation of a vibrant and growing startup and small business scene is a top priority for a range of public and private stakeholders in Baltimore. This case study illustrates the geographic patterns of investment in small businesses across the city and may prove useful in informing place-based economic development and public-private investment strategies. In addition, ongoing monitoring of these investments and regular reporting can be an effective tool for measuring the success or failure of such strategies.

For more information on the data sources and to read the report Financing Baltimore's Growth: *Measuring Small Companies' Access to Capital*, visit the 21CC website: <http://21cc.jhu.edu/publications/reports/financing-baltimores-growth-measuring-small-companies-access-to-capital/>

\*This figure is not adjusted per 50 businesses, as is the case in the map.

By The Johns Hopkins 21st Century Cities Initiative

## Workforce and Economic Development

### Businesses Four Years Old or Less

In 2016, the percentage of businesses located in Baltimore City that were less than four years old was 29.5%. The CSAs with the **highest** percentage of firms that were less than four years old were Oldtown/Middle East (50.4%), Dickeyville/Franklinton (40.9%), and Edmondson Village (37.0%). The CSAs with the **lowest** percentage of firms that were less than four years old were Claremont/Armistead (16.3), Greenmount East (18.8), Midway/Coldstream (20.0), Belair-Edison (20.2), and Lauraville (20.9).

### Neighborhood Businesses

Access to neighborhood amenities helps attract and retain residents to an area, especially in an urban context. Neighborhood businesses for the following *Vital Signs 16* indicators include coffee shops, doctors' offices, grocery stores and retail shops.

#### Number of Neighborhood Businesses

The number of neighborhood businesses in Baltimore City in 2016 was 13,154. The **greatest** number of neighborhood businesses were located in the Downtown/Seton Hill (2,061), Midtown (713), Oldtown/Middle East (668), and Greater Charles Village/Barclay (610). The **smallest** number of neighborhood businesses were located in

Dickeyville/Franklinton (30) and Edmondson Village (38).

#### Neighborhood Businesses per 1,000 Residents

In 2016, there were 21.1 neighborhood businesses per 1,000 residents in Baltimore City. The CSAs with the **largest** number of neighborhood businesses per 1,000 residents included Downtown/Seton Hill (319.7 per 1,000 residents), Oldtown/Middle East (66.7 per 1,000 residents), Harbor East/Little Italy (60.5 per 1,000 residents), and Midtown (47.5 per 1,000 residents). The CSAs with the **smallest** number of neighborhood businesses per 1,000 residents included Edmondson Village (4.8 per 1,000 residents), Northwood (5.6 per 1,000 residents), and Beechfield/Ten Hills/West Hills (6.2 per 1,000 residents).

#### Employees of Neighborhood Businesses

The number of persons employed in neighborhood businesses in Baltimore City during 2016 was 196,224. The

CSAs with the **largest** number of employees in neighborhood businesses included Downtown/Seton Hill (51,873), Harbor East/Little Italy (20,226), and South Baltimore (17,638). The CSAs with the **fewest** number of employees in neighborhood businesses included Edmondson Village (174), Penn North/Reservoir Hill (376), and Forest Park/Walbrook (410).

### Banking

In 2008, the Baltimore Neighborhood Drilldown Study<sup>15</sup> showed that many of the city's neighborhoods were "underbanked," which means that many residents did not have access to traditional financial institutions in their neighborhoods. Without access, saving money or obtaining a credit record is often difficult.

#### Number of Bank Branches

The number of banks and bank branches has remained consistent in Baltimore since 2010.<sup>16</sup> In 2016, there were a 0.20 banks and bank branches per 1,000 residents in Baltimore City. The **greatest** number of banks and bank branches per 1,000 residents were located in Downtown/Seton Hill (3.3), Harbor East/Little Italy (0.9), Southeastern (0.8), Highlandtown (0.7), and Greater Roland Park/Poplar Hill (0.7). In 2015, there were 18 CSAs that had no banks or bank branches located within the CSA.

### From Previous Vital Signs

One major determinant of employment for many communities is the percent of adult population under community supervision including parole and probation. Persons with criminal records face significant barriers towards finding employment. Although data were not available for 2014, 2015, and 2016, the data for 2013 are given below.

#### Adult Population Under Community Supervision (2013)<sup>17</sup>

For Baltimore City, in 2013 the percent of adult population under community supervision was 5.3%. The CSAs in 2013 with the **highest** percentage of adults under community supervision were Madison/East End (14.5%), Greenmount East (11.1%), and Southwest Baltimore (11.1%). The CSAs with the **lowest** percent were Mt. Washington/Coldspring (0.6%), North Baltimore/Guilford/Homeland (0.7%), and Greater Roland Park/Poplar Hill (0.8%).

## Indicator Definitions and Rankings

For each indicator reported in *Vital Signs 16*, we provide the data source, the years for which it is reported, and the five CSAs with the highest and lowest values for the indicator; these may not correspond to positive or negative trends.

### Labor Force Participation & Employment

#### **Percent of Population (Ages 16-64) Employed**

Measure of persons working and earning an income.

Definition: The number of persons between the ages of 16 and 64 formally employed or self-employed and earning a formal income. It is used to understand how many persons are working out of the entire population, not just those in the labor force (persons who may be looking for work or working). (SOURCE: AMERICAN COMMUNITY SURVEY, 2012-2016)

##### **Five Highest:**

1. Canton
2. South Baltimore
3. Fells Point
4. Inner Harbor/Federal Hill
5. Mount Washington/Coldspring

##### **Five Lowest:**

1. Oldtown/Middle East
2. Southern Park Heights
3. Upton/Druid Heights
4. Greenmount East
5. Sandtown-Winchester/Harlem Park

#### **Percent of Population (Ages 16-64) Unemployed and Looking for Work**

Measure of persons who are not working.

Definition: The number of persons between the ages of 16 and 64 not working out of all persons, not just those in the labor force (persons who may be looking for work). These persons are seeking work that pays a formal income. (SOURCE: AMERICAN COMMUNITY SURVEY, 2012-2016)

##### **Five Highest:**

1. Midway/Coldstream
2. Madison/East End
3. Greenmount East
4. Dorchester/Ashburton
5. Clifton-Berea

##### **Five Lowest:**

1. Canton
2. Downtown/Seton Hill
3. Fells Point
4. Inner Harbor/Federal Hill
5. South Baltimore

#### **Percent of Population (Ages 16-64) Not in the Labor Force**

Measure of persons not working and not seeking work.

Definition: The number of persons who are not in the labor force out of all persons between the ages of 16 and 64 in the area. There are several reasons why persons may not be included in the labor force. These reasons may include: they are caretakers for children or other family members; they attend school or job training; they may have a disability; and they are discouraged or frustrated and have given up seeking a job or have a history that may include criminal activity. (SOURCE: AMERICAN COMMUNITY SURVEY, 2012-2016)

##### **Five Highest:**

1. Oldtown/Middle East
2. Upton/Druid Heights
3. Greater Charles Village/Barclay
4. North Baltimore/Guilford/Homeland
5. Southern Park Heights

##### **Five Lowest:**

1. Canton
2. South Baltimore
3. Fells Point
4. Inner Harbor/Federal Hill
5. Highlandtown

#### **Unemployment Rate**

Measure of persons actively seeking work.

Definition: The number of persons between the ages of 16 and 64 that are in the labor force (and are looking for work) but are not currently working. (SOURCE: AMERICAN COMMUNITY SURVEY, 2012-2016)

##### **Five Highest:**

1. Greenmount East
2. Madison/East End
3. Midway/Coldstream
4. Southern Park Heights
5. Dorchester/Ashburton

##### **Five Lowest:**

1. Canton
2. South Baltimore
3. Fells Point
4. Inner Harbor/Federal Hill
5. Downtown/Seton Hill

## Workforce and Economic Development

**Percent of Adult Population under Community Supervision (from 2013)**

Measure of population that are under community supervision including parole or probation.

Definition: The percentage of the population 18 and older that are under community supervision including parole or probation. (SOURCE: MARYLAND DEPARTMENT OF PAROLE AND PROBATION, MARYLAND COMMUNITY SUPERVISION LIST 2013)

**Five Highest:**

1. Madison/East End
2. Greenmount East
3. Southwest Baltimore
4. Clifton-Berea
5. Sandtown-Winchester/  
Harlem Park

**Five Lowest:**

1. Mt. Washington/  
Coldspring
2. North Baltimore/  
Guilford/Homeland
3. Greater Roland  
Park/Poplar Hill
4. Cross-Country/  
Cheswolde
5. Canton

## Educational Attainment of the Labor Force

**Percent Population (25 years and over) With Less Than a High School Diploma or GED**

Measures the number of persons with little formal education and training.

Definition: The percentage of persons that have not completed, graduated, or received a high school diploma or GED. This is a standard indicator used to measure the portion of the population with less than a basic level of skills needed for the workplace. Persons under the age of 25 are not included in this analysis since many of these persons are still attending various levels of schooling. (SOURCE: AMERICAN COMMUNITY SURVEY, 2012-2016)

**Five Highest:**

1. Southwest Baltimore
2. Orangeville/East  
Highlandtown
3. Midway/Coldstream
4. Oldtown/Middle East
5. Madison/East End

**Five Lowest:**

1. Greater Roland  
Park/Poplar Hill
2. North Baltimore/  
Guilford/Homeland
3. Canton
4. Cross-Country/  
Cheswolde
5. Mt. Washington/  
Coldspring

**Percent Population (25 years and over) With High School Diploma and Some College or Associates Degree**

Measures the number of persons with basic formal education and training.

Definition: The percentage of persons that have completed, graduated, or received a high school diploma or GED and also has taken some college courses or completed their Associate's degree. This is a standard indicator used to measure the portion of the population with a basic level of skills needed for the workplace. Persons under the age of 25 are not included in this analysis since many of these persons are still attending various levels of schooling. (SOURCE: AMERICAN COMMUNITY SURVEY, 2012-2016)

**Five Highest:**

1. Edmondson Village
2. Greenmount East
3. Cherry Hill
4. Loch Raven
5. Greater Rosemont

**Five Lowest:**

1. Greater Roland  
Park/Poplar Hill
2. Fells Point
3. North Baltimore/  
Guilford/Homeland
4. South Baltimore
5. Inner Harbor/  
Federal Hill

**Percent Population (25 years and over) with a Bachelor's Degree or Above**

Measures the number of persons with advanced formal education and training.

Definition: The percentage of persons that have completed, graduated, or received a Bachelor's or an advanced degree. This is an indicator used to measure the portion of the population having an advanced level of skills needed for the workplace. Persons under the age of 25 are not included in this analysis since many of these persons are still attending various levels of schooling (SOURCE: AMERICAN COMMUNITY SURVEY, 2012-2016)

**Five Highest:**

1. Greater Roland  
Park/Poplar Hill
2. North Baltimore/  
Guilford/Homeland
3. Fells Point
4. Mt. Washington/  
Coldspring
5. South Baltimore

**Five Lowest:**

1. Sandtown-Winchester/  
Harlem Park
2. Brooklyn/Curtis Bay/  
Hawkins Point
3. Madison East End
4. Southwest Baltimore
5. Greenmount East

## Commercial Investment Activity

### Total Number of Commercial Properties

Measures the number of commercial properties in an area.

Definition: The total number of commercial properties located within an area in a particular year. (SOURCE: MDPROPERTY VIEW, 2010, 2011, 2012, 2013, 2014, 2017)

#### Five Highest:

Downtown/Seton Hill  
Midtown  
Brooklyn/Curtis Bay/  
Hawkins Point  
Southwest Baltimore  
Orangeville/East  
Highlandtown

#### Five Lowest:

Cross-Country/Cheswolde  
Dickeyville/Franklintown  
Edmonson Village  
Beechfield/Ten  
Hills/West Hills  
Forest Park/Walbrook

## Regional Dynamics

### Percent of Employed Residents who Work Outside of Baltimore City

Measures the number of residents who are employed outside of Baltimore City.

Definition: The percentage of workers that are employed by jobs located outside of Baltimore City. Only persons who report being employed and are at least 16 years old are included in the analysis. (SOURCE: U.S. CENSUS BUREAU, LONGITUDINAL EMPLOYER-HOUSEHOLD DYNAMICS (LEHD), 2015)

#### Five Highest:

1. Brooklyn/Curtis Bay/  
Hawkins Point  
2. Morrell Park/Violetville  
3. Westport/Mount  
Winans/Lakeland  
4. Beechfield/Ten  
Hills/West Hills  
5. Cherry Hill

#### Five Lowest:

1. Downtown/Seton Hill  
2. Harbor East/Little Italy  
3. Midtown  
4. Fells Point  
5. Greater Charles  
Village/Barclay

## Business Size and Age

### Total Number of Businesses

Measure of businesses in an area.

Definition: The total number of businesses (both for-profit and non-profit) within an area at a single time in a year. (SOURCE: INFOUSA, 2010, 2011, 2012, 2013, 2014, 2015, 2016)

#### Five Highest:

1. Downtown/Seton Hill  
2. Midtown  
3. Medfield/Hampden/  
Woodberry  
4. Greater Charles  
Village/Barclay  
5. Inner Harbor/Federal  
Hill and Oldtown  
Middle East (tied)

#### Five Lowest:

Dickeyville/Franklintown  
Edmonson Village  
Poppleton/The Terraces/  
Hollins Market  
Greenmount East  
Beechfield/Ten  
Hills/West Hills

### Number of Total Jobs Filled by Employees

Measures the number of total jobs per CSA (only counts jobs that are currently held by employees).

Definition: The number of total jobs filled by employees. This counts all jobs, whether primary or secondary. If a person works two jobs, both jobs are counted in total jobs. (SOURCE: U.S. CENSUS BUREAU, LONGITUDINAL EMPLOYER-HOUSEHOLD DYNAMICS (LEHD), 2010, 2011, 2012, 2013, 2014, 2015)

#### Five Highest:

1. Harbor East/Little Italy  
2. Downtown/Seton Hill  
3. South Baltimore  
4. Midtown  
5. Inner Harbor/  
Federal Hill

#### Five Lowest:

1. Edmondson Village  
2. Forest Park/Walbrook  
3. Penn North/  
Reservoir Hill  
4. Greenmount East  
5. Dickeyville/  
Franklintown

## Workforce and Economic Development

**Total Number of Businesses with Fewer than 50 Employees**

Measures the number of small businesses in an area.

Definition: The total number of businesses (both for-profit and non-profit) that report having less than 50 persons employed within an area at a single time in a year. (SOURCE: INFOUSA, 2010, 2011, 2012, 2013, 2014, 2015, 2016)

**Five Highest:**

1. Downtown/Seton Hill
2. Midtown
3. Medfield/Hampden/  
Woodberry
4. Greater Charles  
Village/Barclay
5. Oldtown/Middle East

**Five Lowest:**

1. Dickeyville/  
Franklinton
2. Edmonson Village
3. Poppleton/The Terraces/  
Hollins Market
4. Beechfield/Ten  
Hills/West Hills
5. Greenmount East

**Percent of Businesses that are One Year Old or Less**

Measures very young businesses.

Definition: The percentage of businesses (both for-profit and non-profit) that report their establishment as being one year old or less. The age of the business is determined by the year that the first year they appeared in the InfoUSA database. (SOURCE: INFOUSA, 2010, 2011, 2012, 2013, 2014, 2015, 2016)

**Five Highest:**

1. Oldtown/Middle East
2. Pimlico/Arlington/  
Hilltop
3. Edmondson Village
4. Loch Raven
5. Dickeyville/  
Franklinton

**Five Lowest:**

1. Southern Park Heights
2. Harford/Echodale
3. Lauraville
4. Southwest Baltimore
5. The Waverlies

**Percent of Businesses that are Two Years Old or Less**

Measures young and very young businesses.

Definition: The percentage of businesses (both for-profit and non-profit) that report their establishment as being two years old or less. The age of the business is determined by the year that the first year they appeared in the business database. (SOURCE: INFOUSA, 2010, 2011, 2012, 2013, 2014, 2015, 2016)

**Five Highest:**

1. Oldtown/Middle East
2. Dickeyville/  
Franklinton
3. Edmondson Village
4. Pimlico/Arlington/  
Hilltop
5. Loch Raven

**Five Lowest:**

1. Claremont/Armistead
2. Lauraville
3. Penn North/  
Reservoir Hill
4. Southwest Baltimore
5. Southern Park Heights

**Percent of Businesses that are Four Years Old or Less**

Measures young businesses.

Definition: The percentage of businesses (both for-profit and non-profit) that report their establishment as being four years old or less. The age of the business is determined by the year that the first year they appeared in the business database. A business that has been in operation more than four years has a greater likelihood of remaining open for a longer period of time. (SOURCE: INFOUSA, 2010, 2011, 2012, 2013, 2014, 2015, 2016)

**Five Highest:**

1. Oldtown/Middle East
2. Dickeyville/  
Franklinton
3. Edmondson Village
4. Pimlico/Arlington/  
Hilltop
5. South Baltimore

**Five Lowest:**

1. Claremont/Armistead
2. Greenmount East
3. Midway/Coldstream
4. Belair-Edison
5. Lauraville

## Neighborhood Businesses

### Number of Neighborhood Businesses

Measures businesses that serve local residents.

Definition: The number of businesses (both for-profit and non-profit) that provide products and services to local residents. The industries included in this indicator are: Retail Trade (NAICS 44-45); Finance and Insurance (NAICS 52); Professional, Scientific, and Technical Services (NAICS 54); Health Care and Social Assistance (NAICS 62); Arts, Entertainment, and Recreation (NAICS 71); Accommodation and Food Services (NAICS 72); and Other Services except Public Administration (NAICS 81). The primary industry reported by each business was used to determine their inclusion. (SOURCE: INFOUSA, 2010, 2011, 2012, 2013, 2014, 2015, 2016)

#### Five Highest:

1. Downtown/Seton Hill
2. Midtown
3. Oldtown/Middle East
4. Greater Charles Village/Barclay
5. Medfield/Hampden/Woodberry

#### Five Lowest:

1. Dickeyville/Franklinton
2. Edmonson Village
3. Beechfield/Ten Hills/West Hills
4. Claremont/Armistead
5. Poppleton/The Terraces/Hollins Market

### Number of Neighborhood Businesses per 1,000 Residents

Measures the concentration of businesses that serve local residents.

Definition: The number of businesses (both for-profit and non-profit) that provide products and services to local residents per 1,000. The industries included in this indicator are: Retail Trade (NAICS 44-45); Finance and Insurance (NAICS 52); Professional, Scientific, and Technical Services (NAICS 54); Health Care and Social Assistance (NAICS 62); Arts, Entertainment, and Recreation (NAICS 71); Accommodation and Food Services (NAICS 72); and Other Services except Public Administration (NAICS 81). The primary industry reported by each business was used to determine their inclusion. (SOURCE: INFOUSA, 2010, 2011, 2012, 2013, 2014, 2015, 2016; US CENSUS, 2010)

#### Five Highest:

1. Downtown/Seton Hill
2. Oldtown/Middle East
3. Harbor East/Little Italy
4. Midtown
5. Inner Harbor/Federal Hill

#### Five Lowest:

1. Edmondson Village
2. Northwood
3. Beechfield/Ten Hills/West Hills
4. Dickeyville/Franklinton
5. Patterson Park North & East

### Total Number of Employees of Neighborhood Businesses

Measures the number of persons employed in businesses serving the local area.

Definition: The number of persons employed by businesses (both for-profit and non-profit) that provide products and services to local residents. The industries included in this indicator are: Retail Trade (NAICS 44-45); Finance and Insurance (NAICS 52); Professional, Scientific, and Technical Services (NAICS 54); Health Care and Social Assistance (NAICS 62); Arts, Entertainment, and Recreation (NAICS 71); Accommodation and Food Services (NAICS 72); and Other Services except Public Administration (NAICS 81). The primary industry reported by each business was used to determine their inclusion. The persons employed by these businesses may not necessarily live in the neighborhood where the business is located. (SOURCE: INFOUSA, 2010, 2011, 2012, 2013, 2014, 2015, 2016)

#### Five Highest:

1. Downtown/Seton Hill
2. Harbor East/Little Italy
3. South Baltimore
4. Inner Harbor/Federal Hill
5. Oldtown/Middle East

#### Five Lowest:

1. Edmonson Village
2. Penn North/Reservoir Hill
3. Forest Park/Walbrook
4. Greenmount East
5. Greater Govans

### Number of Banks and Bank Branches per 1,000 Residents

Measures the ability of businesses and residents to access credit and financial services.

Definition: The number of banks and bank branches per 1,000 residents within an area. (SOURCE: FEDERAL DEPOSIT INSURANCE CORPORATION (FDIC), 2011, 2012, 2013, 2014, 2015, 2016; CENSUS, 2010)

#### Five Highest:

1. Downtown/Seton Hill
2. Harbor East/Little Italy
3. Southeastern
4. Highlandtown
5. Greater Roland Park/Poplar Hill

#### Five Lowest:

Eighteen CSAs have no banks/bank branches per 1,000 residents.

## Education and Youth

Schools within a neighborhood represent an important institution in the lives of youth and families. All residents of a neighborhood interact with the public school system either directly, as guardians of children attending a school, or indirectly, as community members impacted by the school in the surrounding area. The interconnectedness of the quality of schools and quality of life means that the relationship between schools and neighborhoods has far-reaching consequences over time including population growth and increases in housing value.

Community access to schools has been growing in Baltimore City through two major initiatives. The *21st Century School Buildings Plan*<sup>1</sup> began implementation in 2013 after the Maryland General Assembly passed the Baltimore City Public Schools Construction and Revitalization Act to fund \$1.1 billion in school building renovation and replacement projects over the next decade. Given the aging building stock of many Baltimore City schools, many neighborhoods have not been able to use their schools as community assets or as places that facilitate healthy school environments. To better support school construction in the surrounding neighborhood, Baltimore's Department of Planning has embarked on the INSPIRE<sup>2</sup> planning process for the quarter-mile radius around each school to develop plans that identify specific, implementable public improvements for transportation, housing, and open space.

Unfortunately, given the continuing overall decline in student enrollment in the Baltimore City Public School System (BCPSS), and often particularly acute within some neighborhoods, many communities are grappling with the devastating impact of school closures. At the end

of the 2015-2016 school year, four schools were closed, and students were absorbed into neighboring schools or schools with excess capacity.<sup>3</sup> While school-closures due to low-enrollment and/or low-performance are based on fiscal and educational requirements, communities and students suffer the consequences of their changing landscapes.

With the simultaneous growth of school choice and public charter school options in Baltimore,<sup>4</sup> the concept of the neighborhood school may be more socially constructed than physically defined.<sup>5</sup> School-based reporting systems, such as the Maryland Report Card<sup>6</sup>, resonate with parents and educators connected with the school, but less so with community members who may have an unclear connection to any given school. The *Vital Signs* indicators on educational outcomes provide aggregated student information based on where the students live so that residents understand the school-based context for the children in their neighborhood and serve as a complement to data reported by the school.

1. For the most up-to-date information on the 21st Century School Buildings Plan, visit <http://baltimore21stcenturyschools.org/>
2. Investing in Neighborhoods and Schools to Promote Improvement, Revitalization, and Excellence (INSPIRE) <http://baltimore21stcenturyschools.org/community/community-economic-development>
3. School Closures and Building Surplus Final Decisions (February 2016) <http://www.baltimorecityschools.org/cms/lib/MD01001351/Centricity/Domain/8057/20160212-ClosureAndSurplusReport.pdf>
4. For comprehensive information on school choice and public charter schools, see LiveBaltimore's website on City Living Essentials <http://livebaltimore.com/city-living-essentials/education-family/charter-schools/>
5. Martin Austerlitz. "The End of the Neighborhood School" *The Atlantic Cities*. February 19, 2013. Per an established data sharing Memorandum of Understanding with the Baltimore City Public Schools, BNIA-JFI aggregates student-level data to a larger geographic level to ensure student confidentiality.
6. CSAs are groups of census tracts that correspond to neighborhoods which vary in size. See *Vital Signs 16* Introduction.
7. For citywide educational data and indicators of student demographics, assessments, and graduation, visit the Maryland Report Card <http://www.mdreportcard.org/>

*Vital Signs 16* includes indicators for all Community Statistical Areas (CSAs) designed to track the educational outcomes for public school children and youth. These indicators are grouped into the following categories: student enrollment, demographics, attendance, performance, drop-out and completion, and youth engagement.

## Data

Data for *Vital Signs 16* educational indicators are provided by the Baltimore City Public School System as well as the 2012-2016 American Community Survey. The data provided by the Baltimore City Public Schools include student address so that aggregated data on educational performance are presented by the neighborhood in which the student lives, not by the school attended.

To ensure consistent communication of these data to communities, analysis of education-related indicators has been more closely coordinated with the Baltimore City Public School System (BCPSS). However, each one of the Education and Youth indicators may not be directly comparable to data provided by BCPSS for several reasons, primarily due to methodological adjustments needed to create community-based indicators. For example, students who cannot be matched between data files provided by BCPSS and/or students whose home address cannot be geocoded were excluded from the analysis. In the 2015-2016 school year, 1.0% of the student addresses could not be matched or geocoded. This means that these students were not included in either the community calculations or for the city as a whole. Therefore, direct comparisons to data and results available through the Baltimore City Public Schools and the Maryland Report Card cannot be made.<sup>8</sup>

### Data Key

**Green colored text** denotes a positive change.

**Red colored text** denotes a negative change.

**Blue colored text** denotes a neutral change.

Indicators are created by normalizing data by the number of children ever attended in a Baltimore City public school that live in a given area to allow for comparisons across neighborhoods and over time.<sup>9</sup>

## Student Officially Enrolled and Ever Attended

The school system measures enrollment as a census of students that are registered for school as of September 30 in every school year. This official enrollment serves as the basis for many school-based resources including per pupil funding for each school.

### Students Officially Enrolled

In the 2015-2016 school year, there were a total of 71,510 students officially enrolled in 1st-12th grades in Baltimore City Public Schools. Of the total number of students enrolled, 46.6% were enrolled in elementary grades, 23.5% were enrolled in middle school grades, and 29.9% were enrolled in high school grades.

### Elementary School

From 2014-2015 to 2015-2016, the total number of elementary school students enrolled in public school **increased** from 33,217 to 33,300. In the 2015-2016 school year, the **largest** number of elementary students enrolled in public school lived in Southwest Baltimore (1,366) and the **lowest** number of students lived in Downtown/Seton Hill (100).

### Middle School

From 2014-2015 to 2015-2016, the total number of middle school students enrolled in public school **decreased** from 16,822 to 16,806. In the 2015-2016 school year, the **largest** number of middle school students enrolled in public school lived in Greater Rosemont (735) and the **lowest** number of students lived in Canton (40).

### High School

From 2014-2015 to 2015-2016, the total number of high school students enrolled in public school **decreased** from 22,043 to 21,404. In the 2015-2016 school year, the **largest** number of high school students enrolled in public school lived in Greater Rosemont (1,053) and the **lowest** number of students lived in Canton (19).<sup>10</sup>

8. For citywide educational data and indicators of student demographics, assessments, and graduation, visit the Maryland Report Card <http://www.mdreportcard.org/>

9. Indicators reported from one school year to the next do not reflect a “cohort” of students but rather a cross-section. For example, 3rd graders in 2014-2015 may or may not be the same students as 4th graders in 2014-2015.

10. Note that CSAs with a small number of school students (such as Canton) may demonstrate significant indicator volatility from year to year.

### Students Ever Attended

*Vital Signs 16* also reports students who ever attended<sup>11</sup> the school system at any point in the school year, which is a larger figure than the students who were officially enrolled on September 30. Education indicators throughout this section of the report are normalized using the number of students ever attended. Students who have ever attended represent all the children within the neighborhood who are engaged with the school system and better reflects the level of access to the school system overall. There were a total of 73,457 students who ever attended a Baltimore City public school at any point during the 2015-2016 school year for grades 1-12.

### Elementary School

From 2014-2015 to 2015-2016, the total number of students who ever attended in 1st-5th grade **increased** by 3.5% from 33,340 to 34,410. Over the past two school years, the CSAs that experienced the greatest percentage **increase** in total number of elementary students ever attended in a public school were Orangeville/East Highlandtown (+9.1%), Greater Charles Village/Barclay(+9.0) and Southeastern (+9.0%). The CSA with the greatest percentage **decrease** in total number of students ever attended was Downtown/Seton Hill (-4.2%).

### Middle School

From 2014-2015 to 2015-2016, the total number of students that ever attended in 6th-8th grade **decreased** by 0.2% from 17,304 to 17,262. Over the past two school years, the CSAs that experienced the greatest percentage **increase** in total number of middle school students ever attended in a public school were Fells Point (+26.9%) and Canton (+24.2%). The CSA with the greatest **decrease** in total number of students attending was Inner Harbor/Federal Hill (-20.2%).

### High School

From 2014-2015 to 2015-2016, the total number of students ever attended in 9th-12th grade **decreased** by 3.8% from 22,015 to 21,785. Over the past two school years, the CSAs that experienced the greatest percentage **increase** in total number of high school students ever attended in a public school were Southeastern (+12.9%) and Inner Harbor/Federal Hill (+12.8%). The CSA with the greatest **decrease** in total number of students ever attended in high school was Canton (-31.0%).

### Student Demographics

The demographic makeup of the public school system in Baltimore is disproportionately African-American. The city as a whole is 62.4% African-American (see *Vital Signs 16 Census Demographics*), yet during the 2015-2016 school year, 82.1% of the students ever enrolled in a Baltimore City public school were African-American.

### Black/African-American Students

The percent of African-American non-Hispanic students ever attended **decreased** by 1.0% percentage points between the school years ending in 2015 and 2016. During the 2015-2016 school year, the CSAs with the **highest** percent of African-American students were Greater Mondawmin (98.3%) and Greater Rosemont (98.0%). The CSAs with the **lowest** percent of African-American students were South Baltimore (8.4%) and Highlandtown (14.5%).

### White Students

The percent of white (non-Hispanic) students ever attended **declined** slightly from 8.0% to 7.9% between the school years ending in 2015 and 2016. During the 2015-2016 school year, the CSAs with the **highest** percent of white students were South Baltimore (85.9%) and Greater Roland Park/Poplar Hill (64.0%). The CSAs with the **lowest** percent of white students were Dorchester/Ashburton (0.5%) and Sandtown-Winchester/Harlem Park (0.6%).

### Hispanic Students

The percent of Hispanic students ever attended **increased** from 7.3% to 8.4% between the school years ending in 2015 and 2016. During the 2015-2016 school year, the CSAs with the **highest** percent of Hispanic students were Orangeville/East Highlandtown (67.7%) and Highlandtown (67.3%). The CSAs with the **lowest** percent of Hispanic students were Dickeyville/Franklintown (0.7%) and Greater Mondawmin (0.8%).

### Student Attendance

One of the most important factors for ensuring student success is having consistent and routine attendance. Ensuring students arrive to school on time, everyday has become a major focus for Baltimore City agencies, school system, and other multi-sector stakeholders. In general, over the past several years, elementary and middle school chronic absenteeism (missing at least 20 days) has remained the same at relatively moderate levels (13-15%).

11. The indicator Ever Enrolled has been renamed Ever Attended in *Vital Signs 12* to better reflect its definition. The methodology for the indicator is the same and measures for the two years are comparable.

## Education and Youth

High school chronic absenteeism, however, has remained much higher (around 40%) for many years.

#### Elementary School Absenteeism

The percentage of elementary school students in 1st through 5th grades that were chronically absent **decreased** from 16.6% to 15.3% between the school years ending in 2015 and 2016. During the 2015-2016 school year, Downtown/Seton Hill (30.0%) and Cherry Hill (27.1%) had the **highest** percentages of chronically absent elementary school students.

#### Middle School Absenteeism

The percentage of middle school students that were chronically absent **decreased** slightly from 17.4% to 17.3% between the school years ending in 2015 and 2016. During the 2015-2016 school year, the CSAs with the **highest** percentage of chronically absent middle school students was Clifton-Berea (26.7%) and Southwest Baltimore (22.3%).

#### High School Absenteeism

The percentage of high school students that were chronically absent **decreased** from 39.6% to 37.2% between the school years ending in 2015 and 2016. During the 2015-2016 school year, Cherry Hill (50.8%) had the **highest** percentage of chronically absent high school students followed by Madison/East End (50.6%).

#### Kindergarten Readiness

Although Maryland has been assessing kindergarten readiness for many years, beginning in the 2015-2016 school year, local school systems began to use the Kindergarten Readiness Assessment (KRA) tool to measure children's readiness to do kindergarten work. The KRA is a developmentally appropriate assessment tool that measures the school readiness of incoming public-school kindergarteners across four learning domains. Administered by kindergarten teachers at the start of each school year, the KRA looks at the knowledge, skills, and behaviors necessary to be successful in kindergarten. Kindergarten teachers use this information to better understand the needs of their students and align classroom instruction (see Data Story).

A child is considered to be ready for kindergarten if assessed as “demonstrating” the foundational skills and behaviors that prepare him/her for curriculum based on the kindergarten standards. Due to the inability to match or geocode 0.5% of the student addresses in the KRA data, a small number of students were not included in this indicator calculation. Therefore, the overall reported figures may differ slightly from those reported by BCPSS.

#### Kindergarten Readiness

During the 2015-2016 school year, 41.7% of kindergarten students in Baltimore City were considered “demonstrating readiness.” The scores ranged from the **highest** rates in Mt. Washington/Coldspring (83.3%) and South Baltimore (72.7%) to the **lowest** rates in Orangeville/East Highlandtown (17.2%), and Patterson Park North & East (25.3%).

#### Student Performance (Elementary, Middle, and High School)

The Baltimore City Public School System administers the Partnership for Assessment of Readiness for College and Careers (PARCC) measurement system to align with adoption of the common core curriculum. This test supersedes the previously administered Maryland State Assessment (MSA) until 2014. Student scores are classified into one of five performance levels: exceeded expectations, met expectations, approached expectations, partially met expectation, or did not meet expectations. The first two levels have been identified as being “on track for the next grade level.” *Vital Signs 16* tracks the percentage 3rd, 5th, and 8th graders who score met or exceeded expectations in reading and math on the PARCC tests.<sup>12</sup> These indicators are normalized by the total number of students who ever attended for each of those grades. Due to the inability to match or geocode 1.0% of the student addresses in the PARCC data, a small number of students were not included in the student achievement analysis. Therefore, the following numbers do not include all Baltimore Public School students and differ slightly from BCPSS reported figures.

#### 3rd Grade Achievement

From 2014-2015 to 2015-2016, the percent of students who scored Advanced/Proficient on the math PARCC exam **increased** from 17.3% to 18.7%. The scores ranged from the **highest** rates in Greater Roland Park/Poplar Hill (80.4%) to the **lowest** rates in Harbor East/Little Italy (6.0%).

From 2014-2015 to 2015-2016, the percent of students who scored Advanced/Proficient on the reading PARCC exam **decreased** from 19.7% to 11.6%. The scores ranged from the **highest** rates in Greater Roland Park/Poplar Hill (57.7%) to the **lowest** rates in Poppleton/The Terraces/Hollins Market (3.0%).

#### 5th Grade Achievement

From 2014-2015 to 2015-2016, the percent of students who scored Advanced/Proficient on the math PARCC exam **increased** from 10.0% to 13.0%. The scores ranged from the

## Data Story: Ensuring Kindergarten Readiness

When children start kindergarten with a foundation for learning, they are more likely to be successful in their kindergarten year and as they move up through the grades. This is one of the reasons that high-quality early learning opportunities are so important and why Baltimore City Public Schools has made them a priority.

Since 2015, City Schools has given the state's Kindergarten Readiness Assessment (KRA) to students early in their kindergarten year. The KRA assesses children's readiness for kindergarten in the areas of language and literacy, mathematics, social foundations, and physical development. While nearly 42% of City Schools' kindergartners overall demonstrated readiness in 2015-16, among those who came to kindergarten from a City Schools pre-kindergarten program, 48% were ready. This exceeds not only the district's overall percentage, but also the percentage in many other Maryland districts and the state as a whole.

City Schools' full-day pre-K programs are located in schools across the city, so families of young children can access them close to their homes. The district has revised its pre-K curriculum to align with what children learn in kindergarten and the elementary grades. Because of its key role in academic success throughout the grades, literacy is a hallmark of teaching and learning in the early grades and a key focus area in City Schools' blueprint for success.

Recently, a grant enabled City Schools to expand its pre-K offerings by opening eight new pre-K classes and five new Judith P. Hoyer Early Child Care and Family Education Centers, or Judy Centers. In addition to academic programming, these centers provide wrap-around services, such as mental health care and family counseling. KRA results have shown that students who attend

pre-K programs in schools with Judy Centers are more ready for kindergarten than those who attend other early learning programs. Based on these data, the district located the new Judy Centers in neighborhoods where kindergarten readiness rates were lower than the overall city rate, including Orangeville/East Highlandtown and Brooklyn/Curtis Bay/Hawkins Point.

### Kindergarten Readiness Assessment by CSA, 2015-2016

For more information, visit <http://www.baltimorecity-schools.org/Page/24385>

By the Baltimore City Public School System

## Education and Youth

highest rates in Greater Roland Park/Poplar Hill (72.7%) to the **lowest** rates in Greenmount East (3.3%).

From 2014-2015 to 2015-2016, the percent of students who scored Advanced/Proficient on the reading PARCC exam **decreased** from 12.1% to 11.5%. The scores ranged from the **highest** rates in Greater Roland Park/Poplar Hill (68.2%) to the **lowest** rates in Clifton-Berea (2.5%).

### 8th Grade Achievement

From 2014-2015 to 2015-2016, the percent of students who scored Advanced/Proficient on the math PARCC exam **increased** from 5.0% to 5.9%. The scores ranged from the highest rates in Greater Roland Park/Poplar Hill (33.3%) to the **lowest** rates in Canton, Downtown/Seton Hill, Greater Mondawmin, and Midtown (0.0%).

From 2014-2015 to 2015-2016, the percent of students who scored Advanced/Proficient on the reading PARCC exam **increased** from 12.3% to 14.0%. The scores ranged from the highest rates in Greater Roland Park/Poplar Hill (80.6%) to the **lowest** rates in Edmondson Village (2.0%).

### Student Withdrawals, Completion, and Mobility

The Baltimore City School System and numerous other partners, including city government, foundations, and nonprofits continue to focus their efforts on reducing school withdrawals and increasing high school completion. School switching within the same school year has been shown to negatively impact a child's behavioral and academic development.<sup>13</sup> *Vital Signs 16* tracks the withdrawal rate of students (9th through 12th grade), the high school completion rate (for 12th graders only)<sup>14</sup>, and the percentage of all students switching schools within the same school year.

#### Withdrawal Rate

The percentage of students that withdrew from Baltimore City public schools **decreased** from 3.7% to 3.0% between school years ending in 2015 and 2016. The percentage of students that withdrew before completion in 2015 ranged

from a **high** of 7.2% in Highlandtown to a **low** of 0% in Canton and Greater Roland Park/Poplar Hill.

### High School Completion

Baltimore City's high school completion rate for 12th graders **remained steady** from 78.3% to 78.4% between school years ending in 2015 and 2016. The CSAs with the **highest** overall completion rates were North Baltimore/Guilford/Homeland (92.3%) and South Baltimore (88.9%). The CSAs with the **lowest** completion rates were Highlandtown (66.3%) and Downtown/Seton Hill (63.6%).

### School Switching

The percentage of all students switching schools within the same school year **increased** from 7.2% to 7.6% between school years ending in 2015 and 2016. The CSAs with the **highest** percentage of students switching were Brooklyn/Curtis Bay/Hawkins Point (10.6%), Poppleton/The Terraces/Hollins Market (10.4%), and Downtown/Seton Hill (10.1%). The CSAs with the **lowest** percentage were Greater Roland Park/Poplar Hill (3.6%), Canton (4.0%), and North Baltimore/Guilford/Homeland (4.4%).

### Youth Engagement

*Vital Signs 16* measures youth engagement by reporting the percent of 16-19 year-olds who are in school and/or working. Based on the 2012-2016 American Community Survey, 86.2% of the persons aged 16-19 were either in school and/or employed, which is a slight **increase** from 86.0% during 2006-2010.

#### 16-19 Year-Olds in School and/or Working

From 2012 - 2016, six CSAs had **100%** of persons aged 16 - 19 either in school and/or employed: Canton, Greater Roland Park/Poplar Hill, Hamilton, Inner Harbor/Federal Hill, Midtown, and Westport/Mount Winans/Lakeland. The CSAs with the **fewest** persons aged 16-19 either in school and/or employed were Morrell Park/Violetville (57.9%) and Southern Park Heights (67.7%).

12. During the 2013-2014 school year, Baltimore City Public School students were transitioning to common core standards. Beginning the 2014-2015 school year, the students were officially assessed for the first time using the PARCC measurement system to align with adoption of the common core curriculum. <http://www.baltimorecityschools.org/parcc> for more information.

13. For more information on the impacts associated with school switching go to: [http://www.neighborhood-indicators.org/sites/default/files/publications/children\\_and\\_foreclosures\\_phase\\_2\\_full\\_report.pdf](http://www.neighborhood-indicators.org/sites/default/files/publications/children_and_foreclosures_phase_2_full_report.pdf)

14. The completion rate used for *Vital Signs* is the percentage of 12th graders that complete high school out of all 12th graders enrolled at any time during that school year. The Maryland state department of education and Baltimore city public schools calculations for completion rate of high school students are based on a cohort spanning the 4-year high school period. Visit: <http://www.mdreportcard.org/>

## Education and Youth

### Indicator Definitions and Rankings

For each indicator reported in *Vital Signs 16*, we provide the data source, the years for which it is reported, and the five CSAs with the highest and lowest values for the indicator; these may not correspond to positive or negative trends.

#### Student Enrollment

##### Number of Students Officially Enrolled in 1st - 5th Grade

Measure of officially enrolled elementary school students.

Definition: The number of children who have registered for and attend 1st through 5th grade at a Baltimore City Public School as of September 30th. This count only includes students enrolled in public schools. (SOURCE: BALTIMORE CITY PUBLIC SCHOOLS, 2009-2010, 2010-2011, 2011-2012, 2012-2013, 2013-2014, 2014-2015, 2015-2016)

###### Five Highest:

1. Southwest Baltimore
2. Greater Rosemont
3. Cedonia/Frankford
4. Belair-Edison
5. Brooklyn/Curtis Bay/  
Hawkins Point

###### Five Lowest:

1. Downtown/Seton Hill
2. Canton
3. South Baltimore
4. Cross-Country/  
Cheswolde
5. Fells Point

##### Number of Students Ever Attended 1st - 5th Grade

Measure of elementary school students attending at any point in the school year.

Definition: The number of children who have registered for and attend 1st through 5th grade at a Baltimore City Public School at any point during the school year. (SOURCE: BALTIMORE CITY PUBLIC SCHOOLS, 2009-2010, 2010-2011, 2011-2012, 2012-2013, 2013-2014, 2014-2015, 2015-2016)

###### Five Highest:

1. Southwest Baltimore
2. Greater Rosemont
3. Cedonia/Frankford
4. Brooklyn/Curtis Bay/  
Hawkins Point
5. Belair-Edison

###### Five Lowest:

1. Downtown/Seton Hill
2. Canton
3. South Baltimore
4. Midtown
5. Fells Point

##### Number of Students Ever Attended 6th - 8th Grade

Measure of middle school students attending at any point in the school year.

Definition: The number of children who have registered for and attend 6th through 8th grade at a Baltimore City Public School at any point in the school year. (SOURCE: BALTIMORE CITY PUBLIC SCHOOLS, 2009-2010, 2010-2011, 2011-2012, 2012-2013, 2013-2014, 2014-2015, 2015-2016)

###### Five Highest:

1. Cedonia/Frankford
2. Greater Rosemont
3. Southwest Baltimore
4. Belair-Edison
5. Sandtown-Winchester/  
Harlem Park

###### Five Lowest:

1. Canton
2. South Baltimore
3. Downtown/Seton Hill
4. Inner Harbor/  
Federal Hill
5. Fells Point

##### Number of Students Officially Enrolled in 6th - 8th Grade

Measure of officially enrolled high school students.

Definition: The number of children who have registered for and attend 9th through 12th grade at a Baltimore City Public School as of September 30th. This count only includes students enrolled in public schools. (SOURCE: BALTIMORE CITY PUBLIC SCHOOLS, 2009-2010, 2010-2011, 2011-2012, 2012-2013, 2013-2014, 2014-2015, 2015-2016)

###### Five Highest:

1. Greater Rosemont
2. Cedonia/Frankford

4. Mount Washington/  
Coldspring
5. Fells Point

## Student Attendance

### Percent of Students That Are Chronically Absent Elementary School 1st, 2nd, 3rd, 4th, and 5th grade students

Share of students that miss at least 20 days of school in a school year.

Definition: The percentage of students that were recognized as being absent from public school 20 or more days out of all students. (SOURCE: BALTIMORE CITY PUBLIC SCHOOLS, 2009-2010, 2010-2011, 2011-2012, 2012-2013, 2013-2014, 2014-2015, 2015-2016)

#### Five Highest:

1. Downtown/Seton Hill
2. Cherry Hill
3. Brooklyn/Curtis Bay/  
Hawkins Point
4. Upton/Druid Heights
5. Midtown

#### Five Lowest:

1. Greater Roland  
Park/Poplar Hill
2. Mount Washington/  
Coldspring
3. Fells Point
4. Cross-Country/  
Cheswolde
5. North Baltimore/  
Guilford/Homeland

### Percent of Students That Are Chronically Absent Middle School 6th, 7th, and 8th grade students

Share of students that miss at least 20 days of school in a school year.

Definition: The percentage of students that were recognized as being absent from public school 20 or more days out of all students. (SOURCE: BALTIMORE CITY PUBLIC SCHOOLS, 2009-2010, 2010-2011, 2011-2012, 2012-2013, 2013-2014, 2014-2015, 2015-2016)

#### Five Highest:

1. Clifton-Berea
2. Southwest Baltimore
3. Brooklyn/Curtis Bay/  
Hawkins Point
4. Cherry Hill
5. Upton/Druid Heights

Park/Poplar Hill
2. South Baltimore
3. North Baltimore/  
Guilford/Homeland
4. Mount Washington/  
Coldspring
5. Highlandtown

### Percent of Students That Are Chronically Absent High School 9th, 10th, 11th, and 12th grades

Share of students that miss at least 20 days of school in a school year.

Definition: The percentage of students that were recognized as being absent from public school 20 or more days out of all students. (SOURCE: BALTIMORE CITY PUBLIC SCHOOLS, 2009-2010, 2010-2011, 2011-2012, 2012-2013, 2013-2014, 2014-2015, 2015-2016)

#### Five Highest:

1. Cherry Hill
2. Madison/East End
3. Oldtown/Middle East
4. Southwest Baltimore
5. Clifton-Berea

#### Five Lowest:

1. Greater Roland Park/Poplar Hill
2. Mount Washington/Coldspring
3. North Baltimore/Guilford/Homeland
4. Canton
5. Harford/Echodale

## Student Demographics

### Percent of Students that are Black/African American

Measure of students who are of a particular race.

Definition: The percentage of Black/African American students of any grade that attend any Baltimore City Public School out of all public school students within an area in a school year. (SOURCE: BALTIMORE CITY PUBLIC SCHOOLS, 2009-2010, 2010-2011, 2011-2012, 2012-2013, 2013-2014, 2014-2015, 2015-2016)

#### Five Highest:

1. Greater Mondawmin
2. Greater Rosemont
3. Sandtown-Winchester/Harlem Park
4. Edmondson Village
5. Dickeyville/Franklinton

#### Five Lowest:

1. South Baltimore
2. Highlandtown
3. Canton
4. Orangeville/East Highlandtown
5. Greater Roland Park/Poplar Hill

### Percent of Students that are White (non-Hispanic)

Measure of students who are of a particular race.

Definition: The percentage of white (non-Hispanic) students of any grade that attend any Baltimore City Public School out of all public school students within an area in a school year. (SOURCE: BALTIMORE CITY PUBLIC SCHOOLS, 2009-2010, 2010-2011, 2011-2012, 2012-2013, 2013-2014, 2014-2015, 2015-2016)

#### Five Highest:

1. South Baltimore
2. Greater Roland Park/Poplar Hill
3. Medfield/Hampden/Woodberry/Remington
4. North Baltimore/Guilford/Homeland
5. Canton

#### Five Lowest:

1. Dorchester/Ashburton
2. Sandtown-Winchester/Harlem Park
3. Greater Mondawmin
4. Edmondson Village
5. Greater Rosemont

### Percent of Students that are Hispanic

Measure of students who are of a particular ethnicity.

Definition: The percentage of students of any grade level who identify their ethnicity as being Hispanic attend any Baltimore City Public School out of all public school students within an area in a school year. (SOURCE: BALTIMORE CITY PUBLIC SCHOOLS, 2009-2010, 2010-2011, 2011-2012, 2012-2013, 2013-2014, 2014-2015, 2015-2016)

#### Five Highest:

1. Orangeville/East Highlandtown
2. Highlandtown
3. Fells Point
4. Southeastern
5. Patterson Park North & East

#### Five Lowest:

1. Dickeyville/Franklinton
2. Greater Mondawmin
3. Sandtown-Winchester/Harlem Park
4. Greater Rosemont
5. Greater Govans

## Student Dropout, Completion, and mobility

### High School Dropout/Withdrawal Rate

Measure of students that withdrew from High School in a school year.

Definition: The percentage of 9th through 12th graders who withdraw from public school out of all high school students in a school year. Withdraw codes are used as a proxy for dropping out of school based upon the expectation that withdrawn students are no longer receiving educational services. A dropout is defined as a student who, for any reason other than death, leaves school before graduation or the completion of a Maryland-approved education program and is not known to enroll in another school or State-approved program during a current school year. (SOURCE: BALTIMORE CITY PUBLIC SCHOOLS, 2009-2010, 2010-2011, 2011-2012, 2012-2013, 2013-2014, 2014-2015, 2015-2016)

#### Five Highest:

1. Highlandtown
2. Clifton-Berea
3. Brooklyn/Curtis Bay/  
Hawkins Point
4. Cherry Hill
5. Harbor East/Little Italy

#### Five Lowest:

1. Canton, Greater Roland  
Park/Poplar Hill
2. Harford/Echodale
3. Dickeyville/  
Franklintown
4. Inner Harbor/  
Federal Hill
5. Chinquapin Park/  
Belvedere

### High School Completion Rate

Measure of students who successfully complete High School.

Definition: The percentage of 12th graders in a school year that successfully completed high school out of all 12th graders within an area. Completers are identified as completing their program of study at the high school level and satisfying the graduation requirements for a Maryland High School Diploma or the requirements for a Maryland Certificate of Program Completion. (SOURCE: BALTIMORE CITY PUBLIC SCHOOLS, 2009-2010, 2010-2011, 2011-2012, 2012-2013, 2013-2014, 2014-2015, 2015-2016)

#### Five Highest:

1. North Baltimore/  
Guilford/Homeland

3. Cross-Country/  
Cheswolde
4. Greater Roland  
Park/Poplar Hill
5. Harford/Echodale

#### Five Lowest:

1. Highlandtown
2. Downtown/Seton Hill
3. Poppleton/The Terraces/  
Hollins Market
4. Morrell Park/Violetville
5. Harbor East/Little Italy

### Percent of Students Switching Schools within School Year

Measure of student mobility in a school year.

Definition: The percentage of 1st through 12th graders who change schools out of all students in a school year. Students must have attended both schools for which they were registered for at least one day. Additionally, this indicator only identifies the share of students that change schools for any reasons and not the frequency, number of school switches, or change in residences in a school year. The percentage reflects the last home address available for the student who changed schools. This may or may not be the home address provided for the first school that they are registered to attend. (SOURCE: BALTIMORE CITY PUBLIC SCHOOLS, 2009-2010, 2010-2011, 2011-2012, 2012-2013, 2013-2014, 2014-2015, 2015-2016)

#### Five Highest:

North & East
3. Southeastern
4. Greenmount East
5. Fells Point

### Percentage of 3rd Grade Students who met or exceeded PARCC Math

Measures the achievement and progress of students in public school.

In the 2014-2015 school year, the Baltimore City Public School System began to administer the Partnership for Assessment of Readiness for College and Careers (PARCC) measurement system to align with adoption of the common core curriculum. This test supersedes the previously administered Maryland State Assessment. Student scores are classified into one of five performance levels: exceeded expectations, met expectations, approached expectations, partially met expectation, or did not meet expectations. The first two levels have been identified as being “on track for the next grade level.” (SOURCE: BALTIMORE CITY PUBLIC SCHOOLS, 2014-2015, 2015-2016)

#### Five Highest:

1. Greater Roland Park/Poplar Hill
2. Mount Washington/Coldspring
3. North Baltimore/Guilford/Homeland

3. Clifton-Berea
4. Greenmount East
5. Brooklyn/Curtis Bay/Hawkins Point

### Percentage of 3rd Grade Students who met or exceeded PARCC Reading

Measures the achievement and progress of students in public school.

In the 2014-2015 school year, the Baltimore City Public School System began to administer the Partnership for Assessment of Readiness for College and Careers (PARCC) measurement system to align with adoption of the common core curriculum. This test supersedes the previously administered Maryland State Assessment. Student scores are classified into one of five performance levels: exceeded expectations, met expectations, approached expectations, partially met expectation, or did not meet expectations. The first two levels have been identified as being “on track for the next grade level.” (SOURCE: BALTIMORE CITY PUBLIC SCHOOLS, 2014-2015, 2015-2016)

#### Five Highest:

1. Greater Roland Park/Poplar Hill
2. Canton
3. Mount Washington/Coldspring
4. North Baltimore/Guilford/Homeland
5. South Baltimore

#### Five Lowest:

1. Poppleton/The Terraces/Hollins Market
2. Cherry Hill
3. Sandtown-Winchester/Harlem Park
4. Brooklyn/Curtis Bay/Hawkins Point
5. Greenmount East

### Percentage of 5th Grade Students who met or exceeded PARCC Reading

Measures the achievement and progress of students in public school.

In the 2014-2015 school year, the Baltimore City Public School System began to administer the Partnership for Assessment of Readiness for College and Careers (PARCC) measurement system to align with adoption of the common core curriculum. This test supersedes the previously administered Maryland State Assessment. Student scores are classified into one of five performance levels: exceeded expectations, met expectations, approached expectations, partially met expectation, or did not meet expectations. The first two levels have been identified as being “on track for the next grade level.” (SOURCE: BALTIMORE CITY PUBLIC SCHOOLS, 2014-2015, 2015-2016)

#### Five Highest:

1. Greater Roland Park/Poplar Hill
2. North Baltimore/Guilford/Homeland
3. Mount Washington/Coldspring
4. Fells Point
5. Inner Harbor/Federal Hill

#### Five Lowest:

1. Clifton-Berea
2. Cherry Hill
3. Oldtown/Middle East
4. Belair-Edison
5. Greenmount East

### Percentage of 5th Grade Students who met or exceeded PARCC Math

Measures the achievement and progress of students in public school.

In the 2014-2015 school year, the Baltimore City Public School System began to administer the Partnership for Assessment of Readiness for College and Careers (PARCC) measurement system to align with adoption of the common core curriculum. This test supersedes the previously administered Maryland State Assessment. Student scores are classified into one of five performance levels: exceeded expectations, met expectations, approached expectations, partially met expectation, or did not meet expectations. 4. Inner Harbor/Federal Hill
5. South Baltimore

#### Five Lowest:

1. Edmondson Village
2. Harbor East/Little Italy, Penn North/Reservoir Hill
3. Greenmount East
4. Poppleton/The Terraces/Hollins Market
5. Southwest Baltimore

## Youth Labor Force Engagement

### Percentage of Population aged 16-19 in School and/or Employed

Measures youth participation in productive activities.

Definition: The percentage of persons aged 16 to 19 who are in school and/or are employed out of all persons in their age cohort. (SOURCE: AMERICAN COMMUNITY SURVEY, 2006-2010, 2011-2015, 2015-2016)

#### Five Highest:

1. Canton, Greater Roland Park/Poplar Hill, Hamilton, Inner Harbor/Federal Hill, Midtown, Westport/Mt. Winans/Lakeland
2. Northwood
3. North Baltimore/Guilford/Homeland
4. South Baltimore
5. Southeastern

#### Five Lowest:

1. Morrell Park/Violetville
2. Southern Park Heights
3. Claremont/Armistead
4. Greater Rosemont
5. Beechfield/Ten Hills/West Hills

# Arts and Culture

In a city with a long heritage of cultural traditions, Baltimore provides the artistic and community space to be on the national forefront of creative expression and debate. These expressions come from exemplary individual artists, such as Baltimore-based Amy Sherald, who made history in February 2018 when she unveiled her portrait of Michelle Obama at the National Portrait Gallery and became the first African-American artist commissioned for a first lady's official portrait. Cultural expression also takes form in action during times of reform, such as when Mayor Catherine Pugh decided to swiftly remove four confederate monuments in August 2017 in response to growing reverence for these structures among white supremacists. Soon afterward, the Baltimore Office of Promotion & the Arts (BOPA) hosted "Monumental Sites," an open call for suggestions for what to display on the now-empty pedestals.<sup>1</sup> Artpartheid, a group working against segregation of Baltimore's arts community, launched "Reimagining Monuments" with support from Maryland Humanities, which was a series of community conversations regarding the monuments through a variety of art forms, including poetry and live performances.<sup>2</sup>

Accolades in national news publications have praised the innovative creative scene in Baltimore. *Forbes* took note of Baltimore's growing arts scene in its list of "The 10 Coolest U.S. Cities to Visit in 2018," highlighting exhibits at the Baltimore Museum of Art.<sup>3</sup> The *New York Times* listed Baltimore as one of its 52 places to visit around the world in 2018, noting the city's "packed cultural calendar." Events such as the commemoration of the 200th birthday of Frederick Douglass and the expansion of the Light City Festival to 14 neighborhood locations help draw tourists and residents to different parts of the city.<sup>4</sup>

Locally, artistic and cultural opportunities support everyday life and strengthen neighborhoods. Baltimore is filled with murals and festivals in public spaces as well as artwork and concerts in local gathering spots such as coffee shops and eateries. Neighborhoods use creative placemaking to reveal their identity. Belair-Edison's Main Street features planter mosaics of local businesses in their streetscape. Bolton Hill has numerous historical markers at the former homes of its famous residents, such as author F. Scott Fitzgerald and scholar Edith Hamilton. In 2016,

a number of maker spaces, such as the Centre Theater in Station North and Open Works in Greenmount West, were built in order to make space for creative expression and the artistic and creative economies in the city.

In order to help communities better track formal and informal places and events that bring people together around cultural opportunities, the GEOLOOM co>map online mapping tool launched in 2017, which exhibits the rich diversity of Baltimore's cultural landscape, and captures how arts and culture is intertwined with other indicators of community vitality, such as health, safety, and education (see Data Story).

Baltimore is a city where arts and culture is always on display. *Vital Signs 16* includes a total of eight arts and culture indicators, divided into four general categories: the public art category represents a permanent and localized medium of visual arts and culture, the public events category represents temporary activities to promote social interaction and cohesion, the arts and culture economy category represents the talent, economy, and capital that

## Data Story: Culture Mapping with Geoloom co>map

In July 2017, an alliance of arts, culture, and community organizations launched the GEOLOOM co>map, an interactive online mapping tool that tracks a broad and expansive range of arts and culture data. The GEOLOOM co>map is rooted in the idea that arts and culture play a significant role in fostering the vitality of a place. Neighborhood-based arts and cultural activity can have an impact on residents' attachment to their community, the overall economic conditions in their neighborhood, and the quality of life for the entire city. The goal of GEOLOOM co>map is to insure that every community receives the attention and support needed to establish and maintain livability throughout the city. The map demonstrates how support for arts and culture can be redistributed to support a broader range of communities and mediums of expression and how arts and culture is correlated with quality of life.

In order to truly capture an inclusive and representative picture of arts and culture in Baltimore, the Baltimore Neighborhood Indicators Alliance-Jacob France Institute partnered with a steering committee of the Baltimore Office of Promotion & the Arts, Greater Baltimore Cultural Alliance, and Robert W. Deutsch Foundation, to create the GEOLOOM co>map

with a working group of cultural organizations, community groups, foundations, and city agencies to create the map.\* As a result, the mapping tool collects data from non-traditional data sources, such as Work, Exhibit, and Performance Space from the Greater Baltimore Cultural Alliance's Fractured Atlas, Special Event Permits from the Department of Transportation, and Heritage Investment Grants from the Baltimore National Heritage Area.

The map is grounded in the idea that anyone can define culture. A crowdsourcing feature collects activities, destinations, artwork, and artists that are not captured in existing datasets. By conducting a cultural participation survey, BNIA-JFI analyzed patterns of access and preferences throughout the city. Community groups, such as Belair-Edison Neighborhoods, Inc. and Southeast CDC, have contributed inventories of public art to the mapping tool in order to demonstrate the cultural vibrancy of their communities.

To learn more about the GEOLOOM co>map, please visit the website at [geoloom.org](https://geoloom.org).

**By the Baltimore Neighborhood Indicators Alliance—Jacob France Institute (BNIA-JFI).**

\* An online handbook about the creation of the map is available at <https://bniajfi.org/wp-content/uploads/2017/07/GEOLOOM-Handbook-FINAL.pdf>

arts and culture cultivate and attract to Baltimore, and the public library category represents a locally-accessible system of community spaces.

### Data

*Vital Signs 16* tracks arts and culture indicators from four main sources: Baltimore Office of Promotion & the Arts (BOPA), Enoch Pratt Free Library, Department of Transportation,<sup>5</sup> and InfoUSA. These sources are citywide data inventories that allow for a comprehensive overview of arts and culture as well as a breakdown of data into the neighborhood level for further analysis. While additional related sources are available on location-specific scales, only citywide inventories are currently included in order to ensure consistency across all Community Statistical Areas (CSAs)<sup>6</sup>.

When possible, indicators are created by normalizing these data to the population size of each area. Normalizing data reflects the concentration of the indicators relative to the population, and allows for comparisons across neighborhoods over time.

### Public Art

In 1964, Baltimore became the second city in the country to pass a Percent-for-Art law, which requires 1% of all capital construction costs go to toward public art. Since then, over 300 works have been publicly-funded as a part of this program, including murals, monuments, paintings, and sculptures. In 2007, the City of Baltimore created a nine-member citizen public art commission that reviews gifts of public art and administers the Percent-for-Art program.<sup>7</sup>

#### Data Key

Green colored text denotes a positive change.

Red colored text denotes a negative change.

Blue colored text denotes a neutral change.

### Public Art per 1,000 Residents<sup>8</sup>

Public art is defined by BOPA as city-funded artwork that “enhances the cityscape, quality of life, and artistic and creative climate in Baltimore.”<sup>9</sup> Monuments, murals, paintings, sculptures, stained glass, fountains, and mosaics are among the art forms counted in the public art indicator.

In 2016, there were 1.3 works of public art per 1,000 residents in the City of Baltimore. The CSAs with the **greatest** rates of city-funded public art included Downtown/Seton Hill (15.5 per 1,000 residents), the Waverlies (4.3 per 1,000 residents), and Greater Charles Village/Barclay (4.3 per 1,000 residents). Two CSAs, Mt. Washington/Coldspring and Southeastern, had **zero** works of city-funded public art.

The CSAs that experienced the greatest **increase** in rate of public art included Midtown (+1.9 per 1,000 residents), and Greater Charles Village/Barclay (+1.3 per 1,000 residents). The CSAs with the greatest **declines** included Westport/Mt. Winans/Lakeland (-2.9 per 1,000 residents) and Oldtown/Middle East (-2.8 per 1,000 residents).

### Number of Murals

City-funded murals are included in both the public art indicator as well as a separate indicator in order to track where they are emerging throughout the City. Murals, a highly visible and growing art form in Baltimore, capture community sentiments and history engaging both residents and visitors.

In 2016, there were a total of 295 publicly funded murals in the City of Baltimore. The CSAs with the **largest** number of publicly-funded murals included Downtown/Seton Hill (46 murals), Upton/Druid Heights (21 murals), Sandtown-Winchester/Harlem Park (18 murals), and Washington Village/Pigtown (18 murals). Fourteen CSAs had **zero** publicly-funded murals.

Between 2015 and 2016, the number of publicly-funded murals in Baltimore City **increased** by 69 murals. The CSAs that **increased** in number of murals included Upton/Druid Heights (+14 murals), Sandtown-Winchester/Harlem

5. Data is provided by the Baltimore City Department of Transportation through the Envista Database.

6. CSAs are groups of census tracts that correspond to neighborhoods which vary in size. See *Vital Signs 16* Introduction.

7. Baltimore Office of Promotion & the Arts Public Art Commission. Retrieved from: [www.promotionandarts.org/arts-council/baltimore-public-art-commission](http://www.promotionandarts.org/arts-council/baltimore-public-art-commission)

8. Data on publicly-funded public art comes from the BOPA. While several examples of privately-funded public art exist in Baltimore, these data are not tracked by BOPA or by any one source. Comparisons of these indicators from previous Vital Signs reports may be difficult due to improvements in how the BOPA tracks publically-funded public art.

9. Baltimore Office of Promotion & the Arts Public Art Commission (2011 October). *City of Baltimore Public Art Guidelines 2012*.

**Baltimore City Public Murals by CSA, 2016**

Park (+12 murals), and Midtown (+12 murals). The CSAs that **decreased** in number of murals included Westport/Mt. Winans/Lakeland (-10 murals) and the Waverlies (-4 murals).

**Public Events**

Public events are temporary convening areas in public rights-of-way that generally involve community participation, input, and initiative. Beyond promoting neighborhood activity, public events are directly linked to increases in civic engagement overall.<sup>10</sup> *Vital Signs* tracks the frequency of public events through the number of event permits requested per 1,000 residents for activities such as parades, festivals, block parties, and marathons.<sup>11</sup>

**Event Permits**

Between 2015 and 2016, the number of event permits requested per 1,000 residents in Baltimore City **increased** to from 1.4 to 1.7 per 1,000 residents. The CSAs with the **greatest** rates of event permit requests were Downtown/Seton Hill (16.1 per 1,000 residents), Harbor East/Little Italy (12.0 per 1,000 residents), and Inner Harbor/Federal Hill (11.5 per 1,000 residents).

The CSAs that experienced the greatest **increase** in the rate of event permits requested per 1,000 residents included Downtown/Seton Hill (+8.5 per 1,000 residents) and Harbor East/Little Italy (+8.1 per 1,000 residents). The CSAs that experienced the greatest **decrease** in the rate of event permits requested per 1,000 residents included Santown-Winchester/Harlem Park (-0.8 per 1,000 residents), and both Clifton-Berea and Southwest Baltimore (-0.5 per 1,000 residents).

**Arts and Culture Economy<sup>12</sup>**

The arts and culture economy encompasses a diversity of industries that create employment and stimulate the economy, allow for educational opportunities in the arts and related fields, market and brand a city or neighborhood, contribute to creative placemaking and the reuse of spaces for communities, and brand and market a city or neighborhood. These industries range from spaces where the arts can be enjoyed, such as theaters or art studios, to institutions of learning that teach visual, musical, and performing arts, to businesses that involve creative skill sets, such as architecture firms or advertising agencies.

*Vital Signs 16* includes both rates of and number of persons employed in arts-related businesses, which are defined as belonging to industries that allow for the consumption and enjoyment of arts and culture, and rates of businesses and number of persons employed in the creative economy, which is defined as industries that use and support artistic and cultural skill sets to attract and generate capital, knowledge, and information.<sup>13</sup>

10. Ann Markusen and Anne Gadwa, (2010) "Creative Placemaking,"

11. If a public event, such as a marathon or festival, extends into the boundaries of multiple CSAs, the centroid of the event is used to determine the event's CSA. All events are counted once per an event permit request.

12. Due to InfoUSA's survey methodology, which consists of compiling a list of publicly-available phone numbers to conduct a sample phone survey, some businesses, such as those without landlines, are not represented. Additionally, firms with multiple branches may report total employment out of a single location, distorting employee counts by geography. For this reason, year-over-year comparisons of the data are not recommended

13. For a complete list of SIC and NAICS codes used to define arts-based and creative economy industries, see Arts & Culture Economy Indicators

## Arts and Culture

**Arts-Related Businesses**

From 2015 to 2016, the number of arts-related businesses in Baltimore City **decreased** slightly from 0.7 to 0.6 per 1,000 residents. The CSAs that experienced the greatest **increase** included Washington Village/Pigtown (+0.5 businesses per 1,000 residents), Inner Harbor/Federal Hill (+0.4 businesses per 1,000 residents), and Greater Charles Village/Barclay (+0.4 businesses per 1,000 residents). The CSA with the greatest **decline** was Downtown/Seton Hill (-2.3 businesses per 1,000 residents).

In 2016, the CSAs with the **largest** rate of arts-related businesses per 1,000 residents included Downtown/Seton Hill (7.6 businesses per 1,000 residents) and Midtown (3.7 businesses per 1,000 residents). Dorchester/Ashburton, Greater Govans, and Westport/Mt. Winans/Lakeland had **zero** arts-related businesses per 1,000 residents.

**Arts-Related Employment**

In 2016, the CSAs with the **largest** number of persons employed in arts-related businesses were Inner Harbor/Federal Hill (1,077 employees), Midtown (800 employees), and Downtown/Seton Hill (711 employees). Dorchester/Ashburton, Greater Govans, and Westport/Mt. Winans/Lakeland had **zero** persons employed in arts-related businesses.

**Creative Economy Businesses**

The rate of businesses and number of persons employed in the creative economy includes arts-related industries and adds other creative industries, such as architecture, marketing, and publishing.<sup>14</sup>

From 2015 to 2016, the rate of businesses in the creative economy in Baltimore City **decreased** from 1.6 to 1.4 per 1,000 residents. The CSAs that experienced the greatest **increase** included Dickeyville/Franklinton (+0.7 businesses per 1,000 residents) and Inner Harbor/Federal Hill (+0.6 businesses per 1,000 residents). The CSAs with the greatest **decrease** included Downtown/Seton Hill (-4.3

businesses per 1,000 residents) and Chinquapin Park/Belvedere (-1.3 businesses per 1,000 residents).

In 2016, the CSAs with the **largest** rate of businesses in the creative economy per 1,000 residents included Downtown/Seton Hill (17.4 businesses per 1,000 residents), Midtown (7.5 per 1,000 residents), and Medfield/Hampden/Woodberry/Remington (6.1 per 1,000 residents). The CSAs with the **lowest** rate of businesses in the creative economy per 1,000 residents included Sandstone-Winchester/Harlem Park (0.1 businesses per 1,000 residents) and Dorchester/Ashburton (0.1 businesses per 1,000 residents).

**Creative Economy Employment**

In 2016, there were 16,060 persons in Baltimore employed in the creative economy. The CSAs with the **largest** number of persons employed in the creative economy were Midtown (3,930) and Inner Harbor/Federal Hill (1,885).

**Library Membership<sup>15</sup>**

Baltimore is home to the Enoch Pratt Free Library (Pratt) system, one of the oldest continuously operating free public library systems in the country. One of the most important community assets of a neighborhood is the local public library, which provides access to literature and information both as traditional print media and in digital formats. Public libraries also provide spaces for residents of all ages to engage in literary and cultural events, workshops, and educational activities. In 2013, Pratt libraries began offering classes to educate members about how to download e-books onto digital devices and continued expanding digital resources, which may explain some increases in library membership.

Although this indicator is categorized within the Arts and Culture section of *Vital Signs 16*, it is easily associated with education indicators, as libraries are places for preschoolers to adult-learners, as well as workforce and economic development indicators, providing a place for free access to Internet resources.

14. For a complete list of SIC and NAICS codes used to define arts-based and creative economy industries, see Arts & Culture Economy Indicators.

15. Data obtained through a data-sharing agreement from the Enoch Pratt Free Library. Library membership data for 2015 onwards counts all active card types for all members of a household with a membership card, including library cards that do not expire. Previous totals for registered borrowers/active library users did not include users who have a library card that does not expire. For these reasons, comparison of the data between years is not recommended.

16. Please note that the *Vital Signs 16* data is based on the Enoch Pratt Free Library fiscal year 2017 data (July 1, 2016 - June 30, 2017).

17. The overall decrease in library card membership between 2015 and 2016 may be the result of a dramatic increase in 2015 due to the Enoch Pratt Free Library's partnership with the Baltimore City Public School System in the previous year. Half of all library locations recorded their highest levels in 2015 of Juvenile library card registration.

## Baltimore City Library Card Membership by CSA, 2016

## Persons with Library Cards

Between 2015 and 2016,<sup>16</sup> the number of persons in Baltimore with library cards per 1,000 residents<sup>17</sup> **decreased** from 362.8 to 313.2 per 1,000 residents. The CSAs that experienced the greatest **decrease** in persons with library cards per 1,000 residents were Oldtown/Middle East (-103.1 per 1,000 residents) and Cherry Hill (-93.8 per 1,000 residents).

The CSAs with the **highest** number of residents with active library cards included Cherry Hill (484.4 per 1,000 residents), The Waverlies (458.3 per 1,000 residents), and Oldtown/Middle East (436.2 per 1,000 residents). The CSAs with the **lowest** numbers of residents with active library cards included Morrell Park/Violetville (99.4 per 1,000 residents) and Cross-Country/Cheswolde (124.1 per 1,000 residents). Notably, the CSAs with the five lowest rates of residents with active library cards are not home to any of the 21 neighborhood branches of the Enoch Pratt Free Library.

# Arts and Culture

## Indicator Definitions and Rankings

For each indicator reported in *Vital Signs 16*, we provide the data source, the years for which it is reported, and the five CSAs with the highest and lowest values for the indicator; these may not correspond to positive or negative trends.

### Public Art

#### Public Art per 1,000 residents

Measures the concentration of public art.

Definition: The number of works of publicly funded art per 1,000 residents. These works include, but are not exclusive to, murals, monuments, sculptures, mosaics, and stained glass. The Baltimore Office of Promotion and the Arts tracks works created through the 1% for Public Art and Baltimore Mural Programs and maintains general inventories of public art and murals. (SOURCE: BALTIMORE OFFICE OF PROMOTION AND THE ARTS, 2014, 2015, 2016)

##### Five Highest:

1. Downtown/Seton Hill
2. The Waverlies
3. Greater Charles Village/Barclay
4. Midtown
5. Oldtown/Middle East

##### Five Lowest:

1. Mount Washington/Coldspring, Southeastern
2. Cross-Country/Cheswolde
3. Hamilton
4. Edmondson Village
5. Loch Raven

#### Number of Murals per CSA

Measures the number of murals per CSA.

Definition: The number of publicly funded murals per CSA. Murals are also included in the “Public Art per 1,000 residents” indicator. (SOURCE: BALTIMORE OFFICE OF PROMOTION AND THE ARTS, 2014, 2015, 2016)

##### Five Highest:

1. Downtown/Seton Hill
2. Upton/Druid Heights
3. Sandtown-Winchester/Harlem Park
4. Washington Village/Pigtown
5. Midtown

##### Five Lowest:

Fourteen CSAs did not have any murals.

### Public Events

#### Number of Event Permits Requested per 1,000 Residents

Measures the total number of event permits requested in an area.

Definition: The number of event permits requested per 1,000 residents. Events include, but are not limited to, festivals, block parties, races, and parades. In the event of a large event, the central point is used to calculate the location of the request. (SOURCE: ENVISTA, WITH PERMISSION FROM THE BALTIMORE CITY DEPARTMENT OF TRANSPORTATION, 2014, 2015, 2016)

##### Five Highest:

1. Downtown/Seton Hill
2. Harbor East/Little Italy
3. Inner Harbor/Federal Hill
4. Canton
5. Midtown

##### Five Lowest:

1. Brooklyn/Curtis Bay/Hawkins Point
2. Cross-Country/Cheswolde
3. Morrell Park/Violetville
4. Harford/Echodale
5. Claremont/Armistead

## Public Library

### Number of Persons with Library Cards per 1,000 Residents

Measures the total number of persons having a library card in an area.

Definition: The rate of persons per 1,000 residents that possess a valid public library system card. This includes all library card types (first card, juvenile, young adult, adult).

(SOURCE: ENOCH PRATT FREE LIBRARY, 2011, 2012, 2013, 2014, 2015, 2016; U.S. CENSUS, 2010)

#### Five Highest:

1. Cherry Hill
2. The Waverlies
3. Oldtown/Middle East
4. Greater Roland Park/Poplar Hill
5. Downtown/Seton Hill

#### Five Lowest:

1. Morrell Park/Violetville
2. Cross-Country/Cheswolde
3. Dickeyville/Franklinton
4. Howard Park/West Arlington
5. Southeastern

## Arts & Culture Economy

### Number of Arts-Related Businesses per 1,000 Residents

Measures the concentration of arts-related businesses in an area.

Definition: The number of businesses (both for-profit and non-profit) that are directly related to arts and culture per 1,000 residents. Arts-related businesses are defined as belonging to industries that allow for the consumption and enjoyment of arts and culture. The following industries are identified by their primary NAICS code: art dealers (4539); art schools (6166); independent artists, writers, and performers (7115); libraries (5191); motion picture and film (5213, 5322); museums, historical sites, zoos, gardens, and parks (7121); music, literary, and visual arts-related retail/supplies (4511, 4512); and performing arts (7111). The following industries are identified by their primary SIC codes: art and music instruction (8049, 8299); art galleries, dealers, and consultants (5999); art publishers (2741); calligraphers (7336); designers (1521); embroidery (7389); libraries (8231); museums and arts organizations (8412); music and live entertainment (7929); music, literary, and visual arts-related retail/supplies (3931, 5192, 5736, 5932, 5942, 5945, 5946, 5999, 7699); parks (7999); photography (7221); theaters and theatrical support (7832, 7922); writers, artists, musicians, and composers (8999); and zoos (8422). (SOURCE: INFOUSA, 2011, 2012, 2013, 2014, 2015, 2016; U.S. CENSUS, 2010)

#### Five Highest:

1. Downtown/Seton Hill
2. Midtown
3. Inner Harbor/Federal Hill
4. Greater Charles Village/Barclay
5. Harbor East/Little Italy

#### Five Lowest:

1. Dorchester/Ashburton, Greater Govans, Westport/Mt. Winans/Lakeland
2. Allendale/Irvington/S. Hilton
3. Sandtown-Winchester/Harlem Park
4. Southern Park Heights
5. Beechfield/Ten Hills/West Hills

## Arts and Culture

**Total Employment in Arts-Related Businesses**

Measures the total number of persons employed in arts-related businesses in an area.

Definition: The number of persons employed in arts-related businesses (both for-profit and non-profit). This number does not count those persons who identify themselves as being artists and does not count sole proprietorships or persons who work part-time in the arts. The same industries used to calculate the rate of arts-related businesses are used to calculate total employment in arts-related businesses. (SOURCE: INFOUSA, 2011, 2012, 2013, 2014, 2015, 2016; U.S. CENSUS, 2010)

**Five Highest:**

1. Inner Harbor/  
Federal Hill
2. Midtown
3. Downtown/Seton Hill
4. Greater Charles  
Village/Barclay
5. Medfield/Hampden/  
Woodberry/Remington

**Five Lowest:**

1. Westport/Mt.  
Winans/Lakeland,  
Dorchester/Ashburton,  
Greater Govans,
2. Claremont/Armistead,  
Madison/East End
3. Loch Raven
4. Beechfield/Ten Hills/  
West Hills, Chinquapin  
Park/Belvedere, Howard  
Park/West Arlington,  
Midway/Coldstream
5. Dickyville Franklin

**Total Employment in the Creative Economy**

Measures the total number of persons employed in creative economy businesses in an area.

Definition: The number of persons employed in the creative economy (both for-profit and non-profit). This number does not count those persons who identify themselves as being artists and does not count sole proprietorships or persons who work part-time in the arts. The same industries used to calculate the rate businesses in the creative economy are used to calculate total employment in the creative economy. (SOURCE: INFOUSA, 2011, 2012, 2013, 2014, 2015, 2016; U.S. CENSUS, 2010)

**Five Highest:**

1. Midtown
2. Inner Harbor/  
Federal Hill
3. Downtown/Seton Hill
4. Medfield/Hampden/  
Woodberry/Remington
5. Oldtown/Middle East

3. Dorchester/Ashburton,  
Loch Raven
4. Beechfield/Ten  
Hills/West Hills,  
Edmondson Village,  
Forest Park/Walbrook
5. Dickeyville/  
Franklinton, Howard  
Park/West Arlington

**Number of Businesses in the Creative Economy per 1,000 Residents**

Measures the concentration of creative economy businesses in an area.

Definition: The rate of businesses (both for-profit and non-profit) that are in the creative economy per 1,000 residents. The creative economy is defined as industries that use and support artistic and cultural skillsets to attract and generate capital, knowledge, and information. Arts-based businesses are included in the creative economy. In addition to the industries included in the rate of arts-based businesses indicator, the following industries are identified by their primary NAICS code: advertising (5418); architecture (5413); design (5414); motion picture and video production (5121); music publishing and sound recording (5122); news syndicates (5191); photography (5419); printing and publishing (3231, 4512, 5111); radio stations (5151); and textiles (3132). In addition to the industries included in the rate of arts-based businesses indicator, the following industries are identified by their primary SIC code: advertising (5199, 7311, 7313, 7319); architecture (8712, 8748); business writing (899); fashion designers (5699, 5944); graphic design and commercial art (7336); interior design (7389); landscape design (7810); media (7383); motion picture and video support (7812, 7819); photography (7221, 7335, 7384); print media (2711, 2721, 2731, 5963, 5994); printing and publishing (2732, 2741, 2752, 2759, 2789, 8742); radio (4832); restoration (7641); television (4833, 4841, 7922, 8249); textiles (5131, 5949); and website design (7373). (SOURCE: INFOUSA, 2011, 2012, 2013, 2014, 2015, 2016; U.S. CENSUS, 2010)

**Five Highest:**

1. Downtown/Seton Hill
2. Midtown
3. Medfield/Hampden/  
Woodberry/Remington
4. Harbor East/Little Italy
5. Inner Harbor/  
Federal Hill

**Five Lowest:**

1. Sandtown-Winchester/  
Harlem Park
2. Dorchester/Ashburton
3. Allendale/  
Irvington/S. Hilton
4. Edmondson Village
5. Madison/East End

For more information on these indicators please visit <http://www.bniajfi.org>. \*Due to InfoUSA's survey methodology, which consists of compiling a list of publicly-available phone numbers to conduct a sample phone survey, some businesses, such as those without landlines, are not represented. Additionally, firms with multiple branches may report total employment out of a single location, distorting employee counts by geography. For this reason, year-over-year comparisons of the data are not recommended.

For more information on these indicators please visit <http://www.bniajfi.org>. \*Due to InfoUSA's survey methodology, which consists of compiling a list of publicly-available phone numbers to conduct a sample phone survey, some businesses, such as those without landlines, are not represented. Additionally, firms with multiple branches may report total employment out of a single location, distorting employee counts by geography. For this reason, year-over-year comparisons of the data are not recommended

# Sustainability

The City of Baltimore’s Office of Sustainability describes sustainability efforts as those which “improve quality of life while balancing the need for environmental protection, societal progress, and economic growth.”<sup>1</sup> At the center of all these aspects of sustainability lies the various mobility choices that exist in Baltimore that provide the means for everyone to have access to different parts of the city and region. Although Baltimore has made great strides in expanding mobility choices such as the Charm City Circulator, and car-and bike-sharing opportunities, according to the Central Maryland Transportation Alliance, the region received a “D” in the latest Transportation Report Card.<sup>2</sup> One of the worst-graded indicators in the report card was regarding “disconnected communities” – neighborhoods with high rates of households with long commute times to work. A 2015 study by Harvard economists<sup>3</sup> found that the single strongest factor affecting the odds of escaping poverty is commuting time within neighborhoods. Comparing the 2006-2010 and 2012-2016 American Community Survey in this chapter of the *Vital Signs* report shows that the travel times to work for Baltimore workers has increased over time.

To address sustainable transportation and many other issues, Baltimore launched a process to update the City’s Sustainability Plan between 2016 and 2018 that broadens the definition of what sustainability means by focusing greater attention to issues of equity and inclusion (see Data Story). The urgency to broaden the concept of sustainability became evident when the city erupted into civil unrest in 2015 after the death of Freddie Gray while in police custody. Baltimore’s new plan acknowledges that “We all benefit from robust neighborhoods and thriving societies. The more equitable our city, the more sustainable we all are.”

The broadened definition locally mirrors global efforts to include justice and peace in future strategies around sustainable development. In 2015, as part of a program called the USA Sustainable Cities Initiative (USA-SCI),<sup>4</sup> Baltimore was selected as one of three US cities to pilot implementation of 17 new United Nations (UN) Sustainable Development Goals. The SDGs, adopted by UN member countries in September 2015, form a cohesive

and integrated package of global aspirations the world commits to achieving by 2030. Baltimore stakeholders worked in collaboration with city agencies, community members, and other higher educational institutions to identify 54 concrete measures that track Baltimore’s progress towards each of these goals. Newly-elected Mayor Catherine Pugh endorsed the initiative when she took office in December 2016.

Mayor Pugh was not the only elected official to be newly-sworn into office after the 2016 general election. Of Baltimore’s 14 single-member city council districts, an unprecedented 8 new councilpersons were voted into office in 2016.<sup>5</sup> Voter registration in Baltimore has steadily been rising over the past decade, a key indicator of citizen engagement.

## Data

In *Vital Signs 16*, 20 indicators for Community Statistical Areas (CSAs)<sup>6</sup> track the city’s progress toward sustainability. These indicators are grouped into the following

1. 2018 Update of the Baltimore City Sustainability Plan [www.baltimoresustainability.org](http://www.baltimoresustainability.org)
2. Transportation Report Card, visit <http://www.cmtalliance.org/reportcard/>

4. Baltimore’s Sustainable Future: Localizing the UN Sustainable Development Goals, Strategies and Indicators (2016) <http://www.ubalt.edu/about-ub/sustainable-cities/>
5. “Baltimore voters elect eight new City Council members” Baltimore Sun (November 9, 2016) (<http://www.baltimore-sun.com/news/maryland/baltimore-city/politics/bs-md-ci-council-20161107-story.html>)
6. CSAs are groups of census tracts that correspond to neighborhoods. See *Vital Signs 16 Introduction*.

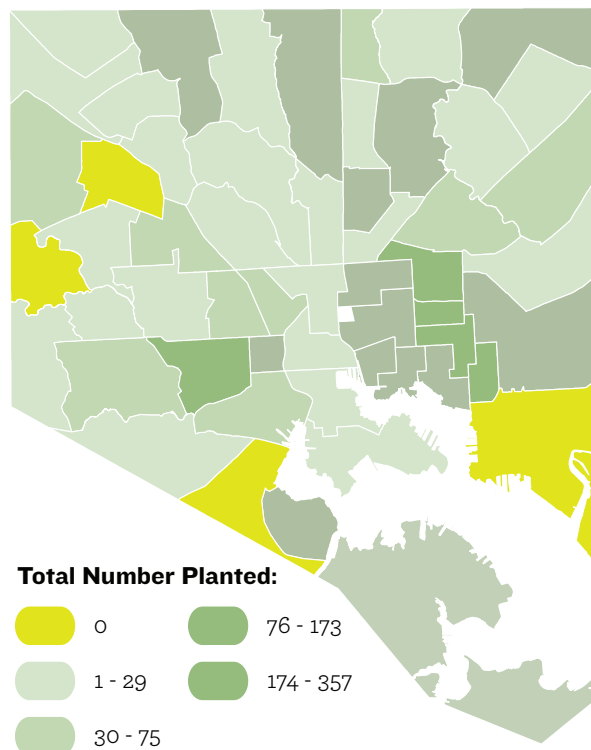

## Data Data Story: Planning for a More Sustainable, Equitable Baltimore

In 2016, the Commission on Sustainability and the Office of Sustainability began an update to the city's first Sustainability Plan (adopted in 2009). The new, updated Plan significantly broadens the meaning of sustainability in two ways. First, it more intentionally integrates an equity lens—to incorporate a vision that is meaningful for all residents in the city. The equity lens expanded the voices heard during the process in terms of not only of race but also gender, age, neighborhood, and employment status. It included those who have typically been left out of recent conversations in and about the American sustainability movement. Secondly, the Plan focuses not only on key environmental issues, such as pollution, transportation and extreme weather preparedness, but also expands the boundaries of sustainability to include strategies connected to good-paying local jobs, health and well-being.

The Plan identifies action areas within six categories: Community, Economy, Health & Well-Being, Nature in the City, Climate & Resiliency, and Human Made Systems. It provides a vision for housing, transportation, entrepreneurship, workforce preparedness, climate, and safety and many other topics. It also integrates connections across these issues to more sustainably address the challenges and opportunities in our city.

In order to hear the voices in all Baltimore neighborhoods, 125 residents were recruited and trained to survey their family, friends and neighbors about the city. When asked during the Plan engagement process, "What do you like most about your neighborhood?" a vast majority of the 1200 survey respondents, across all demographics, said it is their connection with their neighbors they like the most. Connection is the energy that exists between people when they feel seen, heard, and valued and when they derive sustenance and strength from relationships. When we are connected and working collaboratively, we can increase and improve outcomes for everyone. We can be unstoppable.

**Number of Trees Planted by CSA, 2016**

The Sustainability Office and Commission will actively seek feedback and engagement in meaningful and constructive ways as the Plan is implemented. They will ask: How are we doing? What can we do better? Are we fulfilling our plans, and following our planned timeline? They will tell the human story behind the data. They plan to speak in terms that are understandable to all residents, and be open and honest about both successes and failures. And, the equity lens will be used in evaluating impact through metrics and measures that resonate with people. The Plan includes the metrics that will be used, including Number of Trees of Planted, Housing Affordability Indices, Percent of Population with Commute Times over 45 minutes, and Life Expectancy.

### By the Baltimore City Office of Sustainability

For more information, visit  
<http://www.baltimoresustainability.org/plans/sustainability-plan/update/>

categories: transportation, sanitation, greening, energy and weatherization, and community engagement.

Data for *Vital Signs 16* Sustainability indicators come from sources that can be grouped into the following categories:

**City sources:** CitiStat/Baltimore 311, Department of Public Works, Department of Parks and Recreation-Tree-Baltimore, Board of Elections

**State sources:** Maryland Department of Housing and Community Development

**Federal sources:** American Community Survey

When possible, indicators are created by normalizing data by population or the number of residential properties to establish rates that allow for comparison across neighborhoods and over time.

## Transportation

Urban living often means having access to alternative means of transportation that reduce vehicle miles traveled by car. Baltimore's mid-size transportation system includes regional rail (MARC), Metro, light rail, the Charm City Circulator, and a system of local and commuter buses. While transportation is robust for movement north and south, problems with accessibility still persist in movement east and west. In addition, recent research has shown that "walkability" is necessary for cities to thrive<sup>7</sup> and that where transit use is high, so too is walking and/or biking. *Vital Signs 16* tracks several indicators that measure use of alternative transportation, travel time to work, and zero vehicle households.

Based on data from the 2012 - 2016 American Community Survey, a significant percentage of Baltimore commuters use alternative modes of transportation to get to work; however, travel times to work have increased between 2006-2010 and 2012-2016.

### Drive Alone

Between 2012-2016, 59.8% of Baltimore City residents drove alone to work. The CSAs with the **highest** percentage of residents who drove alone to work included Canton (77.7%),

South Baltimore (76.7%), and Hamilton (75.9%). The CSAs with the **lowest** percentage of residents who drove alone to work included Downtown/Seton Hill (35.1%), Oldtown/Middle East (36.5%), and Harbor East/Little Italy (36.6%).

### Public Transportation

During 2012-2016, 18.4% of Baltimore City residents used public transportation to commute to work. The CSAs with the **highest** percentage of residents who used public transportation to commute to work included Sandtown-Winchester/Harlem Park (43.2%), Greenmount East (42.7%), and Madison/East End (34.4%). The CSAs with the **lowest** percentage of residents who used public transportation to commute to work included Canton (3.1%), Greater Roland Park/Poplar Hill (5.9%), and South Baltimore (6.0%).

### Carpooling

During 2012-2016, 9.2% of Baltimore City residents used carpools to travel to work. The CSAs with the **highest** percentage of residents who used carpools to travel to work included Westport/Mount Winans/Lakeland (18.0%), Cherry Hill (16.3%), and Edmondson Village (16.2%). The CSAs with the **lowest** percentage of residents who used carpools to travel to work included Midtown (3.4%), Downtown/Seton Hill (3.6%), and Washington Village/Pigtown (4.4%).

### Walking

During 2012-2016, 6.7% of Baltimore City residents walked to work. The CSAs with the **highest** percentage of residents who walked to work included Downtown/Seton Hill (41.7%), Harbor East/Little Italy (26.4%), and Oldtown/Middle East (21.3%). The CSAs with the **lowest** percentage of residents who walked to work included Harford/Echodale (0.5%), Cedonia/Frankford (0.6%), and Hamilton (0.8%).

### No Personal Vehicle Access

The mode of transportation that someone uses to get to work is correlated to access to a personal car. Based on the 2012-2016 ACS, 29.4% of the households in Baltimore City did not have a vehicle available for personal use. The CSAs with the **highest** percentage of residents without access to a vehicle included Oldtown/Middle East (69.0%), Upton/Druid Heights (62.6%), and Sandtown-Winchester/Harlem Park (56.1%). The CSAs with the **lowest** percentage of residents without a vehicle included Greater Roland Park/Poplar Hill (5.5%), Canton (6.4%), and South Baltimore (7.7%).

#### Data Key

**Green colored text** denotes a positive change.

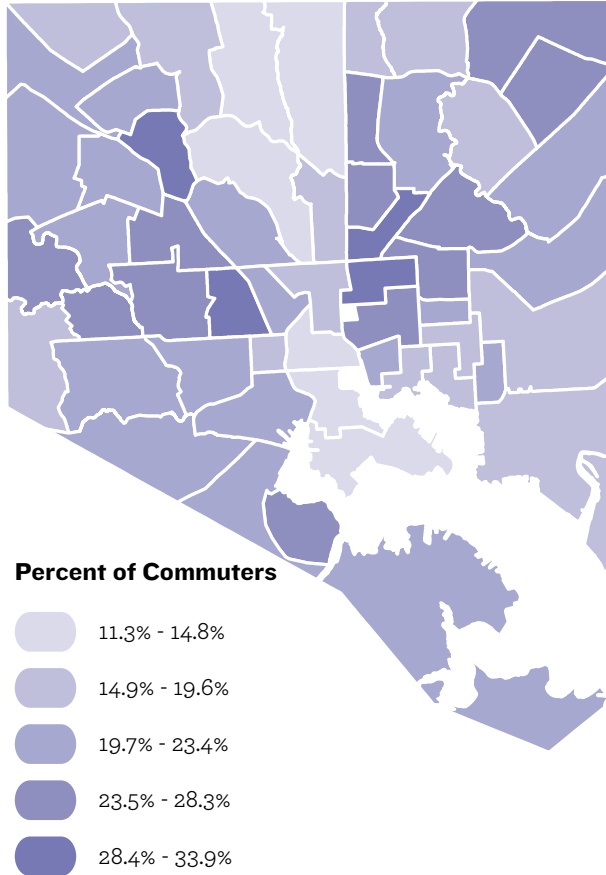

**Red colored text** denotes a negative change.

**Blue colored text** denotes a neutral change.

7. Jeff Speck (2012) *Walkable City: How Downtown Can Save America, One Step at a Time*.

### Percent Traveling More than 45 Minutes to Get to Work by CSA, 2012-2016

#### Commuting Less than 15 Minutes

From 2006-2010 to 2012-2016, the percentage of city residents commuting to work with a commute time of less than 15 minutes **decreased** slightly from 18.6% to 16.5%. During 2012-2016, the percentage of residents with a commute time of less than 15 minutes ranged from a **high** of 32.8% in Downtown/Seton Hill to a **low** of 6.3% in Southern Park Heights.

#### Commuting Between 15-29 Minutes

From 2006-2010 to 2012-2016, the percentage of city residents traveling to work with a commute of between 15 and 29 minutes **decreased** slightly from 38.6% to 38.5%. During 2012-2016, the percentage of residents with a commute of between 15 and 29 minutes ranged from a **high** of 51.5% in North Baltimore/Guilford/Homeland to a **low** of 24.9% in Harbor East/Little Italy.

#### Commuting Between 30-44 Minutes

From 2006-2010 to 2012-2016, the percentage of city residents commuting to work with a commute of between 30 and 44 minutes **increased** slightly from 23.8% to 24.5%. During 2012-2016, the percentage of residents with a commute of between 30 and 44 minutes ranged from a **high** of 33.3% in Cedonia/Frankford to a **low** of 14.6% in North Baltimore/Guilford/Homeland.

#### Commuting More than 45 Minutes

From 2006-2010 to 2012-2016, the percentage of city residents commuting to work with a commute greater than 45 minutes **increased** slightly from 19.0% to 20.5%. During 2011-2015, the percentage of residents with a commute greater than 45 minutes ranged from a **high** of 33.9% in Sandtown-Winchester/Harlem Park to a **low** of 11.3% in Inner Harbor/Federal Hill.

### Sanitation

In 2009, when Baltimore residents were surveyed about what sustainability issue was most important to them, sanitation or cleanliness rose to the top as an important component of quality of life. *Vital Signs 16* continues to track two indicators that measure the cleanliness of Baltimore City: the rate of dirty streets and alleys and the rate of clogged storm drains. Data originates from 311-system service requests, which occur when residents, employees of businesses, or city employees use the phone, website or mobile app to report a wide variety of non-emergency incidents or problems ranging from piles of trash to broken streetlights to potholes to broken equipment at a public park.

#### Dirty Streets and Alleys

From 2015 to 2016, the rate of reported dirty streets and alleys **decreased** from 65.1 to 54.3 per 1,000 residents. In 2016, the CSAs with the **highest** rates of reported dirty streets and alleys included Madison/East End (237.6 per 1,000 residents), Patterson Park North & East (207.0 per 1,000 residents), and Southwest Baltimore (185.1 per 1,000 residents). The CSAs with the **lowest** rates of reported dirty streets and alleys included Dickeyville/Franklintown (2.2 per 1,000 residents), Cross-Country/Cheswolde (2.5 per 1,000 residents), and Greater Roland Park/Poplar Hill (6.1 per 1,000 residents).

#### Clogged Storm Drains

From 2015 to 2016, the rate of reported clogged storm drains **increased** from 2.8 to 3.4 per 1,000 residents. In 2016, the CSAs with the **highest** rates of reported clogged storm drains included Downtown/Seton Hill (9.5 per 1,000 residents), Fells Point (7.9 per 1,000 residents), and Washington Village/Pigtown (7.5 per 1,000 residents). The CSAs

with the **lowest** rates of reported clogged storm drains included Dickeyville/Franklinton (1.0 per 1,000 residents), Cross-Country/Cheswolde (1.2 per 1,000 residents), and Dorchester/Ashburton (1.3 per 1,000 residents).

### Greening

Baltimore City is home to many green spaces, parks, and waterways. Some of the more widely recognized locations include the Inner Harbor, Middle Branch, Druid Hill, Gwynns Falls, and Herring Run Parks. City residents in particular value access to green spaces as a place to recreate, exercise, and congregate, but the city's green spaces also serve a vital role in ensuring clean air and water for long-term urban sustainability. Baltimore neighborhoods actively participate in increasing access to green spaces through tree planting and other watershed protection activities such as stream clean-ups. These efforts not only provide public health benefits but directly impact water quality in the city, region, and ultimately the entire Chesapeake Bay.<sup>8</sup> *Vital Signs 16* tracks two indicators for tree canopy and number of trees planted.

#### Number of Trees Planted

In 2016, there were 3,207 trees planted in Baltimore through the Mayoral initiative TreeBaltimore<sup>9</sup>. The CSAs with the **greatest** number of trees were planted in Patterson Park North & East (357), Madison/East End (278), and Highlandtown (211). Four CSAs had **no** trees planted: Dickeyville/Franklinton, Dorchester/Ashburton, Southeastern, and Westport/Mount Winans/Lakeland.

#### Tree Canopy<sup>10</sup>

In 2007, when data was last available, 27.5% of the city's total land area was covered with trees. By CSA, this figure ranges from a **high** of 72.1% in Dickeyville / Franklinton to a **low** of 3.2% in Highlandtown.

### Energy and Weatherization

One of the biggest issues that has gained importance for neighborhoods over the past decade is the use, conservation, and cost of residential energy. Research has shown that programs aimed at providing incentives for installing devices in the home to reduce consumption (compact

fluorescent lightbulbs, smart meters, energy saving appliances) or provide education on energy efficient practices impact the entire neighborhood through greater residential stability and investment.<sup>11</sup>

#### Homes Heated By Gas

Based on the 2012 - 2016 ACS, nearly two-thirds (65.0%) of the city's residences was heated using utility gas. The percentage of residences heated by utility gas ranged from a **high** of 77.5% in Greater Rosemont to a **low** of 28.6% in Downtown/Seton Hill. There were six other CSAs where at least 75% of the residences were heated using utility gas: Belair-Edison (77.3%), Madison/East End (76.3%), Hamilton (76.2%), Claremont/Armistead (75.8%), Lauraville (75.4%), and Dorchester/Ashburton (75%).

#### Homes Heated By Electricity

Based on the 2012 - 2016 ACS, just over a quarter (27.0%) of the city's residences were heated using electricity. The percentage of residences heated by electricity ranged from a **high** of 67.7% in Downtown/Seton Hill to a **low** of 12.7% in Hamilton.

#### Weatherization

Weatherization assistance programs (WAP) in the U.S. had received funding at levels needed for emergency management until significant budget increases were passed as part of the 2009 American Reinvestment and Recovery Act (ARRA).<sup>12</sup> In states like Maryland, more homes received weatherization services between 2009 - 2012 than in the entire previous decade, according to the Maryland Department of Housing and Community Development (DHCD), which oversees administration of these programs. This implies that weatherization is not only an important tool for reducing energy use, but also increasingly an important part of housing investments in many neighborhoods.

Data from DHCD shows that the percentage of residential properties in Baltimore City that were weatherized **decreased** from 0.9% in 2015 to 0.2% in 2016. In 2015, the CSAs that had the **greatest** percentage of homes weatherized were Oldtown/Middle East (13.4%), Pimlico/Arling-

8. For more information on Baltimore's plan for sustainable water quality, visit <http://www.cleanwaterbaltimore.org/>

9. Data comes from TreeBaltimore, an umbrella organization for City agencies and private entities involved in increasing Baltimore's tree canopy. [www.treebaltimore.org](http://www.treebaltimore.org)

10. The tree canopy change detection was carried out using high resolution aerial imagery and 3D airborne LiDAR data.

11. Austin Troy (2012). *The Very Hungry City: Urban Energy Efficiency and the Economic Fate of Cities*. Yale University Press.

12. The Weatherization Assistance Program helps eligible low-income households lower their energy costs by increasing the energy efficiency of their homes, while ensuring their health and safety. Priority is given to homeowners who are elderly, disabled and families with children and/or who have high energy consumption.

ton/Hilltop (0.5%), and Southwest Baltimore (0.4%). There were 10 CSAs with no weatherized residential properties.

### Community Engagement

Since 2000 when the first *Vital Signs* report was released, the percentage of persons registered to vote and the percentage of persons actually voting in the general election have been tracked as key indicators to measure community engagement. These indicators show steady increase in voter registration, but more variable rates of actual voting.

#### Percent of Population 18+

##### Who Voted in the Last Election

In 2016, 78.8% of the City residents over the age of 18 were registered to vote, which is an **increase** from 76.9% in 2014. The percentage of residents over the age of 18 who were registered to vote ranged from a **high** of 99.4%<sup>13</sup> in South Baltimore to a **low** of 57.7% in Brooklyn/Curtis Bay/Hawkins Point. Four more CSAs had at least 90% of the residents over the age of 18 were registered to vote: Mount Washington/Coldspring (98.4%), Edmonson Village (93.6%), Greater Roland Park/Poplar Hill (91.1%) and The Waverlies (90.9%).

#### Percent of Population 18+ Registered to Vote

In 2016, 48.2% of City residents voted in the general election, versus 37.3% in 2014 and 51.5% in 2012. The percentage of residents voting in the general election ranged from a **high** of 75.6% in Mount Washington/Coldspring to a **low** 26.1% in Brooklyn/Curtis Bay/Hawkins Point.

#### Percent of Population 18+ Registered to Vote in Baltimore City (2000-2016)

13. This indicator is calculated by dividing the total number of registered voters from the Baltimore City Board of Elections by the voting age population from the 2010 US Census.

# Sustainability

## Indicator Definitions and Rankings

For each indicator reported in *Vital Signs 16*, we provide the data source, the years for which it is reported, and the five CSAs with the highest and lowest values for the indicator; these may not correspond to positive or negative trends.

### Transportation

#### Percent of Population Driving Alone to Work

Measures the share of workers that commute alone by car to their job.

Definition: The percentage of commuters driving alone out of all commuters aged 16 and above. (SOURCE: AMERICAN COMMUNITY SURVEY, 2012-2016)

##### Five Highest:

1. Canton
2. South Baltimore
3. Hamilton
4. Harford/Echodale
5. Mount Washington/Coldspring

##### Five Lowest:

1. Downtown/Seton Hill
2. Oldtown/Middle East
3. Harbor East/Little Italy
4. Greenmount East
5. Madison/East End

#### Percent of Population Carpooling to Work

Measures the share of workers that commute by carpool to their work.

Definition: The percentage of commuters that carpool out of all commuters aged 16 and above. (SOURCE: AMERICAN COMMUNITY SURVEY, 2012-2016)

4. South Baltimore
5. Greater Roland  
Park/Poplar Hill

### Walk Score (From Vital Signs 11)

Measures the walkability (convenience to various amenities) of an area.

Definition: The Walk Score® is calculated by mapping out the distance to amenities in nine different categories (grocery stores, restaurants, shopping, coffee shops, banks, parks, schools, book stores/libraries, and entertainment) and are weighted according to importance. The distance to a location, counts, and weights determine a base score of an address, which is then normalized to a score from 0 to 100. More information on Walk Score can be found at <http://www.walkscore.com/>. (SOURCE: WALK SCORE® 2011)

#### Five Highest:

1. Downtown/Seton Hill
2. Harbor East/Little Italy
3. Fells Point
4. Midtown
5. Inner Harbor/  
Federal Hill

#### Five Lowest:

1. Dickeyville/  
Franklintown
2. Brooklyn/Curtis Bay/  
Hawkins Point
3. Southeastern
4. Claremont/Armistead
5. Mt. Washington/  
Coldspring

### Bike Lane Miles (From Vital Signs 12)

Measures the linear miles of designated bike lanes within the roadway system.

Definition: BikeBaltimore is the Department of Transportation's bike program and includes incorporating cycling in many transportation projects, installing bike racks and coordinating cycling events. This indicator measures the amount of linear miles of designated bike lanes in each CSA. (SOURCE: BIKEBALTIMORE - DEPARTMENT OF TRANSPORTATION)

#### Five Highest:

1. Downtown/Seton Hill
2. Harbor East/Little Italy
3. Fells Point
4. Midtown
5. Inner Harbor/  
Federal Hill

#### Five Lowest:

Seven CSAs did not have any bike lanes.

## Sanitation

### Rate of Dirty Street and Alley Reports per 1,000 Residents

Measure of cleanliness in the public rights-of-way.

Definition: The rate of service requests for dirty streets and alleys through Baltimore's 311 system per 1,000 residents. More than one service request may be made for the same issue but is logged as a unique request. (SOURCE: BALTIMORE CITY CITISTAT, 2011, 2012, 2013, 2014, 2015, 2016; U.S. CENSUS, 2010)

#### Five Highest:

1. Madison/East End
2. Patterson Park North & East
3. Southwest Baltimore
4. Greenmount East
5. Highlandtown

#### Five Lowest:

1. Dickeyville/  
Franklinton
2. Cross-Country/  
Cheswolde
3. Greater Roland  
Park/Poplar Hill
4. Cherry Hill
5. Harford/Echodale

### Rate of Clogged Storm Drain Reports per 1,000 Residents

Measure of cleanliness in storm waterways.

Definition: The rate of service requests for addressing clogged storm drains made through Baltimore's 311 system per 1,000 residents. More than one service request may be made for the same issue but is logged as a unique request. (SOURCE: BALTIMORE CITY CITISTAT, 2011, 2012, 2013, 2014, 2015, 2016; U.S. CENSUS, 2010)

#### Five Highest:

1. Downtown/Seton Hill
2. Fells Point
3. Madison/East End
4. Patterson Park North & East
5. Poppleton/The Terraces/  
Hollins Market

#### Five Lowest:

1. Dickeyville/  
Franklinton
2. Cross-Country/  
Cheswolde
3. Dorchester/Ashburton
4. Loch Raven
5. Cedonia/Frankford

## Energy and Weatherization

### Percent of Homes Heated by Utility Gas

Measure of homes that use utility gas for heat.

Definition: The percentage of homes that use utility gas for heat and cooking out of all homes. (SOURCE: AMERICAN COMMUNITY SURVEY, 2012-2016)

#### Five Highest:

1. Greater Rosemont
2. Belair-Edison
3. Madison/East End
4. Hamilton
5. Claremont/Armistead

#### Five Lowest:

1. Downtown/Seton Hill
2. Harbor East/Little Italy
3. Midtown
4. Inner Harbor/  
Federal Hill
5. Oldtown/Middle East

### Percent of Homes Heated by Electricity

Measure of homes that use electricity for heat.

Definition: The percentage of homes that use electricity for heat and cooking out of all homes. (SOURCE: AMERICAN COMMUNITY SURVEY, 2012-2016)

#### Five Highest:

1. Downtown/Seton Hill
2. Inner Harbor/  
Federal Hill
3. Midtown
4. Oldtown/Middle East
5. Harbor East/Little Italy

#### Five Lowest:

1. Hamilton
2. Lauraville
3. Belair-Edison
4. Greater Rosemont
5. Dorchester/Ashburton

## Sustainability

### Percent of Residential Properties Weatherized

Measure of residential weatherization to increase energy efficiency and safety.

Definition: The percent of residential properties that were eligible for and received weatherization assistance such as air sealing or furnace replacements during the year. The Weatherization Assistance Program helps eligible low-income households lower their energy costs by increasing the energy efficiency of their homes, while ensuring their health and safety. (SOURCE: MARYLAND DEPARTMENT OF HOUSING AND COMMUNITY DEVELOPMENT, 2011, 2012, 2013, 2014, 2015, 2016; U.S. CENSUS, 2010)

#### Five Highest:

1. Oldtown/Middle East
2. Pimlico/Arlington/Hilltop
3. Southwest Baltimore
4. Sandtown-Winchester/Harlem Park
5. Greater Rosemont

#### Five Lowest:

Ten CSAs had zero percent of homes eligible for and/or receiving WAP services.

## Green Space and Water Use

### Number of Community Managed Open Spaces

Measures of community managed open spaces in an area.

Definition: The number of community managed open spaces in an area that include community gardens (food-producing or ornamental), Adopt-A-Lots, or some other green space managed by the community. (SOURCE: DATA WAS INTEGRATED FROM BALTIMORE GREEN SPACE, PARKS AND PEOPLE, MASTER GARDENERS, THE JOHNS HOPKINS CENTER FOR A LIVABLE FUTURE, AND POWER IN DIRT. ANALYSIS: BALTIMORE NEIGHBORHOOD INDICATORS ALLIANCE-JACOB FRANCE INSTITUTE, 2014)

#### Five Highest:

1. Greenmount East
2. Southwest Baltimore
3. Upton/Druid Heights
4. Sandtown-Winchester/Harlem Park
5. Penn North/Reservoir Hill

#### Five Lowest:

Eight CSAs have zero community managed open spaces.

### Number of Trees Planted

Measures the annual number of trees planted in Baltimore.

Definition: The Baltimore City Department of Parks and Recreation's TreeBaltimore program has the goal of planting over 8,000 trees per year. This is part of the mayor's initiative to attract 10,000 new families to Baltimore and to provide a greener, sustainable environment. This indicator measures the number of trees planted annually by the TreeBaltimore program. (SOURCE: BALTIMORE CITY DEPARTMENT OF PARKS AND RECREATION TREEBALTIMORE, 2014, 2015, 2016)

#### Five Highest:

1. Patterson Park North & East
2. Madison/East End
3. Highlandtown
4. Southwest Baltimore
5. Clifton-Berea

#### Five Lowest:

Four CSAs have no trees planted: Dickeyville/Franklintown, Dorchester/Ashburton, Southeastern, and Westport/Mount Winans/Lakeland.ill

### Percent of Area Covered by Trees

Measure of tree canopy in an area.

Definition: The percent of total land area comprised of tree canopy. The primary sources for this land cover layer were 2004 pan-sharpened 1m Ikonos satellite imagery, a normalized Digital Surface Model (nDSM) derived from 2006 LiDAR data, and LiDAR intensity data resulting from the 2006 acquisition. Other sources of data include the City's planimetric GIS database (building footprints and road casing polygons). The land cover classification was performed using automated object-based image analysis (OBIA) techniques in Definiens Developer/eCognition Server. No accuracy assessment was conducted, but the dataset was thoroughly reviewed at a scale of 1:2000. Over 370 corrections were made to the classification.. (ANALYSIS BY: UNIVERSITY OF VERMONT SPATIAL ANALYSIS LAB. DATA CURRENT AS OF 2007)

#### Five Highest:

1. Highlandtown
2. Canton
3. Fells Point
4. Patterson Park North & East
5. South Baltimore

#### Five Lowest:

1. Orangeville/East Highlandtown
2. Howard Park/West Arlington
3. Pimlico/Arlington/Hilltop
4. Greater Rosemont
5. Dorchester/Ashburton

### Water Use (From Vital Signs II)

Measures the average amount of water used daily.

Definition: The median daily average water consumption of all city meters registering greater than 0.0 cubic meters per day. (SOURCE: BALTIMORE CITY DEPARTMENT OF PUBLIC WORKS, 2011)

#### Five Highest:

1. Downtown/Seton Hill
2. Claremont/Armistead
3. Cross-Country/  
Cheswolde
4. Greater Roland  
Park/Poplar Hill
5. Midtown

#### Five Lowest:

- Oldtown/Middle  
East and Canton  
(Six CSAs tied for second)

## Community Engagement

### Percent of the Population Who Are Registered to Vote

Measures civic engagement.

Definition: The percentage of persons over the age of 18 registered to vote out of all persons 18 years and over. (SOURCE: BALTIMORE CITY BOARD OF ELECTIONS, 2010, 2012, 2014, 2016)

#### Five Highest:

1. South Baltimore
2. Mount Washington/  
Coldspring
3. Edmondson Village
4. Greater Roland  
Park/Poplar Hill
5. The Waverlies

#### Five Lowest:

1. Brooklyn/Curtis Bay/  
Hawkins Point
2. Greater Charles  
Village/Barclay
3. Orangeville/East  
Highlandtown
4. Southeastern
5. Morrell Park/Violetville

### Percent of Population Who Voted in the Last General Election

A proxy measure designed to reflect neighborhood action and participation in community life.

Definition: The percentage of persons who voted in the last general election out of all registered voters. (SOURCE: BALTIMORE CITY BOARD OF ELECTIONS, 2010, 2012, 2014, 2016)

#### Five Highest:

1. Mount Washington/  
Coldspring
2. Greater Roland  
Park/Poplar Hill
3. South Baltimore
4. Beechfield/Ten  
Hills/West Hills
5. Lauraville

#### Five Lowest:

1. Brooklyn/Curtis Bay/  
Hawkins Point
2. Southeastern
3. Orangeville/East  
Highlandtown
4. Morrell Park/Violetville
5. Southwest Baltimore

# Sustainability Data Tables

## Transportation

Community Statistical Area (CSA)	Percent of Population 18+ Registered to Vote					Percent of Registered Voters Voting in Last General Election				
	2010	2012	2014	2016	Change (14-16)	2010	2012	2014	2016	Change (14-16)
